*From Empire to Republic* Taner Akçam,2013-07-18 Taner Akçam is one of the first Turkish academics to acknowledge and discuss openly the Armenian Genocide perpetrated by the Ottoman-Turkish government in 1915. This book discusses western political policies towards the region generally, and represents the first serious scholarly attempt to understand the Genocide from a perpetrator rather than victim perspective, and to contextualize those events within Turkey's political history. By refusing to acknowledge the fact of genocide, successive Turkish governments not only perpetuate massive historical injustice, but also pose a fundamental obstacle to Turkey's democratization today.

**Simians, Cyborgs, and Women** Donna Haraway, 2013-05-13 *Simians, Cyborgs and Women* is a powerful collection of ten essays written between 1978 and 1989. Although on the surface, simians, cyborgs and women may seem an odd threesome, Haraway describes their profound link as creatures which have had a great destabilizing place in Western evolutionary technology and biology. Throughout this book, Haraway analyzes accounts, narratives, and stories of the creation of nature, living organisms, and cyborgs. At once a social reality and a science fiction, the cyborg--a hybrid of organism and machine--represents transgressed boundaries and intense fusions of the nature/culture split. By providing an escape from rigid dualisms, the cyborg exists in a post-gender world, and as such holds immense possibilities for modern feminists. Haraway's recent book, *Primate Visions*, has been called outstanding, original, and brilliant, by leading scholars in the field. (First published in 1991.)

**British Asian fiction** Sara Upstone, 2013-07-19  
This is the first text to focus solely on the  
writing of British writers of South Asian descent  
born or raised in Britain. Exploring the unique  
contribution of these writers, it positions their  
work within debates surrounding black British,  
diasporic, migrant, and postcolonial literature in  
order to foreground both the continuities and  
tensions embedded in their relationship to such  
terms, engaging in particular with the ways in  
which this 'new' generation has been denied the

right to a distinctive theoretical framework through absorption into pre-existing frames of reference. Focusing on the diversity of contemporary British Asian experience, the book engages with themes including gender, national and religious identity, the reality of post-9/11 Britain, the post-ethnic self, urban belonging, generational difference and youth identities, as well as indicating how these writers manipulate genre and the novel form in support of their thematic concerns.

**The Transgender Studies Reader** Susan Stryker, Stephen Whittle, 2013-10-18 Transgender studies is the latest area of academic inquiry to grow out of the exciting nexus of queer theory, feminist studies, and the history of sexuality. Because transpeople challenge our most fundamental assumptions about the relationship between bodies, desire, and identity, the field is both fascinating and contentious. The Transgender Studies Reader puts between two covers fifty influential texts with new introductions by the editors that, taken together, document the evolution of transgender studies in the English-speaking world. By bringing together the voices and experience of transgender individuals, doctors, psychologists and academically-based theorists, this volume will be a foundational text for the transgender community, transgender studies, and related queer theory.

*The Myth of the Good War* Jacques R. Pauwels, 2015-03-06 In the spirit of historians Howard Zinn, Gwynne Dyer, and Noam Chomsky, Jacques Pauwels focuses on the big picture. Like them, he seeks to find the real reasons for the actions of great powers and great leaders. Familiar Second World War figures from Adolf Hitler to Franklin D. Roosevelt and Joseph Stalin are portrayed in a new light in this book. The decisions of Hitler and his Nazi government to go to war were not those of madmen. Britain and the US were not allies fighting shoulder to shoulder with no motive except ridding the world of the evils of Nazism. In Pauwels' account, the actions of the United States during the war years were heavily influenced by American corporations -- IBM, GM, Ford, ITT, and Standard Oil of New Jersey

(now called Exxon) -- who were having a very profitable war selling oil, armaments, and equipment to both sides, with money gushing everywhere. Rather than analyzing Pearl Harbor as an unprovoked attack, Pauwels notes that US generals boasted of their success in goading Japan into a war the Americans badly wanted. One chilling account describes why President Truman insisted on using nuclear bombs against Japan when there was no military need to do so. Another reveals that Churchill instructed his bombers to flatten Dresden and kill thousands when the war was already won, to demonstrate British-American strength to Stalin. Leaders usually cast in a heroic mould in other books about this war look quite different here. Nations that claimed a higher purpose in going to war are shown to have had far less idealistic motives. The Second World War, as Jacques Pauwels tells it, was a good war only in myth. The reality is far messier -- and far more revealing of the evils that come from conflicts between great powers and great leaders seeking to enrich their countries and dominate the world.

**The Making of London** S. Groes, 2011-08-09 London has become the focus of a ferocious imaginative energy since the rise of Thatcher. *The Making of London* analyses the body of work by writers who have committed their writing to the many lives of a city undergoing complex transformations, tracing a major shift in the representation of the capital city.

**Transvestites** Magnus Hirschfeld, 1991 Transvestites are women and men who feel reluctant and even refuse to dress in the clothing of their own sex. For them, the inherent drive to cross-dress is often more powerful than sexual drive itself. This phenomenon has often been confronted with both ignorance and prejudice. Transvestites have been subjected not only to discrimination but

also to criminal prosecution for following what, for them, was an inborn inclination. Dr. Hirschfeld created this book to establish a body of knowledge about an often misunderstood topic and to strip away long held prejudices. This classic gender study, first published in Germany in 1910 and newly translated, explores all aspects of transvestism: social, physical and emotional. Transvestism is a firmly rooted psychological phenomenon and cultural tradition, in spite of religious, legal and social sanctions. Written 80 years ago, this book was and still is the most comprehensive treatise on the subject of transvestism, illustrating that while styles have changed, the enthusiasm of devotees has not. Part I introduces transvestites with sympathetic, often amusing case histories, defines symptoms, and explains their basic, erotic character. Part II explores the forceful drive to cross-dress and examines clothing as a form of expression of personality. Part III addresses the historical, legal, anthropological, and social aspects of transvestism, and includes fascinating chapters on transvestism as it relates to the Bible, law and criminality, and women in the military. This book conclusively demonstrates that transvestism is a natural extension of the infinite variations of human personality.

Under Development: Gender C. Verschuur, I. Guérin, H. Guétat-Bernard, 2016-04-30 Despite various decades of research and claim-making by feminist scholars and movements, gender remains an overlooked area in development studies. Looking at key issues in development studies through the prisms of gender and feminism, the authors demonstrate that gender is an indispensable tool for social change.
