The Gospel in Genesis Martyn Lloyd-Jones, 2009-10-07 In this series of never-before-published sermons, beloved teacher Martyn Lloyd-Jones walks readers through the early chapters of Genesis. The Gospel in Genesis starts with the fall of man and ends with the call of Abram as it examines portions of chapters 3-12. Along the way Lloyd-Jones talks of serpents and sin, of the Word of God and the Babel of man. But the destination of The Gospel in Genesis is clear: readers will be moved from fig leaves in the garden to faith in the gospel. Thus Lloyd-Jones preaches the gospel of Jesus Christ from the pages of Genesis. These nine sermons will snap nonbelievers out of their apathy toward God and will embolden believers to share the only gospel that offers answers to life's biggest questions.

Media Convergence in Japan Various, 2016-05-20 The Japanese media system is in a state of flux as a result of shifts in the digital economy, new

audience metrics and declining print and broadcast revenues. This volume examines issues of media consolidation, participatory culture and franchising in contemporary Japan, and explores how the Japanese media system is adapting to change in light of its tendency toward prioritizing domestic markets, restricting access and co-opting fan movements. The chapters consider conflict and negotiations within the Japanese media system, structural transformations, emerging modes of producer and audience relations and potential sites of innovation.

Affective Health and Masculinities in South Africa Hans Reihling, 2020-04-03 Affective Health and Masculinities in South Africa explores how different masculinities modulate substance use, interpersonal violence, suicidality, and AIDS as well as recovery cross-culturally. With a focus on three male protagonists living in very distinct urban areas of Cape Town, this comparative ethnography shows that men's struggles to become invulnerable increase vulnerability. Through an analysis of masculinities as social assemblages, the study shows how affective health problems are tied to modern individualism rather than African 'tradition' that has become a cliché in Eurocentric gender studies. Affective health is conceptualized as a balancing act between autonomy and connectivity that after colonialism and apartheid has become compromised through the imperative of self-reliance. This book provides a rare perspective on young men's vulnerability in everyday life that may affect the reader and spark discussion about how masculinities in

relationships shape physical and psychological health. Moreover, it shows how men change in the face of distress in ways that may look different than global health and gender-transformative approaches envision. Thick descriptions of actual events over the life course make the study accessible to both graduate and undergraduate students in the social sciences. Contributing to current debates on mental health and masculinity, this volume will be of interest to scholars from various disciplines including anthropology, gender studies, African studies, psychology, and global health.

Aoyagi, 2020-03-17 Since the late 1960s a ubiquitous feature of popular culture in Japan has been the idol, an attractive young actor, male or female, packaged and promoted as an adolescent role model and exploited by the entertainment, fashion, cosmetic, and publishing industries to market trendy products. This book offers ethnographic case studies regarding the symbolic qualities of idols and how these qualities relate to the conceptualization of selfhood among adolescents in Japan and elsewhere in East Asia. The author explores how the idol-manufacturing industry absorbs young people into its system of production, molds them into marketable personalities, commercializes their images, and contributes to the construction of ideal images of the adolescent self. Since the relationship between the idols and their consumers is dynamic, the study focuses on the fans of idols as well.

Ultimately, Aoyagi argues, idol performances substantiate capitalist values in the urban consumer society of contemporary Japan and East Asia. Regardless of how crude their performances may appear in the eyes of critics, the idols have helped establish the entertainment industry as an agent of public socialization by driving public desires toward the consumption of commoditized fantasies.

Media Franchising Derek Johnson, 2013-03-22
Johnson astutely reveals that franchises are not Borg-like assimilation machines, but, rather, complicated ecosystems within which creative workers strive to create compelling 'shared worlds.' This finely researched, breakthrough book is a must-read for anyone seeking a sophisticated understanding of the contemporary media industry. —Heather Hendershot, author of *What's Fair on the Air?: Cold War Right-Wing Broadcasting and the Public Interest* While immediately recognizable throughout the U.S. and many other countries, media mainstays like X-Men, Star Trek, and Transformers achieved such familiarity through constant reincarnation. In each case, the initial success of a single product led to a long-term embrace of media franchising—a dynamic process in which media workers from different industrial positions shared in and reproduced familiar culture across television, film, comics, games, and merchandising. In *Media Franchising*, Derek Johnson examines the corporate culture behind these production practices, as well as the collaborative and creative efforts involved in conceiving, sustaining, and sharing intellectual properties in media work worlds. Challenging connotations of homogeneity, Johnson shows how the cultural and industrial logic of franchising has encouraged media industries to reimagine creativity as an opportunity for exchange among producers, licensees, and even consumers. Drawing on case studies and interviews with media producers, he reveals the meaningful identities, cultural

hierarchies, and struggles for distinction that accompany collaboration within these production networks. Media Franchising provides a nuanced portrait of the collaborative cultural production embedded in both the media industries and our own daily lives.
