*Introductory Grammar of Amharic* Wolf Leslau,2000 This book closes the gap for beginners who want to study the Amharic language and had difficulties in finding the right grammar for this purpose: The first grammar of Amharic, the national language of Ethiopia, was published by Hiob Ludolf in 1698. The Amharic grammar published by Praetorius in 1879 is based on Amharic religious texts and on scattered material, usually composed by missionaries. A milestone in the study of Amharic is Marcel Cohen's *Traite de langue amharique* (1936), but this grammar, too is not completely suited for beginners since the author's generalizations are at times aimed at linguists. The grammar that comes closest to the concept of a beginner's grammar is that of C.H. Dawkin (1960), yet this grammar is extremely short, does not give examples and does not introduce the student to the intricacies of the language. The new book gives all the grammatical forms and the sentences of the present grammar in Amharic script and in phonetic transcription. The illustrative examples have a free and a literal translation. This procedure should likewise prove to be useful for the Semitist as well as for the general linguist.

**Flying The Big Jets (4th Edition)** Stanley Stewart,2014-09-30 Flying the Big Jets presents the facts that people want to know about the world of the big jets. How does a large aircraft fly? How long is the take-off run at maximum weight? How much fuel is carried on a transatlantic flight? How do the radios work? What aircraft maintenance is required? How often are the tyres changed? What is the life style of a pilot? The answers to these and a thousand other questions are given in sufficient detail to satisfy the most inquisitive of readers. Chapter by chapter the reader is taken gently from the basics of the big jets to the sophistication of the 'glass cockpit' in preparation for the pilot's seat on a Boeing 777 flight from London to Boston. Flying the Big Jets is a comprehensive book that reveals as never before the every-day working environment of the modern long-haul airline pilot. Written by a pilot with over 15,000 flying hours on heavy jets during a 30-year career in commercial aviation, this title is a comprehensive text book taking the reader into the 'glass cockpit' of a Boeing 777. It is also a guide to the principles of flight, the art of navigation and meteorology, and an appreciation of the role played by Air Traffic Control in modern airline operations. An absorbing read for that next long-haul flight. WINGSPAN

**Every Person in New York** Jason Polan,2015-08-18 Jason Polan is on a mission to draw every person in New York, from cab drivers to celebrities. He draws people eating at Taco Bell, admiring paintings at the Museum of Modern Art, and sleeping on the subway. With a foreword by Kristen Wiig, Every Person in New York, Volume 1 collects thousands of Polan's energetic drawings in one chunky book. As full as a phone book and as invigorating as a walk down a bustling New York street, this is a new kind of love letter to a beloved city and the people who live there.

**Achtung-Panzer!** Heinz Guderian,1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

*The Mindbody Code* Mario Martinez, PsyD,2016-08-01 Why is it so difficult to change our beliefs and behaviors even when we know they no longer serve us? How can certain individuals reverse incurable disease while others suffer the effects of childhood wounds despite years of therapy?

How is it that the centenarian population is the fastest-growing segment of the US population even though the majority of people over the age of 100 rarely visit their doctors? These are the questions readers will explore in the revolutionary book from clinical neuropsychologist and biocognitive science founder Dr. Mario Martinez. In The MindBody Code, Dr. Martinez challenges us to embrace a radically new paradigm for health and well-being. Readers will not only learn the basics of this fascinating, cutting-edge science, moreover they will learn to communicate with the body in its own biosymbolic language for results that until this point may have been elusive at best. Through fascinating case studies and practical training in embodying the methodology, Martinez reveals the way our cultural beliefs impact our immune system; the pathway to healing the archetypal wounds of shame, abandonment, and betrayal; how to break through the ceilings of abundance that limit our prosperity; and much more.

**JeongMee Yoon** Bonnie Yochelso,2019 Why do girls love pink toys, and boys love blue ones? The fi ne arts photographer Jeongmee Yoon (\*1969, Seoul) poses this question in her work, The Pink and Blue Project, for which she began photographing Korean and American girls and boys in their rooms in 2005. The gender-specifi c color schemes quickly established themselves as an overarching phenomenon, independent of cultural or ethnic background. Yoon's impressive portraits, for which she spent hours carefully arranging pink or blue objects, question these color codes and the consumer habits of both parents and children. They reveal the connections linking gender identity and social norms, consumer culture, and media. She continued this project by visiting the children years later and capturing how their favorite colors had changed. Jeongmee Yoon was awarded the ILWOO Foundation Prize for her project.

**Dancers in the Afterglow** Jack L. Chalker,2013-02-25 First came the tourists... Ondine was a resort planet. Sixteen million tourists travelled there from just about every world you could think of to live and love in sixteen million different ways. Then came the machists... They had gobbled up world after world, spreading their culture to thousands of different races with a brutal, vicious, but most effective system. They were inhuman, unthinking...uncaring. The Combine had already seen what they had done on other worlds, seen whole populations converted into something horrible...something not quite human, non-thinking and no longer caring. Now they had captured Ondine, and no human could save the planet. And then Daniel came to Judgment. Daniel was a cyborg, a former fighter pilot now wedded to a master computer and life-support system housed in a flying golden egg. He was the Combine scientists' finest creation, a spaceship that could control twenty-two robot slaves. He was the perfect saviour for Ondine, but for one thing. Everyone seemed to forget that deep inside that golden egg was a very human being...

**StarCraft Field Manual** ,2015-11-05 Blizzard Entertainment’s StarCraft saga has captivated millions of players worldwide since its initial release in 1998.
