Refugee Alan Gratz, 2017-07-25 The award-winning, #1 New York Times bestselling novel from Alan Gratz tells the timely--and timeless--story of three different kids seeking refuge. A New York Times bestseller! JOSEF is a Jewish boy living in 1930s Nazi Germany. With the threat of concentration camps looming, he and his family board a ship bound for the other side of the world... ISABEL is a Cuban girl in 1994. With riots and unrest plaguing her country, she and her family set out on a raft, hoping to find safety in America... MAHMOUD is a Syrian boy in 2015. With his homeland torn apart by violence and destruction, he and his family begin a long trek toward Europe... All three kids go on harrowing journeys in search of refuge. All will face unimaginable dangers -- from drownings to bombings to betrayals. But there is always the hope of tomorrow. And although Josef, Isabel, and Mahmoud are separated by continents and decades, shocking connections will tie their stories together in the end. As powerful and poignant as it is action-packed and page-turning, this highly acclaimed novel has been on the New York Times bestseller list for more than four years and continues to change readers' lives with its meaningful takes on survival, courage, and the quest for home.

Insignificant Events in the Life of a Cactus Dusti Bowling, 2017-09-05 “Aven is a perky, hilarious, and inspiring protagonist whose attitude and humor will linger even after the last page has turned.” —School Library Journal (Starred review) Aven Green loves to tell people that she lost her arms in an alligator wrestling match, or a wildfire in Tanzania, but the truth is she was born without them. And when her parents take a job running Stagecoach Pass, a rundown western theme park in Arizona, Aven moves with them across the country knowing that she’ll have to answer the question over and over again. Her new life takes an unexpected turn when she bonds with Connor, a classmate who also feels isolated because of his own disability, and they discover a room at Stagecoach Pass that holds bigger secrets than Aven ever could have imagined. It’s hard to solve a mystery, help a friend, and face your worst fears. But Aven’s about to discover she can do it all . . . even without arms. Drawing Futures Bob Sheil, Frédéric Migayrou, Luke Pearson, Laura Allen, 2016-11-11 Drawing Futures brings together international designers and artists for speculations in contemporary drawing for art and architecture. Despite numerous developments in technological manufacture and computational design that provide new grounds for designers, the act of drawing still plays a central role as a vehicle for speculation. There is a rich and long history of drawing tied to innovations in technology as well as to revolutions in our philosophical understanding of the world. In reflection of a society now underpinned by computational networks and interfaces allowing hitherto unprecedented views of the world, the changing status of the drawing and its representation as a political act demands a platform for reflection and innovation. Drawing Futures will present a compendium of projects, writings and interviews that critically reassess the act of drawing and where its future may lie. Drawing Futures focuses on the discussion of how the field of drawing may expand synchronously alongside technological and computational developments. The book coincides with an international conference of the same name, taking place at The Bartlett School of Architecture, UCL, in November 2016. Bringing together practitioners from many creative fields, the book discusses how drawing is changing in relation to new technologies for the production and dissemination of ideas.

The Uninhabitable Earth David Wallace-Wells, 2019-02-19 #1 NEW YORK TIMES BESTSELLER • “The Uninhabitable Earth hits you like a comet, with an overflow of insanely lyrical prose about our pending Armageddon.”—Andrew Solomon, author of *The Noonday Demon* NAMED ONE OF THE BEST BOOKS OF THE YEAR BY The New Yorker • The New York Times Book Review • Time • NPR • The Economist • The Paris Review • Toronto Star • GQ • The Times Literary Supplement • The New York Public Library • Kirkus Reviews It is worse, much worse, than you think. If your anxiety about global warming is dominated by fears of sea-level rise, you are barely scratching the surface of what terrors are possible—food shortages, refugee emergencies, climate wars and economic devastation. An “epoch-defining book” (The Guardian) and “this generation’s Silent Spring” (The Washington Post), *The Uninhabitable Earth* is both a travelogue of the near future and a meditation on how that future will look to those living through it—the ways that warming promises to transform global politics, the meaning of technology and nature in the modern world, the sustainability of capitalism and the trajectory of human progress. *The Uninhabitable Earth* is also an impassioned call to action. For just as the world was brought to the brink of catastrophe within the span of a lifetime, the responsibility to avoid it now belongs to a single

generation—today's. **LOGLISTED FOR THE PEN/E.O. WILSON LITERARY SCIENCE WRITING AWARD** "The Uninhabitable Earth is the most terrifying book I have ever read. Its subject is climate change, and its method is scientific, but its mode is Old Testament. The book is a meticulously documented, white-knuckled tour through the cascading catastrophes that will soon engulf our warming planet."—Farhad Manjoo, *The New York Times* "Riveting. . . . Some readers will find Mr. Wallace-Wells's outline of possible futures alarmist. He is indeed alarmed. You should be, too."—*The Economist* "Potent and evocative. . . . Wallace-Wells has resolved to offer something other than the standard narrative of climate change. . . . He avoids the 'eerily banal language of climatology' in favor of lush, rolling prose."—Jennifer Szalai, *The New York Times* "The book has potential to be this generation's *Silent Spring*."—*The Washington Post* "The Uninhabitable Earth, which has become a best seller, taps into the underlying emotion of the day: fear. . . . I encourage people to read this book."—Alan Weisman, *The New York Review of Books*

From the Potting Shed Stephanie Donaldson, 1997 *From the Potting Shed* captures the spirit of the gardener's world with projects that include welcome gifts for the avid gardener and decorative embellishments for the garden. Practical planting advice is combined with a seasonal checklist of activities and tasks for the entire year. 350+ color photos.

Full Metal Jacket Matthew Derby, 2014-12-08 Two boys discover that the title of their stop-motion animated film about Vietnam has been taken by director Stanley Kubrick. A 150-year-old woman on the run from the government is tracked down by the company who extended her life. A military contractor carrying his robot son in a gym bag struggles to find his way out of the Nigerian delta during a bloody civil war. The wife of an up-and-coming politician grieves his infidelity by prowling rooftops with a sniper rifle. Following his celebrated debut collection, *Super Flat Times*, Matthew Derby delivers a disturbing new set of stories that plunges us into a lonely heartland of misfits, outcasts, and would-be assassins who lurk in the shadows, searching for connection and meaning in all the wrong places.

Ship Modeling Simplified: Tips and Techniques for Model Construction from Kits Frank Mastini, 1990-03-22 In *Ship Modeling Simplified*, master model builder Frank Mastini puts to paper the methods he's developed over 30 years at the workbench to help novices take their first steps in an exciting pastime. You don't need the deftness of a surgeon or the vocabulary of an old salt to build a model. What you need is an understanding coach. Mastini leads readers from the mysteries of choosing a kit and setting up a workshop through deciphering complicated instructions and on to painting, decorating, and displaying finished models—with patience and clarity, not condescension. He reveals dozens of shortcuts: How to plank a hull egg-shell tight; how to build and rig complicated mast assemblies without profanity; how to create sails that look like sails. . . . And along the way he points out things that beginners usually do wrong—beforehand, not after they've taken hammers to their projects. *Ship Modeling Simplified* even includes an Italian-English dictionary of nautical terms, the key to assembling the many high-quality Italian kits on the American market. Model building is fun, and not nearly as difficult as some experts would have you believe. Here is everything you'll ever need to get started in a hobby that will last a lifetime.

A Glossary of Archival and Records Terminology Richard Pearce-Moses, 2005 Intended to provide the basic foundation for modern archival practice and theory.

The Fine Art of Cabinetmaking James Krenov, 2007 With continual themes of perfection of technique and building to the limits of one's skill, this authoritative resource provides in-depth instruction for mastering the craft of cabinetmaking. A bevy of topics, including the proper way to sharpen and hone tools, hollow grinding methodology, and obtaining proper grinding angles, are detailed in this comprehensive

cabinet-making sourcebook. Lessons devoted to using and understanding various woods, including common or exotic pieces, learning how to read grain, and the pros and cons in working with air-dried wood versus kiln-dried wood, will educate any level of woodworker. Chapters devoted to resawing as well as problems and concerns due to moisture content and wood movement are also included.

Worlds in Miniature Jack Davy, Charlotte Dixon, 2020-10-09 Miniaturisation is the creation of small objects that resemble larger ones, usually, but not always, for purposes different to those of the larger original object. *Worlds in Miniature* brings together researchers working across various regions, time periods and disciplines to explore the subject of miniaturisation as a material culture technique. It offers original contribution to the field of miniaturisation through its broad geographical scope, interdisciplinary approach, and deep understanding of miniatures and their diverse contexts. Beginning with an introduction by the editors, which offers one possible guide to studying and comparing miniatures, the following chapters include studies of miniature Neolithic stone circles on Exmoor, Ancient Egyptian miniature assemblages, miniaturisation under colonialism as practiced by the Makah People of Washington State, miniature surf boats from India, miniaturised contemporary tourist art of the Warao people of Venezuela, and dioramas on display in the Science Museum. Interspersing the chapters are interviews with miniature-makers, including two miniature boat-builders at the National Maritime Museum Cornwall and a freelance architectural model-maker. Professor Susanne K  chler concludes the volume with a theoretical study summarising the current state of miniaturisation as a research discipline. The interdisciplinary nature of the volume makes it suitable reading for anthropologists, archaeologists, historians and artists, and for researchers in related fields across the social sciences. The Disappearing Spoon Sam Kean, 2010-07-12 From New York Times bestselling author Sam Kean comes incredible stories of science, history, finance, mythology, the arts, medicine, and more, as told by the Periodic Table. Why did Gandhi hate iodine (I, 53)? How did radium (Ra, 88) nearly ruin Marie Curie's reputation? And why is gallium (Ga, 31) the go-to element for laboratory pranksters? *The Periodic Table is a crowning scientific achievement, but it's also a treasure trove of adventure, betrayal, and obsession. These fascinating tales follow every element on the table as they play out their parts in human history, and in the lives of the (frequently) mad scientists who discovered them. **THE DISAPPEARING SPOON** masterfully fuses science with the classic lore of invention, investigation, and discovery--from the Big Bang through the end of time. *Though solid at room temperature, gallium is a moldable metal that melts at 84 degrees Fahrenheit. A classic science prank is to mold gallium spoons, serve them with tea, and watch guests recoil as their utensils disappear.

Surrounded by Science National Research Council, Division of Behavioral and Social Sciences and Education, Center for Education, Board on Science Education, 2010-04-03 Practitioners in informal science settings--museums, after-school programs, science and technology centers, media enterprises, libraries, aquariums, zoos, and botanical gardens--are interested in finding out what learning looks like, how to measure it, and what they can do to ensure that people of all ages, from different backgrounds and cultures, have a positive learning experience. *Surrounded by Science: Learning Science in Informal Environments*, is designed to make that task easier. Based on the National Research Council study, *Learning Science in Informal Environments: People, Places, and Pursuits*, this book is a tool that provides case studies, illustrative examples, and probing questions for practitioners. In short, this book makes valuable research accessible to those working in informal science: educators, museum professionals, university faculty, youth

leaders, media specialists, publishers, broadcast journalists, and many others.

The Archive and the Repertoire Diana Taylor, 2003-09-12 In *The Archive and the Repertoire* preeminent performance studies scholar Diana Taylor provides a new understanding of the vital role of performance in the Americas. From plays to official events to grassroots protests, performance, she argues, must be taken seriously as a means of storing and transmitting knowledge. Taylor reveals how the repertoire of embodied memory—conveyed in gestures, the spoken word, movement, dance, song, and other performances—offers alternative perspectives to those derived from the written archive and is particularly useful to a reconsideration of historical processes of transnational contact. *The Archive and the Repertoire* invites a remapping of the Americas based on traditions of embodied practice. Examining various genres of performance including demonstrations by the children of the disappeared in Argentina, the Peruvian theatre group Yuyachkani, and televised astrological readings by Univision personality Walter Mercado, Taylor explores how the archive and the repertoire work together to make political claims, transmit traumatic memory, and forge a new sense of cultural identity. Through her consideration of performances such as Coco Fusco and Guillermo Gómez-Peña's show *Two Undiscovered Amerindians Visit . . .*, Taylor illuminates how scenarios of discovery and conquest haunt the Americas, trapping even those who attempt to dismantle them. Meditating on events like those of September 11, 2001 and media representations of them, she examines both the crucial role of performance in contemporary culture and her own role as witness to and participant in hemispheric dramas. *The Archive and the Repertoire* is a compelling demonstration of the many ways that the study of performance enables a deeper understanding of the past and present, of ourselves and others.

Illustration Alan Male, 2017-01-12 Illustration practice is not judged purely by visual literacy and technical qualities, but also requires intellectual engagement with its subject matter. *Illustration: A Theoretical & Contextual Perspective*, 2nd Edition examines the breadth and many uses of this diverse discipline, through nearly 300 colour examples. From developing a brief, conducting research and analysing visual language, the book goes on to explore the role of illustration in documentation, commentary, storytelling, persuasion and identity. It concludes with an overview of current professional practice, demonstrating that the ability to communicate meaningfully and effectively for a global audience is key to navigating today's creative industries. Examples of work from award-winning illustrators showcase a huge range of applications, from the author's own collaboration with the British Museum of Natural History and Olivier Kugler's Portraits of Syrian Refugees in Iraqi Kurdistan, to Levi Pinfold's fictional picture book *Black Dog* and Malika Favre's promotional images for the BAFTA (British Academy of Film and Television Arts) Film Awards.

Blood Meridian Cormac McCarthy, 2010-08-11 25th ANNIVERSARY EDITION • From the bestselling author of *The Passenger* and the Pulitzer Prize-winning novel *The Road*: an epic novel of the violence and depravity that attended America's westward expansion, brilliantly subverting the conventions of the Western novel and the mythology of the Wild West. Based on historical events that took place on the Texas-Mexico border in the 1850s, *Blood Meridian* traces the fortunes of the Kid, a fourteen-year-old Tennessean who stumbles into the nightmarish world where Indians are being murdered and the market for their scalps is thriving. Look for Cormac McCarthy's latest bestselling novels, *The Passenger* and *Stella Maris*.

Renaissance Fun Philip Steadman, 2021-04-13 *Renaissance Fun* is about the technology of Renaissance

entertainments in stage machinery and theatrical special effects; in gardens and fountains; and in the automata and self-playing musical instruments that were installed in garden grottoes. How did the machines behind these shows work? How exactly were chariots filled with singers let down onto the stage? How were flaming dragons made to fly across the sky? How were seas created on stage? How did mechanical birds imitate real birdsong? What was ‘artificial music’, three centuries before Edison and the phonograph? How could pipe organs be driven and made to play themselves by waterpower alone? And who were the architects, engineers, and craftsmen who created these wonders? All these questions are answered. At the end of the book we visit the lost ‘garden of marvels’ at Pratolino with its many grottoes, automata and water jokes; and we attend the performance of Mercury and Mars in Parma in 1628, with its spectacular stage effects and its music by Claudio Monteverdi – one of the places where opera was born. Renaissance Fun is offered as an entertainment in itself. But behind the show is a more serious scholarly argument, centred on the enormous influence of two ancient writers on these subjects, Vitruvius and Hero. Vitruvius’s Ten Books on Architecture were widely studied by Renaissance theatre designers. Hero of Alexandria wrote the Pneumatics, a collection of designs for surprising and entertaining devices that were the models for sixteenth and seventeenth century automata. A second book by Hero On Automata-Making – much less well known, then and now – describes two miniature theatres that presented plays without human intervention. One of these, it is argued, provided the model for the type of proscenium theatre introduced from the mid-sixteenth century, the generic design which is still built today. As the influence of Vitruvius waned, the influence of Hero grew.
