**Architecture** Francis D. K. Ching, 2012-07-16 A superb visual reference to the principles of architecture Now including interactive CD-ROM! For more than thirty years, the beautifully illustrated *Architecture: Form, Space, and Order* has been the classic introduction to the basic vocabulary of architectural design. The updated Third Edition features expanded sections on circulation, light, views, and site context, along with new considerations of environmental factors, building codes, and contemporary examples of form, space, and order. This classic visual reference helps both students and practicing architects understand the basic vocabulary of architectural design by examining how form and space are ordered in the built environment. Using his trademark meticulous drawing, Professor Ching shows the relationship between fundamental elements of architecture through the ages and across cultural boundaries. By looking at these seminal ideas, *Architecture: Form, Space, and Order* encourages the reader to look critically at the built environment and promotes a more evocative understanding of architecture. In addition to updates to content and many of the illustrations, this new edition includes a companion CD-ROM that brings the book's architectural concepts to life through three-dimensional models and animations created by Professor Ching.

**Experiencing Architecture, second edition** Steen Eiler Rasmussen, 1964-03-15 A classic examination of superb design through the centuries. Widely regarded as a classic in the field, *Experiencing Architecture* explores the history and promise of good design. Generously illustrated with historical examples of designing excellence—ranging from teacups, riding boots, and golf balls to the villas of Palladio and the fish-feeding pavilion of

Beijing's Winter Palace—Rasmussen's accessible guide invites us to appreciate architecture not only as a profession, but as an art that shapes everyday experience. In the past, Rasmussen argues, architecture was not just an individual pursuit, but a community undertaking. Dwellings were built with a natural feeling for place, materials and use, resulting in “a remarkably suitable comeliness.” While we cannot return to a former age, Rasmussen notes, we can still design spaces that are beautiful and useful by seeking to understand architecture as an art form that must be experienced. An understanding of good design comes not only from one's professional experience of architecture as an abstract, individual pursuit, but also from one's shared, everyday experience of architecture in real time—its particular use of light, color, shape, scale, texture, rhythm and sound. Experiencing Architecture reminds us of what good architectural design has accomplished over time, what it can accomplish still, and why it is worth pursuing. Wide-ranging and approachable, it is for anyone who has ever wondered “what instrument the architect plays on.”

The Glass Castle Jeannette Walls, 2007-01-02 A triumphant tale of a young woman and her difficult childhood, *The Glass Castle* is a remarkable memoir of resilience, redemption, and a revelatory look into a family at once deeply dysfunctional and wonderfully vibrant. Jeannette Walls was the second of four children raised by anti-institutional parents in a household of extremes.

*Paper Robots* Nick Knite, 2013-09-15 In this book you will find 25 robots to assemble, each with a wild and unusual design and background story.

The Venice Variations Sophia Psarra, 2018-04-30 From the myth of Arcadia through to

the twenty-first century, ideas about sustainability – how we imagine better urban environments – remain persistently relevant, and raise recurring questions. How do cities evolve as complex spaces nurturing both urban creativity and the fortuitous art of discovery, and by which mechanisms do they foster imagination and innovation? While past utopias were conceived in terms of an ideal geometry, contemporary exemplary models of urban design seek technological solutions of optimal organisation. The Venice Variations explores Venice as a prototypical city that may hold unique answers to the ancient narrative of utopia. Venice was not the result of a preconceived ideal but the pragmatic outcome of social and economic networks of communication. Its urban creativity, though, came to represent the quintessential combination of place and institutions of its time. Through a discussion of Venice and two other works owing their inspiration to this city – Italo Calvino's *Invisible Cities* and Le Corbusier's *Venice Hospital* – Sophia Psarra describes Venice as a system that starts to resemble a highly probabilistic 'algorithm', that is, a structure with a small number of rules capable of producing a large number of variations. The rapidly escalating processes of urban development around our big cities share many of the motivations for survival, shelter and trade that brought Venice into existence. Rather than seeing these places as problems to be solved, we need to understand how urban complexity can evolve, as happened from its unprepossessing origins in the marshes of the Venetian lagoon to the 'model city' that endured a thousand years. This book frees Venice from stereotypical representations, revealing its generative capacity to inform potential other 'Venices' for the future.

Atlas of Medieval Europe David Ditchburn, Angus Mackay, 2002-09-11 Covering the

period from the fall of the Roman Empire through to the beginnings of the Renaissance, this is an indispensable volume which brings the complex and colourful history of the Middle Ages to life. Key features: \* geographical coverage extends to the broadest definition of Europe from the Atlantic coast to the Russian steppes \* each map approaches a separate issue or series of events in Medieval history, whilst a commentary locates it in its broader context \* as a body, the maps provide a vivid representation of the development of nations, peoples and social structures. With over 140 maps, expert commentaries and an extensive bibliography, this is the essential reference for those who are striving to understand the fundamental issues of this period.

**The Whispering Sand** Ian Kenworthy, 2009 Annabeth has come to stay with her beachcoming Grandpa, but finds him worried & preoccupied: the beautiful bronze sand of Gull Cove is turning grey & dying, whispering songs with its last gasp. With the help of a biscuit-snitching octopus, Annabeth ventures into the unknown & discovers more about the sea & her Grandpa.

*The Architectural Antiquities of Great Britain* John Britton, 1809

Building Adaptation James Douglas, 2006-08-11 As existing buildings age, nearly half of all construction activity in Britain is related to maintenance, refurbishment and conversions. Building adaptation is an activity that continues to make a significant contribution to the workload of the construction industry. Given its importance to sustainable construction, the proportion of adaptation works in relation to new build is likely to remain substantial for the foreseeable future, especially in the developed parts of the world. Building Adaptation, Second Edition is intended as a primer on the physical

changes that can affect older properties. It demonstrates the general principles, techniques, and processes needed when existing buildings must undergo alteration, conversion, extension, improvement, or refurbishment. The publication of the first edition of Building Adaptation reflected the upsurge in refurbishment work. The book quickly established itself as one of the core texts for building surveying students and others on undergraduate and postgraduate built environment courses. This new edition continues to provide a comprehensive introduction to all the key issues relating to the adaptation of buildings. It deals with any work to a building over and above maintenance to change its capacity, function or performance.

The Georgian Kingdom and Georgian Art Irene Giviashvili, Feyza Akder, 2021-12 A survey of the architecture and history of the Tao-Klarjeti region. This book, comprising the proceedings of a 2014 symposium at Koç University's Vehbi Koç Ankara Studies Research Center, fills an important gap in the research surrounding the historical principality of Tao-Klarjeti. This political entity founded by the Georgian Bagrationis dynasty in the early ninth century covers the modern-day provinces of Artvin, Erzurum (partially), Ardahan in Turkey, and the provinces of Samtskhe-Javakheti and Ajara in Georgia. This volume explores the religious and secular buildings, decor programs, facade articulations, stone reliefs of monastic and Cathedral churches, mason builders, and donors of Tao-Klarjeti's architecture. A particular focus is placed on recent archaeological discoveries in Şavşat Castle and the heritage of manuscripts produced in scriptoriums and literary centers of the region.

The Ephemeral Museum Francis Haskell, 2000-01-01 In this illustrated book, an

eminent art historian examines the intriguing history and significance of the international art exhibition of the Old Master paintings.

Drawing Futures Bob Sheil,Frédéric Migayrou,Luke Pearson,Laura Allen,2016-11-11 Drawing Futures brings together international designers and artists for speculations in contemporary drawing for art and architecture.Despite numerous developments in technological manufacture and computational design that provide new grounds for designers, the act of drawing still plays a central role as a vehicle for speculation. There is a rich and long history of drawing tied to innovations in technology as well as to revolutions in our philosophical understanding of the world. In reflection of a society now underpinned by computational networks and interfaces allowing hitherto unprecedented views of the world, the changing status of the drawing and its representation as a political act demands a platform for reflection and innovation. Drawing Futures will present a compendium of projects, writings and interviews that critically reassess the act of drawing and where its future may lie.Drawing Futures focuses on the discussion of how the field of drawing may expand synchronously alongside technological and computational developments. The book coincides with an international conference of the same name, taking place at The Bartlett School of Architecture, UCL, in November 2016. Bringing together practitioners from many creative fields, the book discusses how drawing is changing in relation to new technologies for the production and dissemination of ideas.

**The Architecture of the City** Aldo Rossi,1984-09-13 Aldo Rossi was a practicing architect and leader of the Italian architectural movement La Tendenza and one of the most influential theorists of the twentieth century. The Architecture of the City is his

major work of architectural and urban theory. In part a protest against functionalism and the Modern Movement, in part an attempt to restore the craft of architecture to its position as the only valid object of architectural study, and in part an analysis of the rules and forms of the city's construction, the book has become immensely popular among architects and design students.

*The Age of Intoxication* Benjamin Breen, 2019-11-22 Eating the flesh of an Egyptian mummy prevents the plague. Distilled poppies reduce melancholy. A Turkish drink called coffee increases alertness. Tobacco cures cancer. Such beliefs circulated in the seventeenth and eighteenth centuries, an era when the term drug encompassed everything from herbs and spices—like nutmeg, cinnamon, and chamomile—to such deadly poisons as lead, mercury, and arsenic. In *The Age of Intoxication*, Benjamin Breen offers a window into a time when drugs were not yet separated into categories—illicit and licit, recreational and medicinal, modern and traditional—and there was no barrier between the drug dealer and the pharmacist. Focusing on the Portuguese colonies in Brazil and Angola and on the imperial capital of Lisbon, Breen examines the process by which novel drugs were located, commodified, and consumed. He then turns his attention to the British Empire, arguing that it owed much of its success in this period to its usurpation of the Portuguese drug networks. From the sickly sweet tobacco that helped finance the Atlantic slave trade to the cannabis that an East Indies merchant sold to the natural philosopher Robert Hooke in one of the earliest European coffeehouses, Breen shows how drugs have been entangled with science and empire from the very beginning. Featuring numerous illuminating anecdotes and a cast of characters that includes merchants, slaves, shamans,

prophets, inquisitors, and alchemists, *The Age of Intoxication* rethinks a history of drugs and the early drug trade that has too often been framed as opposites—between medicinal and recreational, legal and illegal, good and evil. Breen argues that, in order to guide drug policy toward a fairer and more informed course, we first need to understand who and what set the global drug trade in motion.

**Historical Painting Techniques, Materials, and Studio Practice** Arie

Wallert, Erma Hermens, Marja Peek, 1995-08-24 Bridging the fields of conservation, art history, and museum curating, this volume contains the principal papers from an international symposium titled *Historical Painting Techniques, Materials, and Studio Practice* at the University of Leiden in Amsterdam, Netherlands, from June 26 to 29, 1995. The symposium—designed for art historians, conservators, conservation scientists, and museum curators worldwide—was organized by the Department of Art History at the University of Leiden and the Art History Department of the Central Research Laboratory for Objects of Art and Science in Amsterdam. Twenty-five contributors representing museums and conservation institutions throughout the world provide recent research on historical painting techniques, including wall painting and polychrome sculpture. Topics cover the latest art historical research and scientific analyses of original techniques and materials, as well as historical sources, such as medieval treatises and descriptions of painting techniques in historical literature. Chapters include the painting methods of Rembrandt and Vermeer, Dutch 17th-century landscape painting, wall paintings in English churches, Chinese paintings on paper and canvas, and Tibetan thangkas. Color plates and black-and-white photographs illustrate works from the Middle Ages to the 20th century.

*The Medieval City* Norman Pounds, 2005-04-30 An introduction to the life of towns and cities in the medieval period, this book shows how medieval towns grew to become important centers of trade and liberty. Beginning with a look at the Roman Empire's urban legacy, the author delves into urban planning or lack thereof; the urban way of life; the church in the city; city government; urban crafts and urban trade, health, wealth, and welfare; and the city in history. Annotated primary documents like Domesday Book, sketches of street life, and descriptions of fairs and markets bring the period to life, and extended biographical sketches of towns, regions, and city-dwellers provide readers with valuable detail. In addition, 26 maps and illustrations, an annotated bibliography, glossary, and index round out the work. After a long decline in urban life following the fall of the Roman Empire, towns became centers of trade and of liberty during the medieval period. Here, the author describes how, as Europe stabilized after centuries of strife, commerce and the commercial class grew, and urban areas became an important source of revenue into royal coffers. Towns enjoyed various levels of autonomy, and always provided goods and services unavailable in rural areas. Hazards abounded in towns, though. Disease, fire, crime and other hazards raised mortality rates in urban environs. Designed as an introduction to life of towns and cities in the medieval period, eminent historian Norman Pounds brings to life the many pleasures, rewards, and dangers city-dwellers sought and avoided. Beginning with a look at the Roman Empire's urban legacy, Pounds delves into Urban Planning or lack thereof; The Urban Way of Life; The Church in the City; City Government; Urban Crafts and Urban Trade, Health, Wealth, and Welfare; and The City in History. Annotated primary documents like Domesday Book, sketches of street life, and

descriptions of fairs and markets bring the period to life, and extended biographical sketches of towns, regions, and city-dwellers provide readers with valuable detail. In addition, 26 maps and illustrations, an annotated bibliography, glossary, and index round out the work.

**The World of UCL** Negley Harte, John North, Georgina Brewis, 2018-05-21 From its foundation in 1826, UCL embraced a progressive and pioneering spirit. It was the first university in England to admit students regardless of religion and made higher education affordable and accessible to a much broader section of society. It was also effectively the first university to welcome women on equal terms with men. From the outset UCL showed a commitment to innovative ideas and new methods of teaching and research. This book charts the history of UCL from 1826 through to the present day, highlighting its many contributions to society in Britain and around the world. It covers the expansion of the university through the growth in student numbers and institutional mergers. It documents shifts in governance throughout the years and the changing social and economic context in which UCL operated, including challenging periods of reconstruction after two World Wars. Today UCL is one of the powerhouses of research and teaching, and a truly global university. It is currently seventh in the QS World University Rankings. This completely revised and updated edition features a new chapter based on interviews with key individuals at UCL. It comes at a time of ambitious development for UCL with the establishment of an entirely new campus in East London, UCL East, and Provost Michael Arthur's 'UCL 2034' strategy which aims to secure the university's long-term future and commits UCL to delivering global impact.
