Original Grin Ron English, 2019-07-16 Through his highly subversive art Ron English (b. 1959) has bombed the global landscape with striking and often unsettling imagery. He coined the term POPaganda to describe his signature and darkly satirical renderings of corporate branding icons. Ranging from superhero mythology to pillars of art history, his work is populated with a vast and constantly growing arsenal of original characters such as MC Supersized, the obese fast-food mascot featured in the hit movie *Supersize Me*; and Abraham Obama, which fused America's 16th and 44th Presidents, an image that was posited by the media as having directly impacted the 2008 election. His cameo on *The Simpsons* secured his position as America's premier pop iconoclast. This book is the first complete retrospective of English's work, compiling his paintings, illustrations, toys, sculpture, street art, and agit-pop. Additionally, it contains a lengthy and

comprehensive interview with the artist conducted exclusively for this publication.

From Cave Man to Cave Martian Manfred "Dutch" von Ehrenfried, 2019-04-05 This book explores the practicality of using the existing subsurface geology on the Moon and Mars for protection against radiation, thermal extremes, micrometeorites and dust storms rather than building surface habitats at great expense at least for those first few missions. It encourages NASA to plan a precursor mission using this concept and employ a "Short Stay" Opposition Class mission to Mars as the first mission rather than the "Long Stay" concept requiring a mission that is too long, too dangerous and too costly for man's first missions to Mars. Included in these pages is a short history on the uses of caves by early humans over great periods of time. It then describes the ongoing efforts to research caves, pits, tunnels, lava tubes, skylights and the associated technologies that pertain to potential lunar and Mars exploration and habitation. It describes evidence for existing caves and lava tubes on both the Moon and Mars. The work of noted scientists, technologists and roboticists are referenced and described. This ongoing work is more extensive than one would think and is directly applicable to longer term habitation and exploration of the Moon and Mars. Emphasis is also given to the operational aspects of working and living in lunar and Martian caves and lava tubes.

Dragon Age: Hard in Hightown Varric Tethras, Mary Kirby, 2018-07-31 Prolific dwarven author and heroic companion of the Dragon Age games, Varric Tethras brings us the collected edition of his breakthrough crime-noir drama, *Hard in Hightown* (with help from his trusted human confidante, Mary Kirby)! This volume is beautifully illustrated by Stefano Martino, Álvaro Sarraseca, Andres Ponce, and Ricardo German Ponce Torres, with a painted cover by E.M. Gist! Twenty years of patrols have chiseled each and every stone of the Kirkwall streets into city guardsmen *Donnen Brennokovic*. Weary and weathered, *Donnen* is

paired with a recruit so green he might as well have leaves growing out of his armor. When the mismatched pair discover a dead magistrate bleeding out on the flagstones, they're caught up in a clash between a shadowy organization known only as the Executors and a secretive group of Chantry agents--all over some ancient artifact. This is a prose novel featuring 24 black And white full page images.

Polyhedra Pastimes Jill Britton,2001 Did you ever think that you would be building kites with your math class? How about using bubbles to teach your middle school students? Now you can do both of these and more!

Achtung-Panzer! Heinz Guderian,1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

Oddjobs Heide Goody,Iain Grant,2016-06-12 It's the end of the world as we know it, but someone still needs to do the paperwork. Incomprehensible horrors from beyond are going to devour our world but that's no excuse to get all emotional about it. Morag Murray works for the secret government organisation responsible for making sure the apocalypse goes as smoothly and as quietly as possible. In her first week on the job, Morag has to

hunt down a man-eating starfish, solve a supernatural murder and, if she's got time, prevent her own inevitable death. The first book in a new comedy series by the creators of 'Clovenhoof', Oddjobs is a sideswipe at the world of work and a fantastical adventure featuring amphibian wannabe gangstas, mad old cat ladies, ancient gods, apocalyptic scrabble, fish porn, telepathic curry and, possibly, the end of the world before the weekend.

The Green Wiccan Book of Shadows Silja,2011-09-08

Traditionally, the Book of Shadows is a High Priestess's way of handing on her collection of spells, rituals and magical tips and tricks to her coven members. Modern-day witches, by necessity or choice, often practise alone without access to this invaluable knowledge—and this is where this lavishly illustrated compendium comes in. Celtic Wiccan High Priestess Silja covers the basic and intermediate levels of magic for solitary witches. She shares a wide-ranging array of spells that have been successful for her—not least how to attract more love, money and luck into your life. With an easy to difficult rating system, she makes it simple for anyone to learn basic spells and then progress. Silja shares meditations—from energy-raising exercises to vision quests and guided meditations you can do with friends—and shows you why rituals are not just for coven use. Discover how to practise rituals alone to honour the seasons, say thanks to the deities for a spell that worked or send healing energy to a friend in need. Finally, once you have absorbed Silja's wisdom and knowledge, you can begin personalizing your magic and writing your own spells.
