### **Global Players and the Indian Car Industry**

Jatinder Singh, 2018-09-03 This book is one of the first critical analyses of the automobile industry in India. It studies the sector in general and the

passenger car industry in particular, and provides valuable insights into the operation of Foreign Direct Investment (FDI) companies in a technology-intensive industry under changing economic regimes. The volume underlines the influence of the changing nature of foreign investment, the impact of economic reforms, technology regimes and industrial policy on growth, structural changes and development. It offers a detailed account of the trade performance of manufacturers in India's passenger car industry. It also looks at successful cases to draw policy lessons towards encouraging quality FDI and developing India as a base for world production. A useful addition to industry studies in India, this book with its wide coverage and contemporary analyses will interest scholars and researchers of economics, Indian economy and industrial policy, industrial economics, automobile industry and manufacturing sector, development economics and international economics. It will also appeal to policymakers, practitioners and industrial associations.

Injury Epidemiology: Fourth edition Leon S. Robertson, Ph.D., 2015 Research on injuries is a high priority to inform public policy that reduces deaths, hospitalizations and associated costs. Principles for research design and analysis of injury incidence and severity are emphasized. Review of extant surveillance data reveals numerous flaws that must be changed to increase usefulness of the data. Research designs of studies of injury causation and evaluation of countermeasures are often inappropriate and mislead analytic and injury control efforts.

Appendices to chapters illustrate research projects that influenced public policy affecting the reduction of motor vehicle fatalities per population by half in the U.S. The principles illustrated by these studies can be applied to other types of injury.

**Race Car Aerodynamics** J Katz,1996-03-08 The first book to summarize the secrets of the rapidly developing field of high-speed vehicle design. From F1 to Indy Car, Drag and Sedan racing, this book provides clear explanations for engineers who want to improve their design skills and enthusiasts who simply want to understand how their favorite race cars go fast. Explains how aerodynamics win races, why downforce is more important than streamlining and drag reduction, designing wings and venturis, plus wind tunnel designs and more.

Interactive Storytelling Ulrike Spierling, Nicolas Szilas, 2008-11-27 This volume contains scientific papers and case studies presented at Interactive Storytelling '08: The First Joint International Conference on Interactive Digital Storytelling (ICIDS), held November 26–29, 2008, in Erfurt, Germany. Interactive Digital Storytelling (IDS) is a cross-disciplinary topic, which explores new uses of interactive technologies for creating and experiencing narratives. IDS is also a huge step forward in games and learning. This can be seen through its ability to enrich virtual characters with intelligent behavior, to allow collaboration of humans and machines in the creative process, and to combine narrative knowledge and user

activity in interactive artifacts. IDS involves concepts from many aspects of Computer Science, above all from Artificial Intelligence, with topics such as narrative intelligence, automatic dialogue and drama management, and smart graphics. In order to process stories in real time, traditional storytelling needs to be formalized into computable models by drawing from narratological studies. As it is currently hardly accessible for creators and e- users, there is a need for new authoring concepts and tools supporting the creation of such dynamic stories, allowing for rich and meaningful interaction with the content.
