Mikoyan-Gurevich MiG-21 Pilot's Flight Operating Instructions Nato,2008-09 The Mikoyan-Gurevich MiG-21 is known in NATO circles as the 'Fishbed'. Designed as a Mach 2.0 interceptor, the plane holds the distinction of being produced in greater numbers than any other jet aircraft. The Fishbed flew in combat in Vietnam, where it held its own against the F-105 Thunderchief. During the 1973 Arab-Israeli War, 17 Israeli aircraft were shot down, for a loss of six Egyptian MiG-21s. The plane also flew in combat in the Indo-Pakistani War of 1971, during the Soviet invasion of Afghanistan, and in Yugoslavia. Today, over 28 of the world's air forces continue to fly MiG-21s. Originally printed by NATO, this English-language handbook provides a glimpse inside the cockpit of this incredible plane. The manual was recently declassified and is here reprinted in book form. Care has been taken to preserve the integrity of the text

The MiG-21 Holger Müller,Motorbuch,2019-01-28 This book presents a detailed look at the design and development of the legendary MiG-21, including its powerplant, armament, upgrades, and variants. The Mikoyan-Gurevich MiG-21 was the standard fighter/interceptor aircraft of the Warsaw Pact and it stood up to its western counterparts for decades. This single-engine, supersonic jet fighter entered service in 1959, and in addition to the Soviet Union, almost every eastern European military operated the Mach 2 fighter, including East Germany (which flew more than 500 aircraft of this type), Poland, Romania, Yugoslavia, and others. With approximately 11,000 of all types built, the MiG-21 has been produced in greater numbers than almost any other combat aircraft in history, and has also seen combat with such countries as Vietnam, China, Syria, Iraq, Angola, and others.

Mikoyan-Gurevich MiG-21 Alexander Mladenov,2014-06-17 The MiG-21, nicknamed 'Fishbed' by NATO, was the primary Soviet jet fighter from 1972 onward, opposing the F-15 Eagle and F-14 Tomcat worldwide in a variety of conflicts. The MiG-21 firmly holds the title of the world's most widely built and used jet fighter, with over 10,000 units rolling off the lines of three plants in the former Soviet Union. The type was also built under license in India and Czechoslovakia, and without license in China until the late 2000s. Designed as a Mach-2 light tactical fighter, its original prototype, the Ye-6/1, was first flown in 1958. The first production variant of the type, designated the MiG-21F, appeared in 1960 and its improved sub-variant, the MiG-21F-13 (Type 74, NATO reporting name Fishbed-C), was made available for export by 1961. It was a simplified daytime short-range, clear-weather interceptor and tactical fighter. The MiG-21F-13 featured a relatively weak armament of just two R-3S air-to-air missiles (AA-2 Atoll, a slightly improved reverse-engineered copy of the AIM-9B Sidewinder heat-seeking AAM) with an effective range at low altitude of between 0.27nm/0.5km and 1.1nm/2km. According to its pilots, the MiG-21F-13 was an excellent clear-day interceptor though it had limited combat radius and poor night capability. The light and agile aircraft was designed from the outset to intercept transonic/supersonic bombers and tactical fighters at all altitudes, up to 66,000ft. The MiG-21bis was the last version of the type that took the air for the first time in 1969, with the first production examples rolling off the line in 1972. The MiG-21bis featured a strengthened fuselage, optimised for low-level air combat and ground attack. It was powered by the upgraded R-25-300 turbojet, rated at 40.2kN (9,038lb) dry and 69.65kN (15,653lb) with reheat, featuring a three-minute emergency reheat rating of 97 kN (21,790 lb) at low level. Pilots noted, however, that the heavier 'bis' was much less agile than the MiG-21PF/PFM, and that it behaved like a bull in the air while flying the MiG-21PFM was like riding a stallion. The MiG-21bis was a successful combination of a 1960s airframe and powerplant fitted with a 1970s-vintage analog avionics suite and modern dogfight missiles. By the mid-1980s, although it retained the principal shortcomings of its predecessors - limited operational radius and radar range, lack of beyond-visual-range missiles, poor pilot visibility, mediocre slow speed handling characteristics and high pilot workload, requiring hard training and concentration during the entire sortie - it proved to be an inexpensive and widely popular combat aircraft.

Mikoyan-Gurevich Mig-21 Theodore Gianna,2023-02-14 The MiG-21 was the first supersonic fighter from the Soviet Union. It was first built in the mid-1950s, around the same time as the US Century Series jet fighters, the F-100, F-101, F-102, F-104, F-105, and F-106. However, the MiG 21 would outlive all those fighters. The three largest MiG factories in the USSR manufactured the MiG-21s in many variants. The Moscow Gorki plant (no.21) saw the most extensive production; 5,278 units. The second facility, also in Moscow, was the 'Znamya Truda' (Moscow Aircraft Production Association) plant, which produced 3,203 units, and the no. 31 plant in Tbilisi, Georgia, built 1,677 units. Production lasted 27 years, from 1959 until 1986. MiG fighters for internal and export use totaled an amazing 10,158 MiG-21s built, including the last of a great breed, 2,030 MiG-21bis fighters, and 1,133 MiG-21 UM 'Mongol' training versions. It was the most mass-produced supersonic fighter aircraft in aviation history, and it still holds that title.Although the MiG-21 was an excellent jet fighter, one aircraft had its measure, the McDonnell Douglas F-4 Phantom. The air battles that took place between the two rival jets during the long Vietnam conflict are legendary. This book devotes a section on the MiG's operations in the Vietnam War.

Silver Birds Over the Estuary Bojan Dimitrijevic,Milan Micevski,2020-06-19 The Mikoyan i Gurevich MiG-21 has been built in greater numbers than any other combat aircraft since 1945. It also saw service with more air forces than any other type manufactured over the last 70 years.Locally designated the 'L' (for Lovac or fighter), for more than half a century over 260 MiG-21s in 12 different versions and sub-variants formed the backbone of the Yugoslav Air Force and Air Defence Force (JRV i PVO) and later the Serbian Air Force (RV i PVO).Entering service at the peak of the Cold War, the MiG-21 quickly replaced the US-supplied North American F-86E and F-86D Sabres in the Yugoslav inventory. The first version, MiG-21F-13, was followed by the MiG-21PFM in 1967, and MiG-21M/MF in 1970. Serving with the 204th Fighter Regiment, the task of these fighters was the air defence of Belgrade, capital of Yugoslavia.Whenever a new and more advanced variant became available, older types were handed over to other units. This is how the 117th Fighter Regiment came into being, based at the famous underground air base outside the town of Bihac. The Pristina-based 83rd Fighter Regiment followed in 1972.In Tito's Yugoslavia, the MiG-21 was also deployed for strategic reconnaissance. In 1968-1969, the JRV i PVO introduced the MiG-21R to service, which became the primary photo- and electronic reconnaissance platform of the entire military. The importance of the fleet was further increased in 1984, when US-made Fairchild KA-112 LORAP containers were added to their arsenal.The final and most widely used version became the MiG-21bis, delivered to Yugoslavia in the 1977-1983 period. By the time of the dissolution of the country, in 1991-1992, it formed the backbone of the fleet and saw intensive combat service as a fighter-bomber during the conflicts in Slovenia, Croatia, and Bosnia and Herzegovina. Of particular interest during this period was the widespread use of diverse ordnance of native and NATO-origins.While operated by the RV i PVO, MiG-21s did not fly any combat sorties during NATO's campaign against the Federal Republic of Yugoslavia of 1999 - better known as the 'Kosovo War'. Nevertheless, it was intensively targeted by NATO's air power, resulting in destruction of nearly half the fleet.Although subsequently considered 'obsolete', and operated in continuously declining numbers, the MiG-21bis continued soldiering on with the RV i PVO, and even maintained quick reaction alert duty until late 2015, when officially retired. The final handful of two-seat conversion trainers is still in service as this volume is prepared.The book is based upon the author's extensive research in Serbian and Croatian archives, museums and interviews with veterans that flew this type. Most of the photos in this volume have never been published before.

Mig-23 Mf Krzysztof Barcz,Dariusz Warsaw,2010-01-05 * Includes free decals and masking foil * Packed with color photos The Mikoyan-Gurevich MiG-23 is a swing-wing fighter aircraft, designed by the Mikoyan-Gurevich bureau in the Soviet Union. It is considered to belong to the Soviet Third Generation aircraft category along with similar-aged Russian-produced fighters such as the MiG-25 Foxbat. It was the first Soviet fighter with a look-down/shoot-down radar and beyond visual range missiles, and the first MiG production fighter plane to have intakes at the sides of the fuselage. Production started in 1970 and reached large numbers with over 5,000 aircraft built. Today the MiG-23 remains in limited service with various export customers. This album of detailed photographs is invaluable for the modeler or enthusiast alike. About the Series This is a classic series of highly illustrated books on the best machines of war, with several hundred photographs of each aircraft or vehicle. With close-up views of the key features of each machine, including its variations,

markings and modifications, customizing and creating a model has never been easier. Includes extra features such as decals and masking foil.

The Mikoyan-Gurevich Mig-3 Vol. I Dariusz Paduch,2022-01-31 The MiG-3 fighter plane, like the history of the creation of the Mikoyan and Gurevich (Микоян и Гуревич) design bureau, is relatively well known to anyone interested in the history of Soviet aviation. Many books and articles have been published about this machine, but information about the circumstances of the birth of the project and the conditions of its creation are very brief and concise. MiG-1 and MiG-3 were the most numerous new generation fighters in Soviet aviation at the time of the German invasion of the USSR. They played a very important role in the first period of the war. Until now, it has been assumed in the literature that this applies mainly to the use of these aircraft during the battle of Moscow, as well as capital's and Leningrad's air defense, but MiGs also took on a large weight of air combat at the front in 1941.

Mikoyan Gurevitch Mig-17 Dariusz Karnas,2015 12 pages of 1/72, 1/48 and 1/32 scale plans for all variants of the MiG-17, including the Polish-built versions in the Polish Air Force. The MiG-17 was a subsonic fighter aircraft produced in the USSR from 1952 and operated by numerous air forces in many variants.

Mikoyan Gurevich MiG-15 Dariusz Karnas,2014 This book is a true modeler's reference, covering all aspects of the MiG-15 from production to service use in a concise and accessible way. The text description is well supported with line diagrams and photographs to highlight the many changes made over the production run of Russia's first mass-produced jet fighter. Details of both Russian and license production in Poland, Czechoslovakia and China, where unique variations occurred, are also provided. Amongst many tables in the book covering production lots, factories and the real value of this book are pages of detailed photographs and technical drawings. From fuselage to wings, tail, cockpit and armament, nothing is ignored. For anyone who plans to build a MiG-15 in scale form, and there have been many choices released in recent years, this book is an essential source of reference. It contains scale plans in 1/72nd, 1/48th and 1/35th scales; photos and drawings from Technical Manuals; superb color illustrations of camouflage and markings; rare b/w archive photographs; color photos of preserved aircraft. Essential reading for aviation historians, enthusiasts & scale modelers.

Mikoyan MiG-21 E. Gordon,Yefim Gordon,Keith Dexter,2008 The book has detailed colour profiles and squadron markings, which will attract the interest of the scale modeller and the serious aviation historian and will become regarded as the definitive account of one of the most influential jet aircraft to have been produced during the Cold War era.

Mikoyan Gurevich MiG-21 Fishbed E. Gordon,Yefim Gordon,Peter Davison,2007-02 Covers all MiG-21 upgrades and variants, as well as combat and armament specifications. Over 300 photos are used to illustrate the story of the MiG-21. It features technical diagrams and gives a comprehensive development history, as well as covering design, structural detail, international production, trials, comparisons, and more.

F-35b V2. 0 Glenn Hoover,2018-10-27 This book contains detailed instructions on building the F-35B Lightning II 1/48 scale model aircraft from Kitty Hawk. This book covers VERSION 2.0 of the model. If the box on your model kit does not say Version 2.0 then you need my other book for the initial version. A spiral bound version is also available on my website. (glennhoovermodels.com) The F-35 Fighter Aircraft has three versions. The F-35A is for the Air Force. The F-35C is for the Navy and has a longer wingspan that can fold for carrier operations. The F-35B is for the Marines and can perform vertical takeoffs and landings. The F-35B Model is the most complex if you want to display its VSTOL capability that has many open access panels. I take the model kit instructions from Kitty Hawk and break them up into individual steps. I reorder the steps so that the small pieces (antennas, etc.) are assembled last which reduces the risk of damage when building the model. The steps are organized to insert the paint and decal steps in the best spot. This book provides a little history of the F-35B, photos of the model kit contents including the photo etch frets, a detailed list of tools that I used to build this model, along with a list of paints. The actual instruction section contains 649 steps that tells you what to dry fit, glue, and/or paint for each individual piece. Each step instruction shows the source (section) along with a block for you to mark that you completed the step. If the last column contains an X, that means there's a photo in the back with more details about the step. The major instruction sequence for this model is 1. Ejection Seat & Ladder (Build) 2. Instrument Panels 3. Nose Gear Wheel Well 4. Engine 5. Engine Exhaust Nozzle (Build) 6. Main Landing Gear Wheel Wells 7. Lower Lift Fan Intake 8. Fuselage and Wings Assembly, Paint, and Decals 9. Internal Weapons 10. Nose and Main Landing Gear 11. Engine Exhaust Nozzle (Install) 12. Doors (Flare/Chaff, Engine Exhaust, Weapons Bay) 13. Doors (Nose and Main Landing Gear) 14. External Missiles 15. Vent and Lift Fan Doors (Top) 16. Tails (Decals) 17. Speed Brake and Antenna 18. Cockpit Detail 19. Ejection Seat (Install) 20. Canopy, Pitot Tubes, & Ladder I provide an index of the individual sprue parts that show where in the book the part is mentioned. This index was a great way to make sure that no pieces were overlooked. Finally, there are several pages of in-process photos with assembly tips and the final photos of my build. This book is a great checklist to make your build go smoothly. Of course, you can feel free to use different tools, paint, weathering, etc. or even add your own diorama. It took me several weeks write the first cut of this book then another 2 months to do the actual build to test my instructions. I make tweaks to improve the instructions and add the photos. I did a lot of research and didn't see anything this detailed about a model build. Most articles or videos concentrate on parts of their build or just give a summary review. I wanted to go down to the piece level and take you thru the whole build. This is a nice tool. If you have this F-35B V2 model kit and get this book, you can dive right into the build with confidence. See a 16 page sample along with photos of finished models and other books at glennhoovermodels.com.

Mikoyan Gurevich MiG-19P & PM, MiG-21F-13 Lechoslaw Musialkowski,2018-05-28 The first supersonic fighter in the Polish Air Force, MiG-19 and the first version of the MiG-21F-13 are described in the unparalleled details. Many unpublished photos from the private collections. Colour schemes and markings are described and illustrated in a series of specially commissioned colour profiles.

Mikoyan-Gurevitch MIG 15 & 17 Gérard Paloque,2014 At the beginning of the Korean War, the west discovered the MiG-15, the first mass-produced jet fighter built in the Soviet Union. This small device entered service at the end of 1950 in its improved version, the MiG-15bis, and in turn was quickly deployed to Korea where, with its powerful armament and handling, it was an unpleasant surprise for the forces of the United Nations, after finding their air superiority with the arrival of the latest version of the famous F-86 Sabre. While the bundle - a nickname given by NATO to the MiG-15 - was barely in use, MiG conceived its successor, the more efficient and wing modified MiG-17 (Fresco). The type was withdrawn from service in the USSR in the late sixties, however it had great success abroad. The Fresco was the most exported Soviet fighter until the arrival of its indirect successor, MiG-21 (see Planes & Pilots No. 12).

Foxbat Tales Mike Guardia,2020-07-31 From the Middle East to the Iron Curtain...the definitive combat history of the Mikoyan-Gurevich MiG-25. July 1967: At the Moscow Air Show, the Soviets unveiled six new state-of-the-art aircraft. From among this lineup of new fighters and interceptors stood the Mikoyan-Gurevich MiG-25-purportedly capable of outrunning and outmaneuvering any aircraft in NATO's inventory. Yet even before its public appearance in Moscow, the MiG-25 had been a grave concern for Western analysts. Indeed, this new interceptor could fly at speeds in excess of Mach 3 and cruise at altitudes heretofore deemed unreachable for a tactical fighter. Moreover, NATO's intelligence community was baffled by how the Soviet Union had cobbled together such a masterpiece of modern engineering. The reality, however, was that this interceptor was a poorly-designed airframe with an oversized motor. Although it excelled as a reconnaissance aircraft, it fared poorly as a dogfighter - and it was typically the loser when pitted against Western aircraft like the F-14 Tomcat and F-15 Eagle. From the Sinai Peninsula...to the Soviet-Afghan War...to Operation Desert Storm, Foxbat Tales is the definitive operational and combat history of the MiG-25.

Visual Aircraft Recognition U. S. Army,2013-01-14 This manual is primarily a ready reference to assist the ground observer in aircraft recognition and identification. It provides information on current operational aircraft of the United States and foreign countries, which may be observed worldwide in the combat area. It can be used as source material for personnel conducting unit training in visual aircraft recognition. The procedures in this publication apply throughout the US Army. The data is based on the best information available at the time of publication; however, it is not all-inclusive because of some classification guidelines. This

publication, by nature, has a built-in time lag, and some aircraft may still be under development or classified at the time of writing, but may be fielded or unclassified at, or after, publication.

Soviet X-planes Gordon Yefim,E. Gordon,Bill Gunston,2000 This is the first book to collect stories of the most important Soviet aircraft, including experimental machines from the early 1900s through to the latest Russian prototypes of today. About 150 types are described, each with data and many with extensive drawings.
