The Ephemeral Museum Francis Haskell,2000-01-01 In this illustrated book, an eminent art historian examines the intriguing history and significance of the international art exhibition of the Old Master paintings.

Then Came the Fire Stephen J. Lofgren,2011-09 Full color illustrations throughout. Two days after the September 11, 2001 attack, the U.S. Army Center of Military History began an extensive project to document the historic event through oral history interviews. Published on the incident's tenth anniversary, *Then Came the Fire* is an anthology of excerpts from those interviews. This collection highlights the personal accounts of participants who witnessed some aspect of the events in the Pentagon that day: the survivors, some of whom were injured; policemen; firefighters; medical personnel; observers; others involved in the rescue and recovery efforts; and building occupants.

*In the Bubble* John Thackara,2006-02-17 How to design a world in which we rely less on stuff, and more on people. We're filling up the world with technology and devices, but we've lost sight of an important question: What is this stuff for? What value does it add to our lives? So asks author John Thackara in his new book, *In the Bubble: Designing for a Complex World*. These are tough questions for the pushers of technology to answer. Our economic system is centered on technology, so it would be no small matter if tech ceased to be an end-in-itself in our daily lives. Technology is not going to go away, but the time to discuss the end it will serve is before we deploy it, not after. We need to ask what purpose will be served by the broadband communications, smart materials, wearable computing, and connected appliances that we're unleashing upon the world. We need to ask what impact all this stuff will have on our daily lives. Who will look after it, and how? *In the Bubble* is about a world based less on stuff and more on people. Thackara describes a transformation that is taking

place now—not in a remote science fiction future; it's not about, as he puts it, the schlock of the new but about radical innovation already emerging in daily life. We are regaining respect for what people can do that technology can't. In the Bubble describes services designed to help people carry out daily activities in new ways. Many of these services involve technology—ranging from body implants to wide-bodied jets. But objects and systems play a supporting role in a people-centered world. The design focus is on services, not things. And new principles—above all, lightness—inform the way these services are designed and used. At the heart of In the Bubble is a belief, informed by a wealth of real-world examples, that ethics and responsibility can inform design decisions without impeding social and technical innovation.

**The Red Circle** Brandon Webb, John David Mann, 2012-04-10 Explosive, revealing, and intelligent, The Red Circle provides a uniquely personal glimpse into one of the most challenging and secretive military training courses in the world. Now including an excerpt from The Killing School: Inside the World's Deadliest Sniper Program BEFORE HE COULD FORGE A BAND OF ELITE WARRIORS... HE HAD TO BECOME ONE HIMSELF. Brandon Webb's experiences in the world's most elite sniper corps are the stuff of legend. From his grueling years of training in Naval Special Operations to his combat tours in the Persian Gulf and Afghanistan, The Red Circle provides a rare and riveting look at the inner workings of the U.S. military through the eyes of a covert operations specialist. Yet it is Webb's distinguished second career as a lead instructor for the shadowy sniper cell and Course Manager of the Navy SEAL Sniper Program that trained some of America's finest and deadliest warriors—including Marcus Luttrell and Chris Kyle—that makes his story so compelling. Luttrell credits Webb's training with his own survival during the ill-fated 2005 Operation Redwing in Afghanistan. Kyle went on to become the U.S. military's top marksman, with more than 150 confirmed kills. From a candid chronicle of his

student days, going through the sniper course himself, to his hair-raising close calls with Taliban and al Qaeda forces in the northern Afghanistan wilderness, to his vivid account of designing new sniper standards and training some of the most accomplished snipers of the twenty-first century, Webb provides a rare look at the making of the Special Operations warriors who are at the forefront of today's military.

**Optimal Distinctiveness** Eric Yanfei Zhao,2022-05-05 Optimal distinctiveness – being both 'similar to' and 'different from' peers – is an important imperative of organizational life and represents a common research question of organizational scholars across various disciplinary domains such as strategy, organization theory, entrepreneurship, and international business. This Element reviews the historical grounding and recent development of optimal distinctiveness scholarship, based on which an orienting framework is proposed to stress the highly contextualized and dynamic nature of optimal distinctiveness. The orienting framework provides several powerful and unique angles for understanding organizations' competitive positioning in various types of markets, for applying optimal distinctiveness research to different levels of analysis, and for nurturing a more cross-disciplinary and mutually generative conversation on optimal distinctiveness theory.

*Maritime Terrorism* Michael D. Greenberg, 2006 Policymakers have become increasingly concerned in recent years about the possibility of future maritime terrorist attacks. Though the historical occurrence of such attacks has been limited, recognition that maritime vessels and facilities may be particularly vulnerable to terrorism has galvanized concerns. In addition, some plausible maritime attacks could have very significant consequences, in the form of mass casualties, severe property damage, and attendant disruption of commerce. Understanding the nature of maritime terrorism risk requires an investigation of threats, vulnerabilities, and consequences associated with potential attacks, as grounded both by relevant historical data and by intelligence on the capabilities and intentions of known terrorist groups. These risks also provide the context for understanding government institutions that will respond to future attacks, and particularly so with regard to the US civil justice system. In principle, civil liability operates to redistribute the harms associated with legally redressable claims, so that related costs are borne by the parties responsible for having caused them. In connection with maritime terrorism, civil liability creates that prospect that independent commercial defendants will be held responsible for damages caused by terrorist attacks. This book explores risks and U.S. civil liability rules as they may apply in the context of these types of attacks.
