The 'Made in Germany' Champion Brands Ugesh A. Joseph,2016-03-09 Germany's economic miracle is a widely-known phenomenon, and the world-leading, innovative products and services associated with German companies are something that others seek to imitate. In The 'Made in Germany' Champion Brands, Ugesh A. Joseph provides an extensively researched, insightful look at over 200 of Germany's best brands to see what they stand for, what has made them what they are today, and what might be transferable. The way Germany is branded as a nation carries across into the branding of its companies and services, particularly the global superstar brands - truly world-class in size, performance and reputation. Just as important are the medium-sized and small enterprises, known as the 'Mittelstand'. These innovative and successful enterprises from a wide range of industries and product / service categories are amongst the World market leaders in their own niche and play a huge part in making Germany what it is today. The book also focuses on German industrial entrepreneurship and a selection of innovative and emergent stars. All these companies are supported and encouraged by a sophisticated infrastructure of facilitators, influencers and enhancers - the research, industry, trade and standards organizations, the fairs and exhibitions and all the social and cultural factors that influence, enhance and add positive value to the country's image. Professionals or academics interested in business; entrepreneurship; branding and marketing; product or service development; international trade and business development policy, will find fascinating insights in this book; while those with an interest in Germany from emerging industrial economies will learn something of the secrets of German success.

Archaeology Anthropology and Interstellar Communication Douglas A. Vakoch,2015-03-24 Addressing a field that has been dominated by astronomers, physicists, engineers, and computer scientists, the contributors to this collection raise questions that may have been overlooked by physical scientists about the ease of establishing meaningful communication with an extraterrestrial intelligence. These scholars are grappling with some of the enormous challenges that will face humanity if an information-rich signal emanating from another world is detected. By drawing on issues at the core of contemporary archaeology and anthropology, we can be much better prepared for contact with an extraterrestrial civilization, should that day ever come.

Dark Continent Mark Mazower,2009-05-20 An unflinching and intelligent alternative history of the twentieth century that provides a provocative vision of Europe's past, present, and future. [A] splendid book. —The New York Times Book Review Dark Continent provides an alternative history of the twentieth century, one in which the triumph of democracy was anything but a forgone conclusion and fascism and communism provided rival political solutions that battled and sometimes triumphed in an effort to determine the course the continent would take. Mark Mazower strips away myths that have comforted us since World War II, revealing Europe as an entity constantly engaged in a bloody project of self-invention. Here is a history not of inevitable victories and forward marches, but of narrow squeaks and unexpected twists, where townships boast a bronze of Mussolini on horseback one moment, only to melt it down and recast it as a pair of noble partisans the next.

Drawing Futures Bob Sheil,Frédéric Migayrou,Luke Pearson,Laura Allen,2016-11-11 Drawing Futures brings together international designers and artists for speculations in contemporary drawing for art and architecture.Despite numerous developments in technological manufacture and computational design that provide new grounds for designers, the act of drawing still plays a central role as a vehicle for speculation. There is a rich and long history of drawing tied to innovations in technology as well as to revolutions in our philosophical understanding of the world. In reflection of a society now underpinned by computational networks and interfaces allowing hitherto unprecedented views of the world, the changing status of the drawing and its representation as a political act demands a platform for reflection and innovation. Drawing Futures will present a compendium of projects, writings and interviews that critically reassess the act of drawing and where its future may lie.Drawing Futures focuses on the discussion of how the field of drawing may expand synchronously alongside technological and computational developments. The book coincides with an international conference of the same name, taking place at The Bartlett School of Architecture, UCL, in November 2016. Bringing together practitioners from many creative fields, the book discusses how drawing is changing in relation to new technologies for the production and dissemination of ideas.

In What Style Should We Build? Philosophical Fragments Friedrich von Schlegel,1991 Philosophical Fragments was first published in 1991. Minnesota Archive Editions uses digital technology to make long-unavailable books once again accessible, and are published unaltered from the original University of Minnesota Press editions. At a time when the function of criticism is again coming under close skeptical scrutiny, Schlegel's unorthodox, highly original mind, as revealed in these foundational fragments, provides the critical framework for reflecting on contemporary experimental texts.

Does War Belong in Museums? Wolfgang Muchitsch,2014-04-30 Presentations of war and violence in museums generally oscillate between the fascination of terror and its instruments and the didactic urge to explain violence and, by analysing it, make it easier to handle and prevent. The museums concerned also have to face up to these basic issues about the social and institutional handling of war and violence. Does war really belong in museums? And if it does, what objectives and means are involved? Can museums avoid trivializing and aestheticising war, transforming violence, injury, death and trauma into tourist sights? What images of shock or identification does one generate - and what images would be desirable?

The Battle of Adwa Paulos Milkias,Getachew Metaferia,2005 Ethiopia trounced the Italians in 1896 in the greatest African victory over Europe since Hannibal, but failed to prevent the loss of Eritrea. The event was a powerful constitutive force in the rise of modern Africa and pan-Africanism and resounds in the shared memory of Africans and Black Americans even today.

Introduction to Nordic Cultures Annika Lindskog,Jakob Stougaard-Nielsen,2020-04-17 Introduction to Nordic Cultures is an innovative, interdisciplinary introduction to Nordic history, cultures and societies from medieval times to today. The textbook spans the whole Nordic region, covering historical periods from the Viking Age to modern society, and engages with a range of subjects: from runic inscriptions on iron rings and stone monuments, via eighteenth-century scientists, Ibsen's dramas and turn-of-the-century travel, to twentieth-century health films and the welfare state, nature ideology, Greenlandic literature, Nordic Noir, migration, 'new' Scandinavians, and stereotypes of the Nordic. The chapters provide fundamental knowledge and insights into the history and structures of Nordic societies, while constructing critical analyses around specific case studies that help build an informed picture of how societies grow and of the interplay between history, politics, culture, geography and people. Introduction to Nordic Cultures is a tool for understanding issues related to the Nordic region as a whole, offering the reader engaging and stimulating ways of discovering a variety of cultural expressions, historical developments and local preoccupations. The textbook is a valuable resource for undergraduate students of Scandinavian and Nordic studies, as well as students of European history, culture, literature and linguistics.

Virtual Heritage Erik Malcolm Champion,2021-07-22 Virtual heritage has been explained as virtual reality applied to cultural heritage, but this definition only scratches the surface of the fascinating applications, tools and challenges of this fast-changing interdisciplinary field. This book provides an accessible but concise edited coverage of the main topics, tools and issues in virtual heritage. Leading international scholars have provided

chapters to explain current issues in accuracy and precision; challenges in adopting advanced animation techniques; shows how archaeological learning can be developed in Minecraft; they propose mixed reality is conceptual rather than just technical; they explore how useful Linked Open Data can be for art history; explain how accessible photogrammetry can be but also ethical and practical issues for applying at scale; provide insight into how to provide interaction in museums involving the wider public; and describe issues in evaluating virtual heritage projects not often addressed even in scholarly papers. The book will be of particular interest to students and scholars in museum studies, digital archaeology, heritage studies, architectural history and modelling, virtual environments.

Omnipotent Government Ludwig Von Mises,2013-04-16 Liberty is not, as the German precursors of Nazism asserted, a negative ideal. Whether a concept is presented in an affirmative or in a negative form is merely a question of idiom. Freedom from want is tantamount to the expression striving after a state of affairs under which people are better supplied with necessities. Freedom of speech is tantamount to a state of affairs under which everybody can say what he wants to say. At the bottom of all totalitarian doctrines lies the belief that the rulers are wiser and loftier than their subjects and that they therefore know better what benefits those ruled than they themselves. Werner Sombart, for many years a fanatical champion of Marxism and later a no less fanatical advocate of Nazism, was bold enough to assert frankly that the Führer gets his orders from God, the supreme Führer of the universe, and that Führertum is a permanent revelation.* Whoever admits this, must, of course, stop questioning the expediency of government omnipotence. Those disagreeing with this theocratical justification of dictatorship claim for themselves the right to discuss freely the problems involved. They do not write state with a capital S. They do not shrink from analyzing the metaphysical notions of Hegelianism and Marxism. They reduce all this high-sounding oratory to the simple question: are the means suggested suitable to attain the ends sought? In answering this question, they hope to render a service to the great majority of their fellow men.
