*A Successful Transformation?* Petr Pavlínek, 2008-04-30 This is a brilliant examination of the complex processes of the post-1990 transformation in the Czech automotive industry and its selective integration into the West European system. The post-1990 restructuring of the industry is analyzed in the context of its pre-1990 development and in the context of the East European automobile industry as a whole. Specifically, the book examines the development and post-1990 restructuring of the Czech car, components, and truck industries.

*The Speed of Change* Jan-Bart Gewald, Sabine Luning, Klaas van Walraven, 2009-07-31 In the early 1900s the motor-vehicle (car, bus, lorry or motor-cycle) was introduced in sub-Saharan Africa. This edited volume of eleven contributions by historians, anthropologists, social and political scientists explores aspects of the social history and anthropology of the motor-vehicle in Africa.

*Biochar Systems for Smallholders in Developing Countries* Sebastian B. Scholz, Thomas Sembres, Kelli Roberts, Thea Whitman, Kelpie Wilson, Johannes Lehmann, 2014-06-23 This report offers a review of what is known about opportunities and risks of biochar systems in developing countries. *Maritime Logistics* Dong-Wook Song, Photis Panayides, 2015-04-03 Globalisation and the rapid increase in world trade in the past decade have contributed to greater demand for international transport and logistics and, consequently, the expansion of the maritime industry. The dramatic changes in the mode of world trade and cargo transportation make it more important than ever to have a clear understanding of the way in which freight is transported by sea and the role of ports in this exchange. At the cutting edge in its assessment of the industry, *Maritime Logistics* covers the whole scope of maritime logistics and examines latest logistical developments within the port and shipping industry. With a range of new international contributors, this new edition has been thoroughly revised and updated. There are new chapters on port centric logistics, hinterland logistics and global supply chains, maritime transport and logistics as a trade facilitator, and future trends and developments. Written by a team of international experts with over fifty years' experience in the field, *Maritime Logistics* provides a truly global perspective. The book covers everything that students of logistics, as well as those working within the industry, need to know about maritime logistics, including shipping lines, containers, tankers, dry bulk, port-centric logistics, and much more.

**Critical Risks of Different Economic Sectors** Dmitry Chernov, Didier Sornette, 2019-12-03 This book explores the major differences between the kinds of risk encountered in different sectors of industry - production (including agriculture) and services - and identifies the main features of accidents within different industries. Because of these differences, unique risk-mitigation measures will need to be implemented in one industry that cannot be implemented in another, leading to large managerial differences between these broad economic sectors. Based on the analysis of more than 500 disasters, accidents and incidents - around 230 cases from the production sector and around 280 cases from the service sector - the authors compare the risk response actions appropriate within different sectors, and establish when and how it is possible to generalize the experience of dealing with risks in any given industry to a wider field of economic activity. This book is mainly intended for executives, strategists, senior risk managers of enterprise-wide organizations and risk management experts engaged in academic or consulting work. By setting out clearly the sector differences in risk management, the authors aim to improve the practice of general risk assessment with regard to identifying and prioritizing risks, and of risk control with regard to planning appropriate mitigation measures.

**Insecurity in the Niger Delta: A Report on Emerging Threats in Akwa Ibom, Bayelsa, Cross River, Delta, Edo and Rivers States** Tarila Marclint Ebiede, Celestine Oyom Bassey, Judith Burdin Asuni, 2021-01-25 *Insecurity in the Niger Delta: Emerging Threats in Akwa Ibom, Bayelsa, Cross River, Delta, Edo and Rivers States* is a European Union-funded in-depth study of the issue of insecurity in the Niger Delta, the oil producing region of Nigeria. Security in the region is usually assessed from the context of the absence of threats to the oil industry. This study goes beyond that limited view, using case studies drawn from the six states in the South-South geopolitical zone to show emerging security threats in the region and the complex network of factors behind them. The chapters address issues of insecurity such as youth gangs/cults, sea piracy and sea robbery, election violence, communal conflicts, land disputes, chieftaincy tussles, armed robbery, human trafficking, internal population displacement (IDPs), reintegration of ex-militants, youth unemployment, internet fraud, police brutality, environmental pollution, farmer-herder crises and influx of non-indigenes. The authors critically discuss the different strategies adopted by state governments and communities in the region to address insecurity and explain why these approaches have so far failed to resolve the problem in the region. The study recommends policy options that could improve the security situation for everyday people living and working in Nigeria's Niger Delta region.

**Stirling Engine Design Manual** William Martini,2013-01-25 For Stirling engines to enjoy widespread application and acceptance, not only must the fundamental operation of such engines be widely understood, but the requisite analytic tools for the stimulation, design, evaluation and optimization of Stirling engine hardware must be readily available. The purpose of this design manual is to provide an introduction to Stirling cycle heat engines, to organize and identify the available Stirling engine literature, and to identify, organize, evaluate and, in so far as possible, compare non-proprietary Stirling engine design methodologies. This report was originally prepared for the National Aeronautics and Space Administration and the U. S. Department of Energy.

Day Kenneth Goldsmith,2003 Poetry. I am spending my 39th year practicing uncreativity. On Friday, September 1, 2000, I began retyping the day's NEW YORK TIMES word for word, letter for letter, from the upper left hand corner to the lower right hand corner, page by page. With these words, Kenneth Goldsmith embarked upon a project which he termed uncreative writing, that is: uncreativity as a constraint-based process; uncreativity as a creative practice. By typing page upon page, making no distinction between article, editorial and advertisement, disregarding all typographic and graphical treatments, Goldsmith levels the daily newspaper. DAY is a monument to the ephemeral, comprised of yesterday's news, a fleeting moment concretized, captured, then reframed into the discourse of literature. When I reach 40, I hope to have cleansed myself of all creativity-Kenneth Goldsmith.
