The Handbook of Developmentally Appropriate Toys Doris Bergen,2021-02-25 The handbook is composed of chapters by authors who discuss the important features of particular types of toys, provide information related to the developmental importance of this type of toy, discuss social and cultural issues engendered by play with such toys, and review the available research on the characteristics and potential impact on children’s developmental progress of toys of that type. Both traditional toys and technological toys are discussed. The handbook is expected to serve both as a reference for educators, parents, toy designers, and other interested readers, and as a catalyst for further research and ongoing toy development. Its purpose includes helping readers to gain knowledge that enables them to more fully appreciate the value of children’s toy play, find out more about the favorite toys they had in childhood and relive those satisfying play experiences, and learn how to foster the learning, physical development, and social-emotional growth that comes from such toy play.

Trauma-Proofing Your Kids Peter A. Levine, Ph.D.,Maggie Kline,2014-09-16 Now in 15 languages. Understand the different types of upsets and traumas your child may experience—and learn how to teach them how to be resilient, confident, and even joyful. The number of anxious, depressed, hyperactive and withdrawn children is staggering—and still growing! Millions have experienced bullying, violence (real or in the media), abuse or sexual molestation. Many other kids have been traumatized from more “ordinary” ordeals such as terrifying medical procedures, accidents, loss and divorce. Trauma-Proofing Your Kids sends a lifeline to parents who wonder how they can help their worried and troubled children now. It offers simple but powerful tools to keep children safe from danger and to help them “bounce back” after feeling scared and overwhelmed. No longer will kids have to be passive prey to predators or the innocent victims of life’s circumstances. In addition to arming parents with priceless protective strategies, best-selling authors Dr. Peter A. Levine and Maggie Kline offer an antidote to trauma and a recipe for creating resilient kids no matter what misfortune has besieged them. Trauma-Proofing Your Kids is a treasure trove of simple-to-follow “stress-busting,” boundary-setting, sensory/motor-awareness activities that counteract trauma’s effect on a child’s body, mind and spirit. Including a chapter on how to navigate the inevitable difficulties that arise during the various ages and stages of development, this ground-breaking book simplifies an often mystifying and complex subject, empowering parents to raise truly confident and joyful kids despite stressful and turbulent times.

Talk Box Lyn Dawes,Claire Sams,2017-06-14 Talk Box supports teachers implementing the new curriculum, who are looking for fresh ideas with a focus on teaching talk skills, encouraging discussion and developing articulate children. It sets out different types of teaching involving children learning collaboratively through discussion with peers and centres on step-by-step lesson plans to develop hidden potential across the entire classroom. At the heart of the lesson plans is the ‘talk box’ - a collection of interesting objects which provide a focus for class discussion and where the activities are based on these linked ideas: • Young children need their teachers to help them make sense of the world; • The most effective medium for explaining, discussing, describing with children, is talk; • Children learn very well from one another when taught how to do so, and are a good resource for one another in the classroom; • Children may be able to talk, but they are not often aware what sort of talk can help them to get the best from their education; • Direct teaching of essential talk skills and understanding is straightforward and should be undertaken in school classrooms. The numerous lesson plans included in this book are each built around specific learning objectives for speaking and listening and cover subjects such as literacy, numeracy, science, citizenship, ICT and Computing. Each lesson includes a resources list and photocopiable worksheets and range from whole class to small group work. This book will help you teach children to engage in the educationally effective kind of discussion known as Exploratory Talk, where everyone’s viewpoint is considered, opinions are justified with reasons, and decisions are made together. This new edition includes updated curriculum links, new research findings, a home-school link section and contain additional EAL and SEN materials.
