Scars, Marks & Tattoos Jacqueline Caruso, 2021-03-31 I have physical scars from past surgeries, however, I have emotional scars as well. They were buried deep inside (hidden). It wasn't until my mother died was I able to catch my breath and to make sense of or process the emotional pain I had endured due to her prescription drug addiction, resulting in my own addictions.

Gotterdammerung - Luftwaffe Wrecks and Relics Brett Green, 2006 Many of the photographs in this book were taken by advancing Allied troops in North Africa and Europe from 1942 onwards, others show aircraft shot down over England or come from Germany after the collapse of the Third Reich. They therefore form a valuable repository of information on aircraft, often from lesser-known units, at various stages of the War.

Radar at Sea Derek Howse, 1993-02-09 This book tells in non-technical language how the British Navy contributed to the development of naval radar in World War 2. Addressed to the general reader, it tells not only the technical story in simple terms, but also of the operational use of shipborne radar at sea - for warning, for fire control, for fighter direction, for navigation, in all theatres of war - and particularly about the people who designed and fitted the equipment, and those who used it at sea.

Aircraft Modelling Brett Green, 2010-08-24 The aircraft modeling hobby has undergone dramatic changes in the last ten years. New manufacturing technologies and the rise of China have combined to make this a golden age in terms of the variety and availability of models. But these advancements can also make the hobby intimidating for those starting out. In this new edition in Osprey's Masterclass series, Brett Green describes the kits, accessories, decals and references that are now available and demonstrates a wide variety of paint types, thinners and application methods in both words and pictures. He also covers painting effects such as mottling, soft-edged camouflage demarcation, masking and weathering. This is the perfect book for the beginner and the seasoned modeler alike.

Blackburn Buccaneer Kev Darling, 2007-02-21 Conceived in the 1950s as a replacement for the Supermarine Scimitar, the Blackburn Buccaneer went into

service with the Royal Navy as its main carrier-borne nuclear strike aircraft. But with a diminishing role to play in world affairs, and a reduction in the number of aircraft carriers, the Navy disposed of its Buccaneers to the RAF, where they went on to become one of the Force's most successful and best-loved aircraft. This complete history of the Buccaneer takes the reader from first proposals and the original production S.1 to the final fling of the type as a laser target aircraft during the first Gulf War.
