Mikoyan Gurevich MiG-15 Dariusz Karnas, 2014 This book is a true modeler's reference, covering all aspects of the MiG-15 from production to service use in a concise and accessible way. The text description is well supported with line diagrams and photographs to highlight the many changes made over the production run of Russia's first mass-produced jet fighter. Details of both Russian and license production in Poland, Czechoslovakia and China, where unique variations occurred, are also provided. Amongst many tables in the book covering production lots, factories and the real value of this book are pages of detailed photographs and technical drawings. From fuselage to wings, tail, cockpit and armament, nothing is ignored. For anyone who plans to build a MiG-15 in scale form, and there have been many choices released in recent years, this book is an essential source of reference. It contains scale plans in 1/72nd, 1/48th and 1/35th scales; photos and drawings from Technical Manuals; superb color illustrations of camouflage and markings; rare b/w archive photographs; color photos of preserved aircraft. Essential reading for aviation historians, enthusiasts & scale modelers.

**Mikoyan-Gurevitch MIG 15 & 17** Gérard Paloque, 2014 At the beginning of the Korean War, the west discovered the MiG-15, the first mass-produced jet fighter built in the Soviet Union. This small device entered service at the end of 1950 in its improved version, the MiG-15bis, and in turn was quickly deployed to Korea where, with its powerful armament and handling, it was an

unpleasant surprise for the forces of the United Nations, after finding their air superiority with the arrival of the latest version of the famous F-86 Sabre. While the bundle - a nickname given by NATO to the MiG-15 - was barely in use, MiG conceived its successor, the more efficient and wing modified MiG-17 (Fresco). The type was withdrawn from service in the USSR in the late sixties, however it had great success abroad. The Fresco was the most exported Soviet fighter until the arrival of its indirect successor, MiG-21 (see Planes & Pilots No. 12).

*Famous Russian Aircraft* Yefim Gordon, Dmitriï Sergeevich Komissarov, 2011-01-04 When the Mikoyan Gurevich MiG-15 first appeared in combat against the Western powers during the Korean War it caused consternation amongst its opposition. Its performance far outstripped any jet fighter aircraft produced by the West at the time and its duels with the US F86 Sabre have entered into aviation legend. The success of the MiG-15 was such that it went on to become the most widely produced jet fighter aircraft in history, and although figures vary it is believed over 12,000 were built plus another 6,000 under licence. The prototype of the distinctive fighter, built by the Mikoyan design bureau, with its high swept wing and tailplane and nose intake first flew in 1947, and was first deployed in the Korean War at the start of the 1950s. Although it suffered from handling problems when involved in dogfights with the F86, and a number were shot down, it had been built primarily with the role of interceptor in mind and was highly effective against the US heavy

bombers. The MiG-15 was produced in a number of variants, both in single seat and two-seat versions and remained in service as a trainer aircraft for Warsaw Pact countries into the 1970s. Its improved successors, the MiG-17 and MiG-19 became the standard Soviet jet fighters of the early Cold War, including the Vietnam War. The MiG-15 was also produced in Czechoslovakia, Poland and China and aircraft were exported throughout the world. Its rugged build has ensured that a number survive in flying condition today. This book is a worthy addition to the acclaimed 'Famous Russian Aircraft' series, with a comprehensive history of the aircraft's development, design history and use, throughout the world. The comprehensive text is supported by almost 1000 photographs and line drawings as well as over a 100 detailed colour profiles. This will be the definitive book on the market of this historic Soviet jet fighter.

**Mikoyan-Gurevich MiG-15** Yefim Gordon,E.

Gordon,2001 The Soviet Union's swept-swept-wing fighter, controversially powered by a copied Rolls-Royce Nene jet engine, caused a sensation and more than a few problems for its opponents when it was introduced in the Korean War in 1950. This book is compiled from a wealth of first-hand Russian sources and includes a comprehensive history of the design and its service. Includes extensive and detailed photo coverage from Russian sources, almost all of which have never-before been seen. For military enthusiasts and modelers.

The other volumes are FM 100-2-2, The Soviet Army: Specialized Warfare and Rear Area Support, and FM 100-2-3, The Soviet Army: Troops, Organization and Equipment. These manuals cannot stand alone, but should be used interchangeably. These field manuals serve as the definitive source of unclassified information on Soviet ground forces and their interaction with other services in combined arms warfare. These manuals represent the most current unclassified information and they will be updated periodically. More information would become available in the event of war or national emergency. Why buy a book you can download for free? We print the paperback book so you don't have to. First you gotta find a good clean (legible) copy and make sure it's the latest version (not always easy). Some documents found on the web are missing some pages or the image quality is so poor, they are difficult to read. If you find a good copy, you could print it using a network printer you share with 100 other people (typically its either out of paper or toner). If it's just a 10-page document, no problem, but if it's 250-pages, you will need to punch 3 holes in all those pages and put it in a 3-ring binder. Takes at least an hour. It's much more cost-effective to just order the bound paperback from Amazon.com This book includes original commentary which is copyright material. Note that government documents are in the public domain. We print these paperbacks as a service so you don't have to. The books are compact, tightly-bound paperback, full-size (8 1/2 by 11 inches),

with large text and glossy covers. 4th Watch Publishing Co. is a HUBZONE SDVOSB. <https://usgovpub.com>

**Jailbreaking the Goddess** Lasara Firefox Allen, 2016-07-08 Jailbreaking the Goddess is a revolutionary revisioning of the feminine divine. Where the maiden, mother, crone archetypal system is tied to female biology and physical stages of life, the fivefold model liberates the female experience from the shackles of the reproductive model. In a woman's lifetime, she will go through several different cycles of beginnings, potential, creation, mastery, and wisdom. This fivefold model is not an adaption of the threefold. It is a new system that embraces the powerful, fluid nature of the lived experience of women today. Join Lasara Firefox Allen as she explores the nature of the five archetypes; gives examples of what areas of life each might preside over; lists goddesses that fit within each archetype; suggests ways to begin building relationship with the different archetypes; and provides simple rituals for recognition, transition, and invocation. Praise: Jailbreaking the Goddess is an important contribution to the writings on Goddess tradition and feminist spirituality...I love her political savvy, her sensitivity around issues of diversity and cultural awareness and appropriation, and her unabashed celebration of pleasure, sensuality, and life!—Starhawk This fiercely inspired body of work is art, theory, and passion. Genius.—Rosa De Anda,

from her foreword Lasara Firefox Allen delves deep into the ways in which colonialist language has shaped our experience of the divine feminine...This is an innovative work that has the potential to change the face of modern feminist spirituality.—Suzanne Sterling, founder of Voice of Change

*Foxbat Tales* Mike Guardia, 2021-12-15 From the Middle East to the Iron Curtain?the definitive combat history of the Mikoyan-Gurevich MiG-25.July 1967: At the Moscow Air Show, the Soviets unveiled six new state-of-the-art aircraft. From among this lineup of new fighters and interceptors stood the Mikoyan-Gurevich MiG-25-purportedly capable of outrunning and outmaneuvering any aircraft in NATO's inventory.Yet even before its public appearance in Moscow, the MiG-25 had been a grave concern for Western analysts. Indeed, this new interceptor could fly at speeds in excess of Mach 3 and cruise at altitudes heretofore deemed unreachable for a tactical fighter. Moreover, NATO's intelligence community was baffled by how the Soviet Union had cobbled together such a masterpiece of modern engineering.The reality, however, was that this interceptor was a poorly-designed airframe with an oversized motor. Although it excelled as a reconnaissance aircraft, it fared poorly as a dogfighter - and it was typically the loser when pitted against Western aircraft like the F-14 Tomcat and F-15 Eagle.From the Sinai Peninsula?to the Soviet-Afghan War?to Operation Desert Storm, *Foxbat Tales* is the

definitive operational and combat history of the MiG-25.

*Firefox Down* Craig Thomas, 2022-10-24 Firefox is down and on thin ice...The unputdownable thriller from a modern master Badly damaged and rapidly losing fuel after a brutal dogfight, stolen Cold War super-plane Firefox is forced to land on a frozen lake twenty miles from the Norwegian frontier. When the ice breaks, pilot Mitchell Gant has no choice but to abandon the aircraft and run for his life. As NATO races against the Soviets to recover Firefox from its icy tomb, Gant is hunted across Russia by the KGB. With international tension between East and West mounting, Gant must evade capture and get Firefox back into the sky before it's too late... Strap in for the ride of your life. The extraordinary sequel to the bestselling techno-thriller Firefox, perfect for fans of Tom Clancy and Robert Ludlum.

**Canadian Mig Flights** Major Harold A.

Skaarup, 2008-06-04 This book is a collection of there I was stories highlighting the experiences of Canadian Forces pilots who have had the opportunity of a lifetime to fly in the combat aircraft operated by former adversaries. Technical descriptions of key Soviet-built fighter jets such as the MiG-15, MiG-21, MiG-23, MiG-25, MiG-29, Sukhoi Su-22 and Su-27 are included for general reference. The Canadian Fighter pilots mentioned in the story have generously provided their observations and comments on their specific experiences of flight in aircraft such as the MiG-29 (NATO codenamed Fulcrum), Sukhoi Su-22 (codenamed Fitter) and Su-27 (codenamed Flanker), both in Canada and overseas. The stories as told first hand by the pilots who contributed them should provide interesting reading for aviation enthusiasts of all ages. An Annex listing aircraft known to have been brought to the West by defecting pilots since 1949 is also included. The

Annex briefly describes pilots and aircraft and the circumstances that brought the various defectors to the west, including the MiG-15 flown to South Korea by Lieutenant No Kum-Sok and the MiG-25 flown to Japan by Lieutenant Viktor Belenko. Brief details of Soviet-built aircraft later flown in NATO opposition force flight test programs are also included.

**The World's Most Powerful Military Aircraft** Thomas Newdick, 2016-12-15 Ever since man first took to the air, combat aircraft have been at the cutting edge of aviation technology, resulting in some of the greatest and most complex designs ever built. The World's Greatest Military Aircraft features 52 of the most important military aircraft of the last hundred years, including everything from biplane fighters and carrier aircraft to tactical bombers, transport aircraft, multirole fighters, strategic strike aircraft, and stealth bombers. Each entry includes a brief description of the model's development and history, a profile view, key features, and specifications. Packed with more than 200 artworks and photographs, this is a colorful guide for the military aviation enthusiast.

*MiG-21 Units of the Vietnam War* István Toperczer, 2012-11-20 Having honed their piloting skills on the subsonic MiG-17 and transonic MiG-19, the Vietnamese Peoples' Air Force (VPAF) received their first examples of the legendary MiG-21 supersonic fighter in 1966. Soon thrown into combat over North Vietnam, the guided-missile

equipped MiG-21 proved a deadly opponent for the USAF, Navy and Marine Corps crews striking at targets deep into communist territory. Most of the VPAF's 12+ aces scored their bulk of their kills in the MiG-21, which was then the best fighter produced by Russia's premier fast jet manufacturer, Mikoyan Gurevich. Well over 200 MiG-21s were supplied to the VPAF, and the numerous models and the schemes they wore are chronicled in great detail in this unique volume.

**Canadian Warbird Survivors** Harold A.

Skaarup, 2001-11-29 The purpose of this handbook is to provide aviation enthusiasts with a simple checklist on where to find the surviving retired military aircraft that are preserved in Canada. The majority of the Canadian Warbird Survivors are on display within a great number of well maintained aviation museums, many others are displayed as gate guards near or in a number of Canadian Forces Bases, and a good number are in the hands of private collectors. Many are not listed in any catalogue, but have been found by word of mouth, or personal observation. The museum staffs and volunteer organizations throughout Canada have done a particularly good job of preserving the great variety of Canadian military aircraft, illustrated here. Hopefully, as more aircraft are recovered from their crash sites in the bush and restored, traded or brought back from private owners, they too will be added to the record. The book lists the aircraft alphabetically by manufacturer, number and type. This list is also appended with a brief summary of the aircraft presently on display within the nation and a bit

of its history within the Canadian Forces.  
Canadian Warbirds books are available through the  
iUniverse.com or the Amazon.com online bookstores.

OKB Tupolev E. Gordon,Vladimir Rigmant,2005 A  
History of the Design Bureau and its Aircraft  
Yefim Gordon & Vladimir Rigmant The origins of the  
design bureau that was to bear his name can be  
traced back to the appointment of Andrey  
Nikolayevich Tupolev as head of the TsAGI's  
Aviation Department in 1918. Over the years,  
nearly 300 projects have evolved within the OKB.  
Nearly 90 reached the prototype construction  
stage, with more than 40 types put into series  
production.In the 1930s, the TB-1 (ANT-4) and TB-3  
(ANT-6) bombers, the latter being the world's  
first heavy strategic bomber, paved the way for  
the long line of large multi-engined aircraft both  
civil and military for which the OKB is justly  
famed. Wartime production of the SB and Tu-2 plus  
the remarkable 'reverse engineering' of the Boeing  
B-29 that resulted in the Tu-4 led on to the jet  
Tu-16 and prop Tu-95 bombers. These, in turn were  
adapted for civil purposes as the Tu-104 and  
Tu-114 airliners. The supersonic Tu-22 and Tu-22M  
bombers and the Tu-144 airliner, a move into  
pilotless aircraft and a host of imaginative but  
unbuilt projects complete a fascinating work.
