**Mikoyan Gurevich MiG-29 Fulcrum** Yefim Gordon,Peter Davison,2005 In the late 1960s the Soviet Union was working on a fourth-generation jet fighter

concept. These aircraft would form the backbone of Warsaw Pact air forces in the next decade. The Soviet aerospace industry began considering enhancing combat capabilities with new air-to-air missiles and a sophisticated weapons control system. Thus the MiG-29 was born. High maneuverability, a high thrust-to-weight ratio, a wide speed range, and special short-range missiles are just a few of the MiG-29's special characteristics. This book extensively covers the concept, variants, upgrades, carrier trials, service, sales, and what the future holds for the MiG-29. Find out how the MiG-29 paved the way for aerodynamic refinements, improved handling, stability, and technological changes that simplified the building process. Learn details on the MiG-29's engine and controls. Powered by two Klimov NPP (Izotov) RD-33 afterburning turbofans rated at 5,040 kgp (11,111 lb st) at full military power, and armed with an internal gun, short- and medium-range air-to-air missiles, unguided rockets, and free-fall bombs, the MiG-29 is truly a marvel in military aircraft. Authors Yefim Gordon and Peter Davison use over 300 photos to illustrate the story of the MiG-29. Topics covered include design, development, structural detail, international production, trials, comparisons, overseas sales, and much more. This book is a must have for all aircraft enthusiasts!

**From Farnborough to Kubinka** Benjamin S.

Lambeth, Rand Corporation, 1991 At the September 1988 Farnborough Air Show, the author met the chief test pilot of the Mikoyan Design Bureau, Valery Menitskii, who had accompanied the Soviet team to supervise the first flight demonstrations of the MiG-29 in the West. That contact led to several more encounters between the author and Menitskii during the ensuing year, culminating in an invitation from Menitskii to the author to fly the MiG-29. On December 15, 1989, the author flew with Menitskii at

Kubinka Air Base near Moscow, thus becoming the first U.S. citizen to fly the MiG-29 and the first Western pilot invited to fly a combat aircraft of any type inside Soviet airspace since the end of World War II. This report documents that experience in detail.

**Aircraft Design Projects** Lloyd R. Jenkinson, Jim Marchman, 2003-04-28 Written with students of aerospace or aeronautical engineering firmly in mind, this is a practical and wide-ranging book that draws together the various theoretical elements of aircraft design - structures, aerodynamics, propulsion, control and others - and guides the reader in applying them in practice. Based on a range of detailed real-life aircraft design projects, including military training, commercial and concept aircraft, the experienced UK and US based authors present engineering students with an essential toolkit and reference to support their own project work. All aircraft projects are unique and it is impossible to provide a template for the work involved in the design process. However, with the knowledge of the steps in the initial design process and of previous experience from similar projects, students will be freer to concentrate on the innovative and analytical aspects of their course project. The authors bring a unique combination of perspectives and experience to this text. It reflects both British and American academic practices in teaching aircraft design. Lloyd Jenkinson has taught aircraft design at both Loughborough and Southampton universities in the UK and Jim Marchman has taught both aircraft and spacecraft design at Virginia Tech in the US. \*

Demonstrates how basic aircraft design processes can be successfully applied in reality \* Case studies allow both student and instructor to examine particular design challenges \* Covers commercial and successful student design projects, and includes over 200 high quality illustrations
