Louder and Faster Deborah Wong, 2019-09-10 A free open access ebook is available upon publication. Learn more at [www.luminosoa.org](http://www.luminosoa.org). Louder and Faster is a cultural study of the phenomenon of Asian American taiko, the thundering, athletic drumming tradition that originated in Japan. Immersed in the taiko scene for twenty years, Deborah Wong has witnessed cultural and demographic changes and the exponential growth and expansion of taiko particularly in Southern California. Through her participatory ethnographic work, she reveals a complicated story embedded in memories of Japanese American internment and legacies of imperialism, Asian American identity and politics, a desire to be seen and heard, and the intersection of culture and global capitalism. Exploring the materialities of the drums, costumes, and bodies that make sound, analyzing the relationship of these to capitalist multiculturalism, and investigating the gender politics of taiko, Louder and Faster considers both the promises and pitfalls of music and performance as an antiracist practice. The result is a vivid glimpse of an Asian American presence that is both loud and fragile.

**Twelve Years a Slave** Solomon Northup, 2024-01-04 Filmatized in 2013 and the official recipient of three Oscars, Solomon Northup's powerful slave narrative 'Twelve Years a Slave' depicts Nortup's life as he is sold into slavery after having spent 32 years of his life living as a free man in New York. Working as a travelling musician, Northup goes to Washington D.C, where he is kidnapped,

sent to New Orleans, and sold to a planter to suffer the relentless and brutal life of a slave. After a dozen years, Northup escapes to return to his family and pulls no punches, as he describes his fate and that of so many other black people at the time. It is a harrowing but vitally important book, even today. For further reading on this subject, try 'Uncle Tom's Cabin' by Harriet Beecher Stowe. Solomon Northup (c.1807-c.1875) was an American abolitionist and writer, best remembered for his powerful race memoir 'Twelve Years a Slave'. At the age of 32, when he was a married farmer, father-of-three, violinist and free-born man, he was kidnapped in Washington D.C and shipped to New Orleans, sold to a planter and enslaved for a dozen years. When he gained his freedom, he wrote his famous memoir and spent some years lecturing across the US, on behalf of the abolitionist movement. 'Twelve Years a Slave' was published a year after 'Uncle Tom's Cabin' by Harriet Beecher Stowe and built on the anti-slavery momentum it had developed. Northup's final years are something of a mystery, though it is thought that he struggled to cope with family life after being freed.

*Architecture in Words* Louise

Pelletier, 2006-09-27 What if the house you are about to enter was built with the confessed purpose of seducing you, of creating various sensations destined to touch your soul and make you reflect on who you are? Could architecture have such power? This was the assumption of generations of architects at the beginning of modernity. Exploring the role of theatre and

fiction in defining character in architecture, Louise Pelletier examines how architecture developed to express political and social intent. Applying this to the modern day, Pelletier considers how architects can learn from these eighteenth century attitudes in order to restore architecture's communicative dimension. Through an in-depth and interdisciplinary analysis of the beginning of modernity, Louise Pelletier encourages today's architects to consider the political and linguistic implications of their tools. Combining theory, historical studies and research, *Architecture in Words* will provoke thought and enrich the work of any architect.

*A Tanizaki Feast* Adriana Boscaro, Anthony Chambers, 2020-08-06 This volume presents 18 eighteen essays, written by scholars from six countries, on Tanizaki Jun'ichiro (1886–1965), one of the great writers of the 20th century. The essays were originally prepared for a landmark international symposium in Venice in 1995, at which 22 speakers addressed an audience of about two hundred students and scholars in the Aula

Magna of the University of Venice. Topics include Tanizaki's fiction, plays, and film scenarios; his aesthetics; his place in Japanese intellectual history; his depiction of the West; his use of humor; and film adaptations of his works. In 1964 Tanizaki was elected to honorary membership in the American Academy and Institute of Arts and Letters, the first Japanese to be so honored; and it is widely believed that he was being considered for the Nobel Prize in Literature.

The Noh Theater Kunio Konparu, 2005 This volume is the first work in either English or Japanese to offer a comprehensive explanation and analysis of the principles of the Noh theatre. The book painstakingly outlines both physical and intellectual aspects of Noh, its technical principles and its philosophical perspectives, unknown until now.

**Python for Probability, Statistics, and Machine Learning** José Unpingco, 2019-06-29 This book, fully updated for Python version 3.6+, covers the key ideas that link probability, statistics, and machine learning illustrated using Python modules in these areas. All the figures and numerical results are reproducible using the Python codes provided. The author develops key intuitions in machine learning by working meaningful examples using multiple analytical methods and Python codes, thereby connecting theoretical concepts to concrete implementations. Detailed proofs for certain important results are also provided. Modern Python modules like Pandas, Sympy, Scikit-learn, Tensorflow, and Keras are applied to simulate and visualize important machine learning concepts like the bias/variance trade-off, cross-validation, and regularization. Many abstract

mathematical ideas, such as convergence in probability theory, are developed and illustrated with numerical examples. This updated edition now includes the Fisher Exact Test and the Mann-Whitney-Wilcoxon Test. A new section on survival analysis has been included as well as substantial development of Generalized Linear Models. The new deep learning section for image processing includes an in-depth discussion of gradient descent methods that underpin all deep learning algorithms. As with the prior edition, there are new and updated \*Programming Tips\* that illustrate effective Python modules and methods for scientific programming and machine learning. There are 445 run-able code blocks with corresponding outputs that have been tested for accuracy. Over 158 graphical visualizations (almost all generated using Python) illustrate the concepts that are developed both in code and in mathematics. We also discuss and use key Python modules such as Numpy, Scikit-learn, Sympy, Scipy, Lifelines, CvxPy, Theano, Matplotlib, Pandas, Tensorflow, Statsmodels, and Keras. This book is suitable for anyone with an undergraduate-level exposure to probability, statistics, or machine learning and with rudimentary knowledge of Python programming.

*Drumming Asian America* Angela K. Ahlgren, 2018  
With its dynamic choreographies and booming drumbeats, taiko has gained worldwide popularity since its emergence in 1950s Japan. Harnessed by Japanese Americans in the late 1960s, taiko's sonic largesse and buoyant energy challenged stereotypical images of Asians in America as

either model minorities or sinister foreigners. While the majority of North American taiko players are Asian American, over 400 groups now exist across the US and Canada, and players come from a range of backgrounds. Using ethnographic and historical approaches, combined with in-depth performance description and analysis, this book explores the connections between taiko and Asian American cultural politics. Based on original and archival interviews, as well as the author's extensive experience as a taiko player, this book highlights the Midwest as a site for Asian American cultural production and makes embodied experience central to inquiries about identity, including race, gender, and sexuality. The book builds on insights from the fields of dance studies, ethnomusicology, performance studies, queer and feminist theory, and Asian American studies to argue that taiko players from a variety of identity positions perform Asian America on stage, as well as in rehearsals, festivals, schools, and through interactions with audiences. While many taiko players play simply for the love of its dynamism and physicality, this book demonstrates that politics are built into even the most mundane aspects of rehearsing and performing.
