Make This Medieval Castle Iain Ashman,2009-08 You only need a tube of glue and a pair of scissors or a craft knife to turn this book into a superb model of a 14th century castle. The model is packed with accurate historical details, including over 40 cut-out figures and props to help you bring the castle to life.--back cover.

Castle David Macaulay,1977 Text and detailed drawings follow the planning and construction of a typical castle and adjoining town in thirteenth-century Wales.--Title page verso.

Fortified Settlements in Early Medieval Europe Neil Christie,Hajnalka Herold,2016-08-31 Twenty-three contributions by leading archaeologists from across Europe explore the varied forms, functions and significances of fortified settlements in the 8th to 10th centuries AD. These could be sites of strongly martial nature, upland retreats, monastic enclosures, rural seats, island bases, or urban nuclei. But they were all expressions of control - of states, frontiers, lands, materials, communities - and ones defined by walls, ramparts or enclosing banks. Papers run from Irish cashels to Welsh and Pictish strongholds, Saxon burhs, Viking fortresses, Byzantine castra, Carolingian creations, Venetian barricades, Slavic strongholds, and Bulgarian central places, and coverage extends fully from north-west Europe, to central Europe, the northern Mediterranean and the Black Sea. Strongly informed by recent fieldwork and excavations, but drawing also where available on the documentary record, this important collection provides fully up-to-date reviews and analyses of the archaeologies of the distinctive settlement forms that characterized Europe in the Early Middle Ages.

Atlas of Medieval Europe David Ditchburn,Angus Mackay,2002-09-11 Covering the period from the fall of the Roman Empire through to the beginnings of the Renaissance, this is an indispensable volume which brings the complex and colourful history of the Middle Ages to life. Key features: * geographical coverage extends to the broadest definition of Europe from the Atlantic coast to the Russian steppes * each map approaches a separate issue or series of events in Medieval history, whilst a commentary locates it in its broader context * as a body, the maps provide a vivid representation of the development of nations, peoples and social structures. With over 140 maps, expert commentaries and an extensive bibliography, this is the essential reference for those who are striving to understand the fundamental issues of this period.

Boats of the World Sean McGrail,2004 Maritime archaeology, the study of man's early encounter with the rivers and seas of the world, only came to the fore in the last decades of the twentieth century, long after its parent discipline, terrestrial archaeology, had been established. Yet there were seamen long before there were farmers, navigators before there were potters, and boatbuilders before there were wainwrights. In this book Professor McGrail attempts to correct some of the imbalance in our knowledge of the past by presenting the evidence for the building and use of early water transport: rafts, boats, and ships.

Talking to Strangers Malcolm Gladwell,2019-09-10 Malcolm Gladwell, host of the podcast Revisionist History and author of the #1 New York Times bestseller *Outliers*, offers a powerful examination of our interactions with strangers and why they often go wrong—now with a new afterword by the author. A Best Book of the Year: The Financial Times, Bloomberg, Chicago Tribune, and Detroit Free Press How did Fidel Castro fool the CIA for a generation? Why did Neville Chamberlain think he could trust Adolf Hitler? Why are campus sexual assaults on the rise? Do television sitcoms teach us something about the way we relate to one another that isn't true? Talking to Strangers is a classically Gladwellian intellectual adventure, a challenging and controversial excursion through history, psychology, and scandals taken straight from the news. He revisits the deceptions of Bernie Madoff, the trial of Amanda Knox, the suicide of Sylvia Plath, the Jerry Sandusky pedophilia scandal at Penn State University, and the death of Sandra Bland—throwing our understanding of these and other stories into doubt. Something is very wrong, Gladwell argues, with the tools and strategies we use to make sense of people we don't know. And because we don't know how to talk to strangers, we are inviting conflict and misunderstanding in ways that have a profound effect on our lives and our world. In his first book since his #1 bestseller *David and Goliath*, Malcolm Gladwell has written a gripping guidebook for troubled times.

Earthbag Building Kaki Hunter,Donald Kiffmeyer,2004-11-19 The only comprehensive, illustrated, step-by-step guide to building with earthbags. Over seventy percent of Americans cannot afford to own a code-enforced, contractor-built home. This has led to widespread interest in using natural materials-straw, cob, and earth-for building homes and other buildings that are inexpensive, and that rely largely on labor rather than expensive and often environmentally-damaging outsourced materials. Earthbag Building is the first comprehensive guide to all the tools, tricks, and techniques for building with bags filled with earth-or earthbags. Having been introduced to sandbag construction by the renowned Nader Khalili in 1993, the authors developed this Flexible Form Rammed Earth Technique over the last decade. A reliable method for constructing homes, outbuildings, garden walls and much more, this enduring, tree-free architecture can also be used to create arched and domed structures of great beauty-in any region, and at home, in developing countries, or in emergency relief work. This profusely illustrated guide first discusses the many merits of earthbag construction, and then leads the reader through the key elements of an earthbag building: Special design considerations Foundations, walls, and floors Electrical, plumbing, and shelving Lintels, windows and door installations Roofs, arches and domes Exterior and interior plasters. With dedicated sections on costs, making your own specialized tools, and building code considerations, as well as a complete resources guide, Earthbag Building is the long-awaited, definitive guide to this uniquely pleasing construction style. Medieval Buda in Context ,2016-06-10 The twenty-one articles of this volume discuss the character and development of Buda and its surroundings between the thirteenth and the sixteenth centuries, particularly its role as a royal center and capital city of the medieval Kingdom of Hungary.

Anglo-Norman Castles Robert Liddiard,2003 Wide-ranging studies offer an in-depth analysis of castle-building 11th - 12th centuries and place castles within their broader social and political context. The castles of the eleventh and twelfth centuries remain among the most visible symbols of the Anglo-Norman world. This collection brings together for the first time some of the most significant articles in castle studies, with contributions from experts in history, archaeology and historic buildings. Castles remain a controversial topic of academic debate and here equal weight is given to seminal articles that have defined the study of the subject while at the same time emphasising newer approaches to the fortresses of the Anglo-Norman aristocracy. The studies in this volume range from discussions of the residential and military role of the castle to architectural symbolism and royal attitudes to baronial fortification. The result is a survey that offers an in-depth analysis of castle-building during the eleventh and twelfth centuries but which also places Anglo-Norman castles within their broader social, architectural and political context. Confessions of an Economic Hit Man John Perkins,2004-11-09 Perkins, a former chief economist at a Boston strategic-consulting firm, confesses he was an economic hit man for 10 years, helping U.S. intelligence agencies and multinationals cajole and blackmail foreign leaders into serving U.S. foreign policy and awarding lucrative contracts to American business.

Competing Visions Robert Cherny,Gretchen Lemke-Santangelo,Richard Griswold del Castillo,2014 With a strong social emphasis and succinct narrative, COMPETING VISIONS: A HISTORY OF CALIFORNIA, 2E chronicles the stories of people who have had an impact on the state's history while presenting California as a hub of competing economic, social, and political visions. It highlights the state's cultural diversity and explicitly compares it to other Western states, the nation, and the world--illustrating the national and

international significance of California's history. Its chronological organization and thematic approach enables readers to keep track of events and fully understand their significance. Telling the full story, the text concludes by discussing such current events as immigration and demographic changes, the Occupy Movement, energy challenges, and more.

The Unbroken Thread Kathryn Klein,1997-01-01 Housed in the former 16th-century convent of Santo Domingo church, now the Regional Museum of Oaxaca, Mexico, is an important collection of textiles representing the area's indigenous cultures. The collection includes a wealth of exquisitely made traditional weavings, many that are now considered rare. The Unbroken Thread: Conserving the Textile Traditions of Oaxaca details a joint project of the Getty Conservation Institute and the National Institute of Anthropology and History (INAH) of Mexico to conserve the collection and to document current use of textile traditions in daily life and ceremony. The book contains 145 color photographs of the valuable textiles in the collection, as well as images of local weavers and project participants at work. Subjects include anthropological research, ancient and present-day weaving techniques, analyses of natural dyestuffs, and discussions of the ethical and practical considerations involved in working in Latin America to conserve the materials and practices of living cultures.

American Holocaust David E. Stannard,1993-11-18 For four hundred years--from the first Spanish assaults against the Arawak people of Hispaniola in the 1490s to the U.S. Army's massacre of Sioux Indians at Wounded Knee in the 1890s--the indigenous inhabitants of North and South America endured an unending firestorm of violence. During that time the native population of the Western Hemisphere declined by as many as 100 million people. Indeed, as historian David E. Stannard argues in this stunning new book, the European and white American destruction of the native peoples of the Americas was the most massive act of genocide in the history of the world. Stannard begins with a portrait of the enormous richness and diversity of life in the Americas prior to Columbus's fateful voyage in 1492. He then follows the path of genocide from the Indies to Mexico and Central and South America, then north to Florida, Virginia, and New England, and finally out across the Great Plains and Southwest to California and the North Pacific Coast. Stannard reveals that wherever Europeans or white Americans went, the native people were caught between imported plagues and barbarous atrocities, typically resulting in the annihilation of 95 percent of their populations. What kind of people, he asks, do such horrendous things to others? His highly provocative answer: Christians. Digging deeply into ancient European and Christian attitudes toward sex, race, and war, he finds the cultural ground well prepared by the end of the Middle Ages for the centuries-long genocide campaign that Europeans and their descendants launched--and in places continue to wage--against the New World's original inhabitants. Advancing a thesis that is sure to create much controversy, Stannard contends that the perpetrators of the American Holocaust drew on the same ideological wellspring as did the later architects of the Nazi Holocaust. It is an ideology that remains dangerously alive today, he adds, and one that in recent years has surfaced in American justifications for large-scale military intervention in Southeast Asia and the Middle East. At once sweeping in scope and meticulously detailed, American Holocaust is a work of impassioned scholarship that is certain to ignite intense historical and moral debate.

Applied Strength of Materials for Engineering Technology Barry Dupen,2018 This algebra-based text is designed specifically for Engineering Technology students, using both SI and US Customary units. All example problems are fully worked out with unit conversions. Unlike most textbooks, this one is updated each semester using student comments, with an average of 80 changes per edition.

Open Veins of Latin America Eduardo Galeano,1997 [In this book, the author's] analysis of the effects and causes of capitalist underdevelopment in Latin America present [an] account of ... Latin American history. [The author] shows how foreign companies reaped huge profits through their operations in Latin America. He explains the politics of the Latin American bourgeoisies and their subservience to foreign powers, and how they interacted to create increasingly unequal capitalist societies in Latin America.-Back cover.

The American Yawp Joseph L. Locke,Ben Wright,2019-01-22 I too am not a bit tamed—I too am untranslatable / I sound my barbaric yawp over the roofs of the world.—Walt Whitman, Song of Myself, Leaves of Grass The American Yawp is a free, online, collaboratively built American history textbook. Over 300 historians joined together to create the book they wanted for their own students—an accessible, synthetic narrative that reflects the best of recent historical scholarship and provides a jumping-off point for discussions in the U.S. history classroom and beyond. Long before Whitman and long after, Americans have sung something collectively amid the deafening roar of their many individual voices. The Yawp highlights the dynamism and conflict inherent in the history of the United States, while also looking for the common threads that help us make sense of the past. Without losing sight of politics and power, The American Yawp incorporates transnational perspectives, integrates diverse voices, recovers narratives of resistance, and explores the complex process of cultural creation. It looks for America in crowded slave cabins, bustling markets, congested tenements, and marbled halls. It navigates between maternity wards, prisons, streets, bars, and boardrooms. The fully peer-reviewed edition of The American Yawp will be available in two print volumes designed for the U.S. history survey. Volume I begins with the indigenous people who called the Americas home before chronicling the collision of Native Americans, Europeans, and Africans. The American Yawp traces the development of colonial society in the context of the larger Atlantic World and investigates the origins and ruptures of slavery, the American Revolution, and the new nation's development and rebirth through the Civil War and Reconstruction. Rather than asserting a fixed narrative of American progress, The American Yawp gives students a starting point for asking their own questions about how the past informs the problems and opportunities that we confront today.

Why Did Europe Conquer the World? Philip T. Hoffman,2017-01-24 The startling economic and political answers behind Europe's historical dominance Between 1492 and 1914, Europeans conquered 84 percent of the globe. But why did Europe establish global dominance, when for centuries the Chinese, Japanese, Ottomans, and South Asians were far more advanced? In *Why Did Europe Conquer the World?*, Philip Hoffman demonstrates that conventional explanations—such as geography, epidemic disease, and the Industrial Revolution—fail to provide answers. Arguing instead for the pivotal role of economic and political history, Hoffman shows that if certain variables had been different, Europe would have been eclipsed, and another power could have become master of the world. Hoffman sheds light on the two millennia of economic, political, and historical changes that set European states on a distinctive path of development, military rivalry, and war. This resulted in astonishingly rapid growth in Europe's military sector, and produced an insurmountable lead in gunpowder technology. The consequences determined which states established colonial empires or ran the slave trade, and even which economies were the first to industrialize. Debunking traditional arguments, *Why Did Europe Conquer the World?* reveals the startling reasons behind Europe's historic global supremacy.

Articulating the Hijāba: Cultural Patronage and Political Legitimacy in al-Andalus Mariam Rosser-Owen,2021-12-20 In *Articulating the Hijāba*, Mariam Rosser-Owen analyses for the first time the artistic and cultural patronage of the 'Amirid regents of the last Cordoban Umayyad caliph, Hisham II, a period rarely covered in the historiography of al-Andalus. Al-Mansur, the founder of this dynasty, is usually considered a usurper of caliphal authority, who pursued military victory at the expense of the transcendental achievements of the first two caliphs. But he also commissioned a vast extension to the Great Mosque of Cordoba, founded a palatine city, conducted skilled diplomatic relations, patronised a circle of court poets, and owned some of the most spectacular objects to survive from al-Andalus, in ivory and marble. This study presents the evidence for a reconsideration of this period.

Thinking with Things Esther Pasztory,2005-08-01 At its heart, Pasztory's thesis is simple and yet profound. She asserts that

humans create things (some of which modern Western society chooses to call art) in order to work out our ideas - that is, we literally think with things. Pasztory draws on examples from many societies to argue that the art-making impulse is primarily cognitive and only secondarily aesthetic. She demonstrates that art always reflects the specific social context in which it is created, and that as societies become more complex, their art becomes more rarefied.--Jacket.
