Rocket and Spacecraft Propulsion Martin J. L. Turner, 2006-08-29 The revised edition of this practical, hands-on book discusses the launch vehicles in use today throughout the world, and includes the latest details on advanced systems being developed, such as electric and nuclear propulsion. The author covers the fundamentals, from the basic principles of rocket propulsion and vehicle dynamics through the theory and practice of liquid and solid propellant motors, to new and future developments. He provides a serious exposition of the principles and practice of rocket propulsion, from the point of view of the user who is not an engineering specialist.

The F.A.T. Manual Geraldine Juárez, 2013 In more than five years of activity, the Free Art and Technology Lab produced an impressive series of projects, all developed with open source software, shared online and documented in a way that allows everybody to copy, improve, abuse or simply use them. This approach situates F.A.T. Lab in a long tradition of DIY, processual, sharable artistic practices based on instructionals, and reveals a democratic idea of art where Fluxus scores meet hacker culture (and rap music). The F.A.T. Manual is a selection of more than 100 projects, done in the belief that printing these bits on paper will allow them to spread in a different way, infiltrate other contexts, and germinate. An archive, a catalogue, a user manual and a software handbook. F.A.T. Lab is an organization dedicated to enriching the public domain through the research and development of creative technologies and media. Co-produced by Link Editions and MU in collaboration with XPO Gallery, Paris.

Proceedings of the 13th Reinventing Space Conference Scott Hatton, 2018-04-28 Reinventing Space is the largest global conference and exhibition for one of the space industry's fastest growing sectors. Over its 82-year history, the British Interplanetary Society has acted as a forum for new and innovative ideas and developments in astronautics, low-cost access and utilization of space. These conference proceedings reflect the work done at the 13th Reinventing Space Conference, the second biggest space event in the UK during 2015. The global economic climate is creating demand to reduce expenditure, leading to new challenges and opportunities in the world's space industry. The need to create more responsive systems and launchers that are capable of delivering to space quickly, cheaply and reliably has never been more vital. This collection from RIspace brings together industry, agency, government, financiers, academia and end users. It focuses on the commercialization of space and addresses a range of topics including low-cost launch opportunities, the rebirth of constellations, beyond LEO activities and novel technologies. These papers encourage and promote forward-thinking ideas and concepts for the future exploration and utilization of space. The proceedings address: • New ways of doing business in space – how do we make money on affordable and responsive space missions? • Tactical space systems – how do we best serve the needs of defense missions; civilian missions; the needs of emergency responders? • Interplanetary missions – can we use new technology to explore the Solar System at dramatically lower cost? • What are the methods, processes, and technologies that we can use to make major reductions in the cost of space missions? • New application areas for low-cost space systems – which ones can take advantage of newer, much lower-cost systems? • How do we educate and motivate the coming generation, without whom there won't be a space industry?

Twelve Years a Slave Solomon Northup, 2024-01-04 Filmatized in 2013 and the official recipient of three Oscars, Solomon Northup's powerful slave narrative 'Twelve Years a Slave' depicts Northup's life as he is sold into slavery after having spent 32 years of his life living as a free man in New York. Working as a travelling musician, Northup goes to Washington D.C, where he is kidnapped, sent to New Orleans, and sold to a planter to suffer the relentless and brutal life of a slave. After a dozen years, Northup escapes to return to his family and pulls no punches, as he describes his fate and that of so many other black people at the time. It is a harrowing but vitally important book, even today. For further reading on this subject, try 'Uncle Tom's Cabin' by Harriet Beecher Stowe. Solomon Northup (c.1807-c.1875) was an American abolitionist and writer, best remembered for his powerful race memoir 'Twelve Years a Slave'. At the age of 32, when he was a married farmer, father-of-three, violinist and free-born man, he was kidnapped in Washington D.C and shipped to New Orleans, sold to a planter and enslaved for a dozen years. When he gained his freedom, he wrote his famous memoir and spent some years lecturing across the US, on behalf of the abolitionist movement. 'Twelve Years a Slave' was published a year after 'Uncle Tom's Cabin' by Harriet Beecher Stowe and built on the anti-slavery momentum it had developed. Northup's final years are something of a mystery, though it is thought that he struggled to cope with family life after being freed.

Music's Meanings Philip Tagg, 2013-03-03 "In addressing a pedagogical problem —how to talk about music as if it meant something other than itself – Philip Tagg raises fundamental questions about western epistemology as well as some of its strategically mystifying discourses. With an unsurpassed authority in the field, the author draws on a lifetime of critical reflection on the experience of music, and how to communicate it without resorting to exclusionary jargon. This is a must-read book for anyone interested in music, for whatever reason: students, teachers, researchers, performers, industry and policy stakeholders, or just to be able to talk intelligently about the musical experience." (Prof. Bruce Johnson)
