Scar Night Alan Campbell, 2007-11-27 Suspended by chains over a seemingly bottomless abyss, the ancient city of Deepgate is home to a young angel, an assassin, and a psychotic murderer hungry for revenge—or redemption. But soon a shocking betrayal will unite all three in a desperate quest. . . . The last of his line, Dill is descended from legendary Battle-archons who once defended the city. Forbidden to fly and untrained even to wield the great sword inherited from his forebears, he has become a figurehead for a dying tradition. Now he lives a sheltered existence in one of Deepgate's crumbling temple spires under the watchful eye of the Presbyter who rules the city. Spine assassin Rachel Hael has better things to do than oversee the Presbyter's angel. Each dark moon she must fight for her life among the city chains, hunting an immortal predator with a taste for blood. But when a traitor brings enemies to Deepgate's doorstep, Dill and Rachel are forced into an uneasy alliance with the city's oldest and most dangerous foe. They must journey down into the uncharted chasm to save their sprawling metropolis—and themselves—from annihilation. Once they descend however, they learn that what lies below is far more sinister than what they've been taught to expect.

Virtual Heritage Erik Malcolm Champion, 2021-07-22 Virtual heritage has been explained as virtual reality applied to cultural heritage, but this definition only scratches the surface of the fascinating applications, tools and challenges of this fast-changing interdisciplinary field. This book provides an accessible but concise edited coverage of the main topics, tools

and issues in virtual heritage. Leading international scholars have provided chapters to explain current issues in accuracy and precision; challenges in adopting advanced animation techniques; shows how archaeological learning can be developed in Minecraft; they propose mixed reality is conceptual rather than just technical; they explore how useful Linked Open Data can be for art history; explain how accessible photogrammetry can be but also ethical and practical issues for applying at scale; provide insight into how to provide interaction in museums involving the wider public; and describe issues in evaluating virtual heritage projects not often addressed even in scholarly papers. The book will be of particular interest to students and scholars in museum studies, digital archaeology, heritage studies, architectural history and modelling, virtual environments.

Architects of Buddhist Leisure Justin Thomas McDaniel, 2018-04-30 Buddhism, often described as an austere religion that condemns desire, promotes denial, and idealizes the contemplative life, actually has a thriving leisure culture in Asia. Creative religious improvisations designed by Buddhists have been produced both within and outside of monasteries across the region—in Nepal, Japan, Korea, Macau, Hong Kong, Singapore, Laos, Thailand, and Vietnam. Justin McDaniel looks at the growth of Asia's culture of Buddhist

leisure—what he calls “socially disengaged Buddhism”—through a study of architects responsible for monuments, museums, amusement parks, and other sites. In conversation with noted theorists of material and visual culture and anthropologists of art, McDaniel argues that such sites highlight the importance of public, leisure, and spectacle culture from a Buddhist perspective and illustrate how “secular” and “religious,” “public” and “private,” are in many ways false binaries. Moreover, places like Lek Wiriyaphan’s Sanctuary of Truth in Thailand, Suối Tiên Amusement Park in Saigon, and Shi Fa Zhao’s multilevel museum/ritual space/tea house in Singapore reflect a growing Buddhist ecumenism built through repetitive affective encounters instead of didactic sermons and sectarian developments. They present different Buddhist traditions, images, and aesthetic expressions as united but not uniform, collected but not concise: Together they form a gathering, not a movement. Despite the ingenuity of lay and ordained visionaries like Wiriyaphan and Zhao and their colleagues Kenzo Tange, Chan-soo Park, Tadao Ando, and others discussed in this book, creators of Buddhist leisure sites often face problems along the way. Parks and museums are complex adaptive systems that are changed and influenced by budgets, available materials, local and global economic conditions, and visitors. Architects must often compromise and settle at local optima, and no matter what they intend, their buildings will develop lives of their own. Provocative and theoretically innovative, *Architects of Buddhist Leisure* asks readers to question the very category of “religious” architecture. It challenges current methodological approaches in religious studies and speaks to a broad audience interested in modern art, architecture, religion, anthropology, and material culture.

Drawing Futures Bob Sheil,Frédéric Migayrou,Luke Pearson,Laura Allen,2016-11-11 Drawing Futures brings together international designers and artists for speculations in contemporary drawing for art and architecture.Despite numerous developments in technological manufacture and computational design that provide new grounds for designers, the act of drawing still plays a central role as a vehicle for speculation. There is a rich and long history of drawing tied to innovations in technology as well as to revolutions in our philosophical understanding of the world. In reflection of a society now underpinned by computational networks and interfaces allowing hitherto unprecedented views of the world, the changing status of the drawing and its representation as a political act demands a platform for reflection and innovation. Drawing Futures will present a compendium of projects, writings and interviews that critically reassess the act of drawing and where its future may lie.Drawing Futures focuses on the discussion of how the field of drawing may expand synchronously alongside technological and computational developments. The book coincides with an international conference of the same name, taking place at The Bartlett School of Architecture, UCL, in November 2016. Bringing together practitioners from many creative fields, the book discusses how drawing is changing in relation to new technologies for the production and dissemination of ideas.

The Disappearing Spoon Sam Kean,2010-07-12 From New York Times bestselling author Sam Kean comes incredible stories of science, history, finance, mythology, the arts, medicine, and more, as told by the Periodic Table. Why did Gandhi hate iodine (I, 53)? How did radium (Ra, 88) nearly ruin Marie Curie's reputation? And why is gallium (Ga, 31) the go-to element for laboratory pranksters?* The Periodic Table is a crowning scientific

achievement, but it's also a treasure trove of adventure, betrayal, and obsession. These fascinating tales follow every element on the table as they play out their parts in human history, and in the lives of the (frequently) mad scientists who discovered them. THE DISAPPEARING SPOON masterfully fuses science with the classic lore of invention, investigation, and discovery-- from the Big Bang through the end of time. *Though solid at room temperature, gallium is a moldable metal that melts at 84 degrees Fahrenheit. A classic science prank is to mold gallium spoons, serve them with tea, and watch guests recoil as their utensils disappear.

Tales of Britain Jem Roberts, 2019-01-17 77 timeless tales from up and down the length of Great Britain - Wales, Scotland, Kernow, England and the Isles - have been retold for the 21st century by curious storyteller Brother Bernard, with a tourist guide to the real location of each folktale included. This road atlas of myth and mischief allows us to visit famed heroes King Arthur, Merlin, Robin Hood, Lady Godiva, Macbeth, Dick Whittington and Jack, but also those who should be more celebrated, like Molly Whuppie, Bran the Blessed, Bladud, Taliesin and Tom Thumb. Since Britain became an island eight millennia ago, generations of immigrants have made their home here in Albion,

creating their own stories, which have become part of the richly stocked treasury of British folklore. Some are strange, some are sad, some are exciting, some are scary, many are silly, and at least two are totally daft. Brother Bernard retells these restored tales with devotion to the ancient legends, but with a fresh eye and added anarchic vim to be enjoyed anew.

Empire of Magic Geraldine Heng, 2003 *Empire of Magic* offers a genesis and genealogy for medieval romance and the King Arthur legend through the history of Europe's encounters with the East in crusades, travel, missionizing, and empire formation. It also produces definitions of race and nation for the medieval period and posits that the Middle Ages and medieval fantasies of race and religion have recently returned. Drawing on feminist and gender theory, as well as cultural analyses of race, class, and colonialism, this provocative book revises our understanding of the beginnings of the nine hundred-year-old cultural genre we call romance, as well as the King Arthur legend. Geraldine Heng argues that romance arose in the twelfth century as a cultural response to the trauma and horror of taboo acts--in particular the cannibalism committed by crusaders on the bodies of Muslim enemies in Syria during the First Crusade. From such encounters with the East, Heng suggests, sprang the fantastical episodes featuring King Arthur in Geoffrey of Monmouth's chronicle *The History of the Kings of England*, a work where history and fantasy collide and merge, each into the other, inventing crucial new examples and models for romances to come. After locating the rise of romance and Arthurian legend in the contact zones of East and West, Heng demonstrates the adaptability of romance and its key role in the genesis of an English national identity. Discussing Jews, women, children, and sexuality

in works like the romance of Richard Lionheart, stories of the saintly Constance, Arthurian chivalric literature, the legend of Prester John, and travel narratives, Heng shows how fantasy enabled audiences to work through issues of communal identity, race, color, class and alternative sexualities in socially sanctioned and safe modes of cultural discussion in which pleasure, not anxiety, was paramount. Romance also engaged with the threat of modernity in the late medieval period, as economic, social, and technological transformations occurred and awareness grew of a vastly enlarged world beyond Europe, one encompassing India, China, and Africa. Finally, Heng posits, romance locates England and Europe within an empire of magic and knowledge that surveys the world and makes it intelligible--usable--for the future. Empire of Magic is expansive in scope, spanning the eleventh to the fifteenth centuries, and detailed in coverage, examining various types of romance--historical, national, popular, chivalric, family, and travel romances, among others--to see how cultural fantasy responds to changing crises, pressures, and demands in a number of different ways. Boldly controversial, theoretically sophisticated, and historically rooted, Empire of Magic is a dramatic restaging of the role romance played in the culture of a period and world in ways that suggest how cultural fantasy still functions for us today.

The Mongol Invasions of Japan 1274 and 1281 Stephen Turnbull, 2013-01-20
From his seat in Xanadu, the great Mongol Emperor of China, Kubla Khan, had long plotted an invasion of Japan. However, it was only with the acquisition of Korea, that the Khan gained the maritime resources necessary for such a major amphibious operation. Written by expert Stephen Turnbull, this book tells the story of the two Mongol invasions of Japan against the noble Samurai. Using detailed maps, illustrations, and newly commissioned artwork, Turnbull charts the history of these great campaigns, which included numerous bloody raids on the Japanese islands, and ended with the famous kami kaze, the divine wind, that destroyed the Mongol fleet and would live in the Japanese consciousness and shape their military thinking for centuries to come.

Cities Made of Boundaries Benjamin N. Vis, 2018-09-17
Cities Made of Boundaries presents the theoretical foundation and concepts for a new social scientific urban morphological mapping method, Boundary Line Type (BLT) Mapping. Its vantage is a plea to establish a frame of reference for radically comparative urban studies positioned between geography and archaeology. Based in multidisciplinary social and spatial theory, a critical realist understanding of the boundaries that compose built space is operationalised by a mapping practice utilising Geographical Information Systems (GIS). Benjamin N. Vis gives a precise account of how BLT Mapping can be applied to detailed historical, reconstructed, contemporary, and archaeological urban plans, exemplified by sixteenth to twenty-first century

Winchester (UK) and Classic Maya Chunchucmil (Mexico). This account demonstrates how the functional and experiential difference between compact western and tropical dispersed cities can be explored. The methodological development of *Cities Made of Boundaries* will appeal to readers interested in the comparative social analysis of built environments, and those seeking to expand the evidence-base of design options to structure urban life and development.

The Onion Book of Known Knowledge The Onion, 2012-10-23 Are you a witless cretin with no reason to live? Would you like to know more about every piece of knowledge ever? Do you have cash? Then congratulations, because just in time for the death of the print industry as we know it comes the final book ever published, and the only one you will ever need: The Onion's compendium of all things known. Mirror of the World Julian Bell, 2010-05-25 "Exuberant, astute, and splendidly illustrated history of world art . . . draws fascinating parallels between artistic developments in Western and non-Western art."—Publishers Weekly In this beautifully written story of art, Julian Bell tells a vivid and compelling history of human artistic achievements, from prehistoric stone carvings to the latest video installations. Bell, himself a painter, uses a variety of objects to reveal how art is a product of our shared experience and how, like a mirror, it can reflect the human condition. With hundreds of illustrations and a uniquely global perspective, Bell juxtaposes examples that challenge and enlighten the reader: dancing bronze figures from southern India, Romanesque sculptures, Baroque ceilings, and jewel-like Persian manuscripts are discussed side by side. With an insider's knowledge and an unerring touch, Bell weaves these diverse strands into an invaluable introduction to the wider history of world art.
