Understanding Cyber Conflict George

Perkovich,Ariel Levite,2017 Analogies help us think, learn, and communicate. The fourteen case studies in this volume help readers make sense of contemporary cyber conflict through historical analogies to past military-technological problems. The chapters are divided into three groups. The first--What Are Cyber Weapons Like?--examines the characteristics of cyber capabilities and how their use for intelligence gathering, signaling, and precision strike compares with earlier technologies for such missions. The second section--What Might Cyber Wars Be Like?--explores how lessons from several wars since the early 19th century, including the World Wars, could apply or not apply to cyber conflict in the 21st century. The final section--What Is Preventing and/or Managing Cyber Conflict Like?--offers lessons from 19th and 20th century cases of managing threatening actors and technologies.

A New Direction for China's Defense Industry

Evan S. Medeiros,Roger Cliff,Keith Crane,James C. Mulvenon,2005-12-19 Since the early 1980s, a prominent and consistent conclusion drawn from research on China's defense-industrial complex has been that China's defense-production capabilities are rife with weaknesses and limitations. This study argues for an alternative approach: From the vantage point of 2005, it is time to shift the focus of current research to the gradual

improvements in and the future potential of China's defense-industrial complex. The study found that China's defense sectors are designing and producing a wide range of increasingly advanced weapons that, in the short term, are relevant to a possible conflict over Taiwan but also to China's long-term military presence in Asia. Part of a larger RAND Project AIR FORCE study on Chinese military modernization, this study examines the current and future capabilities of China's defense industry. The goals of this study are to 1.

Russia and the Arms Trade Ian Anthony, Stockholm International Peace Research Institute, 1998 For this study, a group of Russian authors were commissioned to describe and assess the arms trade policies and practices of Russia under new domestic and international conditions. The contributors, drawn from the government, industry, and academic communities, offer a wide range of reports on the political, military, economic, and industrial implications of Russian arms transfers, as well as specific case studies of key bilateral arms transfer relationships.

Shaking the Heavens and Splitting the Earth Roger Cliff, 2011 Less than a decade ago, China's air force was an antiquated service equipped almost exclusively with weapons based on 1950s-era Soviet designs and operated by personnel with questionable training according to outdated employment concepts. Today, the People's Liberation Army Air Force (PLAAF) appears to be on its way to becoming a modern, highly capable air force for the 21st century. This monograph analyzes publications of the Chinese military, previously published Western analyses of China's air force, and information available in published sources about current and future capabilities of the PLAAF. It describes the concepts for employing forces that the PLAAF is likely to implement in the future, analyzes how those concepts might be realized in a conflict over Taiwan, assesses the implications of China implementing these concepts, and provides recommendations about actions that should be taken in response.

Made to Break Giles Slade,2009-06-30 *Made to Break* is a history of twentieth-century technology as seen through the prism of obsolescence. Giles Slade explains how disposability was a necessary condition for America's rejection of tradition and our acceptance of change and impermanence. This book gives us a detailed and harrowing picture of how, by choosing to support ever-shorter product lives, we may well be shortening the future of our way of life as well.

Arms Watch Edward J. Laurance,Siemon T.

Wezeman,Herbert Wulf,1993 This report documents the government submissions to the UN on the transfer of arms in seven weapons categories in 1992 and compares this data with information published by SIPRI in its arms trade register. It assesses the results of the UN register and the prospects for improving it in 1994.

Shipboard Operations H I Lavery,2013-10-11 This book covers the knowledge of shipboard operations required by candidates for professional qualification as Chief Officer and Master Mariner. It deals with the basic routines and procedures, and the many regulations governing their use, for the safe and efficient operation of merchant ships. The book is also designated a fundamental text for the Maritime Transport paper of the

Chartered Institute of Transport's membership examinations. The second edition takes into account recent developments in technology and regulation, and in particular covers major international legislation on Safety of Life at Sea and on Maritime Pollution as well as recent UK regulations on occupational health and safety and on operation of ro-ro ferries.

An Introduction to Ethics in Robotics and AI
Christoph Bartneck, Christoph Lütge, Alan Wagner, Sean Welsh, 2020-08-11 This open access book introduces the reader to the foundations of AI and ethics. It discusses issues of trust, responsibility, liability, privacy and risk. It focuses on the interaction between people and the AI systems and Robotics they use. Designed to be accessible for a broad audience, reading this book does not require prerequisite technical, legal or philosophical expertise. Throughout, the authors use examples to illustrate the issues at hand and conclude the book with a discussion on the application areas of AI and Robotics, in particular autonomous vehicles, automatic weapon systems and biased algorithms. A list of questions and further readings is also included for students willing to explore the topic further.

Viper Pilot Dan Hampton, 2012-10-02 THE NEW YORK TIMES BESTSELLING MEMOIR OF 21ST-CENTURY AIR COMBAT, BY ONE OF THE MOST DECORATED PILOTS IN AIR FORCE HISTORY (NEW YORK POST) 151 combat missions 21 hard kills on surface -to -air missile sites 4 Distinguished Flying Crosses with Valor 1 Purple Heart First into a war zone, flying behind enemy lines to purposely draw fire, the wild weasels are

elite fighter squadrons with the most dangerous job in the Air Force. One of the greatest aviation memoirs ever written, *Viper Pilot* is an Air Force legend's thrilling eyewitness account of modern air warfare. For twenty years, Lieutenant Colonel Dan Hampton was a leading member of the Wild Weasels, logging 608 combat hours in the world's most iconic fighter jet: the F-16 Fighting Falcon, or Viper. He spearheaded the 2003 invasion of Iraq, leading the first flight of fighters over the border en route to strike Baghdad. Earlier, on 9/11, Hampton's father was inside the Pentagon when it was attacked; with his dad's fate unknown, Hampton was scrambled into American skies and given the unprecedented orders to shoot down any unidentified aircraft. *Viper Pilot* is an unforgettable look into the closed world of fighter pilots and modern air combat.
