**Very Special Ships** Arthur Nicholson, 2015-10-30 Very Special Ships is the first full-length book about the six Abdiel-class fast minelayers, the fastest and most versatile ships to serve in the Royal Navy in the Second World War. They operated not only as offensive minelayers — dashing into enemy waters under cover of darkness — but in many other roles, most famously as blockade runners to Malta. In lieu of mines, they transported items as diverse as ammunition, condensed milk, gold, and VIPs. Distinguished by their three funnels, the Abdiels were attractive, well-designed ships, and they were also unique — no other navy had such ships, and so they were sought-after commands and blessed with fine captains. To give the fullest picture of this important class of ships, the book details the origins and history of mines, minelayers, and minelaying; covers the origins and design of the class; describes the construction of each of the six ships, and the modified design of the last two; tells in detail of the operational careers of the ships in the second World War, when they played vital roles in the battle of Crete and the siege of Malta, plied the hazardous route to Tobruk, and laid mines off the Italian coast. The post-war careers of the surviving ships is also documented. Written to appeal to naval enthusiasts, students of World War II and modelmakers, the author tells the story of these ships through first-hand accounts, official sources, and specially-commissioned drawings and photographs.

**A15 Cruiser Mk.VI Crusader Tank A Technical History** P. M. Knight, 2015-05-17 There can be few tanks that have proved as controversial in their deployment as the Crusader, a tank that was invested with high hopes on its entry into service in 1941. This book investigates in unprecedented detail the issues that impinged on its service life. Drawing extensively on original archive sources, a new perspective is drawn on both the employment of the tank itself, and on British tank development of the era. The complex story that unfolds encompasses many interwoven and sometimes contradictory threads, allowing the author to reach both perceptive and surprising conclusions.

**New York Magazine**, 1997-12-08 New York magazine was born in 1968 after a run as an insert of the New York Herald Tribune and quickly made a place for itself as the trusted resource for readers across the country. With award-winning writing and photography covering everything from politics and food to theater and fashion, the magazine's consistent mission has been to reflect back to its audience the energy and excitement of the city itself, while celebrating New York as both a place and an idea.

**Blood and Ruins** Richard Overy, 2021-08-26 A NEW YORK TIMES BESTSELLER WINNER OF THE DUKE OF WELLINGTON MEDAL FOR MILITARY HISTORY SHORTLISTED FOR THE GILDER LEHRMAN PRIZE FOR MILITARY HISTORY 'A masterpiece. It puts all previous single-volume works of the conflict in the shade' Saul David, *The Times* A bold new approach to the Second World War from one of Britain's foremost military historians Richard Overy sets out in *Blood and Ruins* to recast the way in which we view the Second World War and its origins and aftermath. He argues that this was the 'great imperial war', a violent end to almost a century of global imperial expansion which reached its peak in the ambitions of Italy, Germany and Japan in the 1930s and early 1940s, before descending into the largest and costliest war in human history and the end, after 1945, of all territorial empires. How war on a huge scale was fought, supplied, paid for, supported by mass mobilization and morally justified forms the heart of this new account. Above all, Overy explains the bitter cost for those involved in fighting, and the exceptional level of crime and atrocity that marked these imperial projects, the war and its aftermath. This war was as deadly for civilians as it was for the military, a war to the death over the future of the global order. *Blood and Ruins* is a masterpiece from one of the most renowned historians of the Second World War, which will compel us to view the war in novel and unfamiliar ways. Thought-provoking, original and challenging, *Blood and Ruins* sets out to understand the war anew.

*By Schism Rent Asunder* David Weber, 2008-07-22 The sequel to the New York Times best seller *Off Armageddon Reef* The world has changed. The mercantile kingdom of Charis has prevailed over the alliance designed to exterminate it. Armed with better sailing vessels, better guns and better devices of all sorts, Charis faced the combined navies of the rest of the world at Darcos Sound and Armageddon Reef, and broke them. Despite the implacable hostility of the Church of God Awaiting, Charis still stands, still free, still tolerant, still an island of innovation in a world in which the Church has worked for centuries to keep humanity locked at a medieval level of existence. But the powerful men who run the Church aren't going to take their defeat lying down. Charis may control the world's seas, but it barely has an army worthy of the name. And as King Cayleb knows, far too much of the kingdom's recent good fortune is due to the secret manipulations of the being that calls himself Merlin-a being that, the world must not find out too soon, is more than human. A being on whose shoulders rests the last chance for humanity's freedom. Now, as Charis and its archbishop make the rift with Mother Church explicit, the storm gathers. Schism has come to the world of Safehold. Nothing will ever be the same... in David Weber's *By Schism Rent*

**The Smell of Kerosene** National Aeronautics and Space Administration,Donald L. Mallick,Peter W. Merlin,2022-11-13 This book puts the reader in the pilot's seat for a day at the office unlike any other. The Smell of Kerosene tells the dramatic story of a NASA research pilot who logged over 11,000 flight hours in more than 125 types of aircraft. Donald Mallick gives the reader fascinating first-hand description of his early naval flight training, carrier operations, and his research flying career with NASA. After transferring to the NASA Flight Research Center, Mallick became involved with projects that further pushed the boundaries of aerospace technology. These included the giant delta-winged XB-70 supersonic airplane, the wingless M2-F1 lifting body vehicle, and triple-sonic YF-12 Blackbird. Mallick also test flew the Lunar Landing Research Vehicle and helped develop techniques used in training astronauts to land on the Moon.
