**Mikoyan-Gurevich MiG-19** E. Gordon, Yefim Gordon, 2003 Following naturally on from the MiG-15 and MiG-17 in the series, the MiG-19 'Farmer' now receives the full Aerofax treatment. Appearing in the 1950s, the MiG-19 represented a major technological leap for the VVS, as it was one of their first fighters capable of accommodating air-to-air missiles, ground color intercept system and other advances. By the end of the 1950s it had become the standard VVS fighter and was integrated into the inventories of most Warsaw Pact countries and other Soviet allies. It was produced in many thousands in the USSR, Czechoslovakia and China (as the J-6, JJ-6 and X-5 Fantan); a significant number of export customers included Cuba, Egypt, Albania, Vietnam and Pakistan. As usual, Yefim Gordon has come up with a mass of previously unpublished information and photos from original Russian resources. Dimensions: 8-1/2 x 11 inches # of color photographs: Approximately 200 black & white and color photos

**Mig-19pm** Grzegorz Szymanowski, 2009-12-15 \* Includes free decals and masking foil \* Packed with color photos The Mikoyan-Gurevich MiG-19 is a Soviet second-generation, single-seat, twin jet-engined fighter aircraft. It was the first Soviet production aircraft capable of supersonic speeds in level flight. With the MiG-19PM variant, which entered production in 1957, the cannons were removed, and it was armed with 4 x Kaliningrad K-5M beam-riding missiles. This monograph features many color detail photos, making it an ideal publication for the modeler. About the Series This is a classic series of highly illustrated books on the best machines of war, with several hundred photographs of each aircraft or vehicle. With close-up views of the key

features of each machine, including its variations, markings and modifications, customizing and creating a model has never been easier. Includes extra features such as decals and masking foil.

**Mikoyan-Gurevich MiG-21 Pilot's Flight Operating Instructions** Nato, 2008-09  
The Mikoyan-Gurevich MiG-21 is known in NATO circles as the 'Fishbed'. Designed as a Mach 2.0 interceptor, the plane holds the distinction of being produced in greater numbers than any other jet aircraft. The Fishbed flew in combat in Vietnam, where it held its own against the F-105 Thunderchief. During the 1973 Arab-Israeli War, 17 Israeli aircraft were shot down, for a loss of six Egyptian MiG-21s. The plane also flew in combat in the Indo-Pakistani War of 1971, during the Soviet invasion of Afghanistan, and in Yugoslavia. Today, over 28 of the world's air forces continue to fly MiG-21s. Originally printed by NATO, this English-language handbook provides a glimpse inside the cockpit of this incredible plane. The manual was recently declassified and is here reprinted in book form. Care has been taken to preserve the integrity of the text

Mig-23 Mf Krzysztof Barcz, Dariusz Warsaw, 2010-01-05 \* Includes free decals and masking foil \* Packed with color photos The Mikoyan-Gurevich MiG-23 is a swing-wing fighter aircraft, designed by the Mikoyan-Gurevich bureau in the Soviet Union. It is considered to belong to the Soviet Third Generation aircraft category along with similar-aged Russian-produced fighters such as the MiG-25 Foxbat. It was the first Soviet fighter with a look-down/shoot-down radar and beyond visual range missiles, and the first MiG production fighter plane to have intakes at the sides of the fuselage. Production started in 1970 and reached large numbers with over 5,000 aircraft built. Today the MiG-23 remains in limited service with various export customers.

This album of detailed photographs is invaluable for the modeler or enthusiast alike. About the Series This is a classic series of highly illustrated books on the best machines of war, with several hundred photographs of each aircraft or vehicle. With close-up views of the key features of each machine, including its variations, markings and modifications, customizing and creating a model has never been easier. The Mikoyan-Gurevich MiG-3 Vol. I Dariusz Paduch, 2022-01-31 The MiG-3 fighter plane, like the history of the creation of the Mikoyan and Gurevich (Микоян и Гуревич) design bureau, is relatively well known to anyone interested in the history of Soviet aviation. Many books and articles have been published about this machine, but information about the circumstances of the birth of the project and the conditions of its creation are very brief and concise. MiG-1 and MiG-3 were the most numerous new generation fighters in Soviet aviation at the time of the German invasion of the USSR. They played a very important role in the first period of the war. Until now, it has been assumed in the literature that this applies mainly to the use of these aircraft during the battle of Moscow, as well as capital's and Leningrad's air defense, but MiGs also took on a large weight of air combat at the front in 1941.

Mikoyan Gurevich MiG-19P & PM, MiG-21F-13 Lechoslaw Musialkowski, 2018-05-28 The first supersonic fighter in the Polish Air Force, MiG-19 and the first version of the MiG-21F-13 are described in the unparalleled details. Many unpublished photos from the private collections. Colour schemes and markings are described and illustrated in a series of specially commissioned colour profiles.

*Mikoyan-Gurevich MiG-21 Pilot's Flight Operating Instructions* NATO,2008 En instruktionsbog (Flight Manual) for MiG-21 Fishbed.

The MiG-21 Holger Müller, Motorbuch, 2019-01-28 This book presents a detailed look at the design and development of the legendary MiG-21, including its powerplant, armament, upgrades, and variants. The Mikoyan-Gurevich MiG-21 was the standard fighter/interceptor aircraft of the Warsaw Pact and it stood up to its western counterparts for decades. This single-engine, supersonic jet fighter entered service in 1959, and in addition to the Soviet Union, almost every eastern European military operated the Mach 2 fighter, including East Germany (which flew more than 500 aircraft of this type), Poland, Romania, Yugoslavia, and others. With approximately 11,000 of all types built, the MiG-21 has been produced in greater numbers than almost any other combat aircraft in history, and has also seen combat with such countries as Vietnam, China, Syria, Iraq, Angola, and others.

**Visual Aircraft Recognition** U. S. Army, 2013-01-14 This manual is primarily a ready reference to assist the ground observer in aircraft recognition and identification. It provides information on current operational aircraft of the United States and foreign countries, which may be observed worldwide in the combat area. It can be used as source material for personnel conducting unit training in visual aircraft recognition. The procedures in this publication apply throughout the US Army. The data is based on the best information available at the time of publication; however, it is not all-inclusive because of some classification guidelines. This publication, by nature, has a built-in time lag, and some aircraft may still be under development or classified at the time of writing, but may be fielded or unclassified at, or after, publication.

**The Chinese Air Force** Richard P. Hallion, Roger Cliff, Phillip C. Saunders, Center for the Study of Chinese Military Affairs (National Defense University), 2012-10-03 Presents revised and edited papers from a October 2010 conference held in Taipei on the Chinese Air Force. The conference was jointly organized by Taiwan's Council for Advanced Policy Studies, the Carnegie Endowment for International Peace, the U.S. National Defense University, and the RAND Corporation. This books offers a complete picture of where the Chinese air force is today, where it has come from, and most importantly, where it is headed.

**Red Eagles** Steve Davies, 2012-01-24 When two Navy F-14 Tomcats engaged and shot down two Sukhoi Su-22 jet fighters in 1981, they drew on experience and tactics that they had learned from a previous encounter with MiG jet fighters. The difference between the two encounters was that in the first, the enemy fighters were flown by American pilots assigned to a top secret squadron hidden at a remote airfield in the ultra-secret Tonopah Nuclear Test range, Nevada. In the second, the Sukhoi fighters were flown by Libyan pilots attempting to enforce Colonel Qadaffi's 'Line of Death' over the Gulf of Sidra. From the mid-1960s until the end of the Cold War, the United States Air Force acquired and flew Russian-made MiG jets, eventually creating a secret squadron dedicated to exposing American fighter pilots to enemy MiGs. Following underperformance in the Vietnam War, the USAF began to study MiGs in order to improve fighter pilot training. This then developed into the black Constant Peg program. In this program, MiGs were secretly acquired, and made airworthy, a difficult task without manuals or parts. A secret base was

found to operate the planes from; and then ace pilots were found and trained to not only fly the assets, but fly them as they were flown by America's enemies. Finally, a program of exposing American fighter pilots to the MiGs was developed. In all, more than 1,600 American fighter pilots would train against America's secret MiGs between 1974 and 1989. Uncovering the story of the secret MiGs in America during the Cold War, and specifically Constant Peg and the 4477th Test & Evaluation Squadron, is a challenge because much of the information has been destroyed, or remains classified. To piece together the story of this group of men who provided America's fighter pilots with a level of training that was the stuff of dreams, author Steve Davies has interviewed over thirty of the Red Eagle pilots, along with other members of the squadron. This paperback edition includes new material on HAVE IDEA and other HAVE programs; making the MiGs airworthy in 1977 from the maintainers' perspective; and the intelligence activities of MiG expert at the Foreign Technology Division Mike Coyle. The result is a fascinating glimpse into a black program that enabled American fighter pilots to go into combat having already met and defeated their first MiG. Hardcover edition ISBN: 9781846033780

**Mikoyan Mig-19** Dmitriy Komissarov, Yefim Gordon, 2017 Created by the famous Mikoyan Design Bureau in the early 1950s, the MiG-19 fighter was the Soviet Union's first true supersonic fighter that could exceed Mach 1 in level flight. The baseline version with conventional elevators (known to the West as Farmer-A) achieved initial operational capability with the Soviet Air Force as early as 1954, concurrently with its American counterpart, the F-100 Super Sabre. Vertical manoeuvrability was soon found to be inadequate and led the Mikoyan OKB to create a version with an all-flying horizontal tail - the

MiG-19S Farmer-C day fighter, which was built and operated on a much wider scale. The radar-equipped first Soviet supersonic all-weather interceptor, the MiG-19P soon followed together with the MiG-19PM armed with a quartet of beam-riding air-to-air missiles. Special versions also included the SM-50 and SM-51 prototypes equipped with a liquid-fuel rocket booster to improve high-altitude performance and the SM-30 with a zero-length launch capability. In addition to serving its home country, the MiG-19 was exported to the Soviet Union's Warsaw Pact allies including China who created its own variants which had no Soviet equivalent such as the JJ-6 trainer and the radical Q-5 attack aircraft. In this latest book in the Famous Russian Aircraft series, the authors describe the MiG-19's development and its operational history at home and abroad including its involvement in conflicts in Asia and the Middle East. Over 600 black and white and colour photos, many hitherto unpublished combine with colour side views and cutaway drawings to provide a detailed insight for historians and modellers alike.

*Korean War Aces* Robert F Dorr, 2013-01-20 The first virtually all-jet war, the conflict in Korea saw F-86 Sabres of the USAF take on MiG-15s of the North Korean and Chinese air forces. Although the Allied pilots were initially taken aback by the ability of the communist fighter in combat, sound training and skilful leadership soon enabled Sabre pilots to dominate the dogfights over the Yalu River. In all 39 F-86 pilots achieved ace status, and a number of these are profiled in this volume, as are notable pilots from the US Navy, Marine Corps and Royal Navy and, for the first time, the handful of MiG-15 aces.

**The Chief Culprit** Viktor Suvorov, 2013-03-15 Bestselling author Victor Suvorov probes newly released Soviet documents and reevaluates existing

material to analyze Stalin's strategic design to conquer Europe and the reasons behind his controversial support for Nazi Germany. A former Soviet army intelligence officer, the author explains that Stalin's strategy leading up to World War II grew from Vladimir Lenin's belief that if World War I did not ignite the worldwide Communist revolution, then a second world war would be needed to achieve it. Stalin saw Nazi Germany as the power that would fight and weaken capitalist countries so that Soviet armies could then sweep across Europe. Suvorov reveals how Stalin conspired with German leaders to bypass the Versailles Treaty, which forbade German rearmament, and secretly trained German engineers and officers and provided bases and factories for war. He also calls attention to the 1939 nonaggression pact between the Soviet Union and Germany that allowed Hitler to proceed with his plans to invade Poland, fomenting war in Europe. Suvorov debunks the theory that Stalin was duped by Hitler and that the Soviet Union was a victim of Nazi aggression. Instead, he makes the case that Stalin neither feared Hitler nor mistakenly trusted him. Suvorov maintains that after Germany occupied Poland, defeated France, and started to prepare for an invasion of Great Britain, Hitler's intelligence services detected the Soviet Union's preparations for a major war against Germany. This detection, he argues, led to Germany's preemptive war plan and the launch of an invasion of the USSR. Stalin emerges from the pages of this book as a diabolical genius consumed by visions of a worldwide Communist revolution at any cost—a leader who wooed Hitler and Germany in his own effort to conquer the world. In contradicting traditional theories about Soviet planning, the book is certain to provoke debate among historians throughout the world.

Tupolev Tu-16 Badger Yefim Gordon, Vladimir Rigmant, 2004-06-21 The

establishment of NATO posed the need for the Soviet war machine to create a fast jet bomber capable of reaching targets throughout Western Europe and combatting the carrier task forces with which the US Navy could throw its weight around the world. The basic Tu-16 which first flew in the mid-1950s was developed into nearly 50 versions adopted for various roles, including nuclear-capable bombers, anti-shipping missile strike aircraft, torpedo-bombers and minelayers, numerous reconnaissance and ECM variants, assorted development aircraft for testing new engines, avionics and systems. The Tu-16 even found civil uses as a fast mailplane and a weather research/rainmaking aircraft! The Badger, as the bomber was known to the West, served as the basis for the Soviet Union's first jet airliner, the Tu-104. The nearly 1,500 Tu-16s built in the Soviet Union were an important factor in preventing all-out military confrontation between the East and the West. Since the mid-1950s and until the 1980s the Badger has been a regular picture on the pages of the Western press, snooping around Western naval groups every now and then. The type also had its share of 'hot' wars, getting its baptism of fire in the Six-Day War of 1967. Apart from three factories in the USSR, the Tu-16 was built under license in China as the H-6 and remains in service with the People's Liberation Army Air Force. Other foreign users were Egypt, Indonesia and Iraq. All known versions are described and a full account is given of the Tu-16's operational career in the USSR and abroad during the Cold War and in the days after that when many of the surviving Badgers were used as target drones. The book features many previously unpublished photos and a detailed production list.

**The Spy Who Changed History** Svetlana Lokhova, 2019-10-01 On a sunny September day in 1931, Soviet spy Stanislav Shumovsky walked down the

gangplank of the SS Europa and into New York, concealed in a group of 65 Soviet students. Joseph Stalin had sent him to acquire American secrets to help close the USSR's yawning technology gap, and the road to victory began in the classrooms and laboratories of MIT. Using information gleaned from this mission, the USSR first transformed itself into a military powerhouse able to defeat Nazi Germany. Then in 1947, American innovation exfiltrated by Shumovsky made it possible to build and unveil the most advanced strategic bomber in the world. Later, other MIT-trained Soviet spies would go on to acquire the secrets of the Manhattan Project. In this thrilling history, Svetlana Lokhova takes the reader on a journey through Stalin's most audacious intelligence operation, piecing together every aspect of Shumovsky's life and character using information derived from American and Russian archives.
