BattleTech: Children of Kerensky Blaine Lee Pardoe,2020-10-19 A RACE TO VICTORY... Terra. Birthplace of humankind. Cradle of the Inner Sphere. For centuries, it has been the Clans' ultimate prize. As prophesied by their founder, Nicholas Kerensky, the Clan that conquers Terra shall ascend above all others to become the ilClan, ruler over the rest of the Clans. And its leader shall become the ilKhan, and will lead the Inner Sphere into a new era. And now, nearly a century after the Clan Invasion, two Clans race to be the first to reach Terra and the ultimate prize. On one side is Alaric Ward, Khan of Clan Wolf, a brilliant warrior and complex mix of the best of the Clans and the Inner Sphere. He comes to save the Inner Sphere from itself, intending to construct a new empire among the stars. His main adversary is Chingis Khan Malvina Hazen, the brutal, ruthless leader of Clan Jade Falcon. Forged in a tradition where only the strong survive, she leads her touman not to save the Inner Sphere, but to raze it to ashes and rebuild it according to her own twisted vision. All that stands between them and a decisive victory that will reshape the Inner Sphere forever is the impenetrable barrier shielding Terra from invasion, not to mention the forces of the once-mighty Republic, which has no plans to surrender without a vicious fight...the only question is, who will reach Terra first?

Affective Health and Masculinities in South Africa Hans Reihling,2020-04-03 Affective Health and Masculinities in South Africa explores how different masculinities modulate substance use, interpersonal violence, suicidality, and AIDS as well as recovery cross-culturally. With a focus on three male protagonists living in very distinct urban areas of Cape Town, this comparative ethnography shows that men's struggles to become invulnerable increase vulnerability. Through an analysis of masculinities as social assemblages, the study shows how affective health problems are tied to modern individualism rather than African 'tradition' that has become a cliché in Eurocentric gender studies. Affective health is conceptualized as a balancing

act between autonomy and connectivity that after colonialism and apartheid has become compromised through the imperative of self-reliance. This book provides a rare perspective on young men's vulnerability in everyday life that may affect the reader and spark discussion about how masculinities in relationships shape physical and psychological health. Moreover, it shows how men change in the face of distress in ways that may look different than global health and gender-transformative approaches envision. Thick descriptions of actual events over the life course make the study accessible to both graduate and undergraduate students in the social sciences. Contributing to current debates on mental health and masculinity, this volume will be of interest to scholars from various disciplines including anthropology, gender studies, African studies, psychology, and global health.
