Architecture, Power and National Identity Lawrence Vale,2014-05-01 The first edition of Architecture, Power, and National Identity, published in 1992, has become a classic, winning the prestigious Spiro Kostof award for the best book in architecture and urbanism. Lawrence Vale fully has fully updated the book, which focuses on the relationship between the design of national capitals across the world and the formation of national identity in modernity. Tied to this, it explains the role that architecture and planning play in the forceful assertion of state power. Manifesta 10 Kasper König,2014 Published on the occasion of Manifesta 10, the European Biennial of Contemporary Art in St. Petersburg, Russia, this illustrated volume collects artworks, concepts, and essays that invite the reader to explore the possibilities of contemporary art in deeply historical settings. For the first time, Manifesta is hosted by a museum, uniting the State Heritage Museum's 250th anniversary and Manifesta's twentieth anniversary as a nomadic biennial. This book, which is structured like a classic catalogue, reflects the intuitive and playful nature of Kasper König's exhibition. Contemporary art stands alongside the historical and cultural heritage of the Hermitage, and many projects create a unique homage to it and to the city of St. Petersburg. New works claim their place in ways that are often subtle and surprising, inviting viewers and readers to grapple with the endless ways in which contemporary art questions, complements, or even dovetails with tradition.

Spartakiads Petr Roubal,2020-01-01 Every five years from 1955 to 1985, mass Czechoslovak gymnastic demonstrations and sporting parades called Spartakiads were held to mark the 1945 liberation of Czechoslovakia. Involving hundreds of thousands of male and female performers of all ages and held in the world's largest stadium—a space built expressly for this purpose—the synchronized and unified movements of the Czech citizenry embodied, quite literally, the idealized Socialist people: a powerful yet pliant force directed by the regime. This book explores the political, social, and aesthetic dimensions of these mass physical demonstrations, with a particular focus on their roots in the völkisch nationalism of the German Turner movement and the Czech Sokol gymnastic tradition. Featuring an abundance of photographs, Spartakiads takes a new approach to Communist history by opening a window onto the mentality and mundanity behind the Iron Curtain.

Völkisch Writers and National Socialism Guy Tourlamain,2014 This book follows the work of a group of right-wing nationalist writers from 1890 to 1960, whose writings both paved the way for the rise of Nazism and continued to stimulate debate about German cultural and political identity after 1945. The volume features studies of Hans Grimm, Kolbenheyer, Schäfer, Strauß, von Münchhausen and Binding.

The Quest for the Lost Roman Legions Tony Clunn,2009-09-19 The story of an ancient ambush that devastated Rome—and the modern-day hunt that finally revealed its location and its archaeological treasures. In 9 A.D., the seventeenth, eighteenth, & nineteenth Roman legions and their auxiliary troops under the command of Publius Quinctilius Varus vanished in the boggy wilds of Germania. They died singly and by the hundreds over

several days in a carefully planned ambush led by Arminius—a Roman-trained German warrior adopted and subsequently knighted by the Romans, but determined to stop Rome’s advance east beyond the Rhine River. By the time it was over, some 25,000 men, women, and children were dead and the course of European history had been forever altered. “Quintilius Varus, give me back my legions!” Emperor Augustus agonized aloud when he learned of the devastating loss. As decades passed, the location of the Varus defeat, one of the Western world’s most important battlefields, was lost to history. It remained so for two millennia. Fueled by an unshakable curiosity and burning interest in the story, a British Major named J. A. S. (Tony) Clunn delved into the nooks and crannies of times past. By sheer persistence and good luck, he turned the foundation of German national history on its ear. Convinced the running battle took place north of Osnabruck, Germany, Clunn set out to prove his point. His discovery of large numbers of Roman coins in the late 1980s, followed by a flood of thousands of other artifacts (including weapons and human remains), ended the mystery once and for all. Archaeologists and historians across the world agreed. Today, a state-of-the-art museum houses and interprets these priceless historical treasures on the very site Varus’s legions were lost. The Quest for the Lost Roman Legions is a masterful retelling of Clunn’s search to discover the Varus battlefield. His well-paced and vivid writing style makes for a compelling read as he alternates between his incredible modern quest and the ancient tale of the Roman occupation of Germany—based upon actual finds from the battlefield—that ultimately ended so tragically in the peat bogs of Kalkriese.

Pamphlet Architecture 15: War and Architecture Lebbeus Woods, 1993 War and Architecture is a timely and moving response by architect Lebbeus Woods to the bombing of Sarajevo. With text in both English and Croatian, accompanied by the author's exquisitely drawn, hauntingly beautiful proposals, the book is both dedicated and addressed to the citizens of this ravaged city. Lebbeus Woods has long been fascinated by the intimate ties between architecture and violence. He identifies the two predominant patterns for rebuilding cities following catastrophic destruction: restoring the city exactly to its previous, historical state; or erasing the remains of the city to construct a new utopia. These, he argues, are twin forms of denial. Woods draws an analogy to the process of biological and emotional healing, presenting architectural forms that act as injections, scabs, scars, and new tissue, within the complex organism of a city. Only by facing the insanity of willful destruction, he argues, can reason begin to believe again in itself.

A European Memory? Małgorzata Pakier, Bo Stråth, 2012 An examination of the role of history and memory is vital in order to better understand why the grand design of a United Europe—with a common foreign policy and market yet enough diversity to allow for cultural and social differences—was overwhelmingly turned down by its citizens. The authors argue that this rejection of the European constitution was to a certain extent a challenge to the current historical grounding used for further integration and further demonstrates the lack of understanding by European bureaucrats of the historical complexity and divisiveness of Europe's past. A critical European history is therefore urgently needed to confront and re-imagine Europe, not as a harmonious continent but as the outcome of violent and bloody conflicts, both within Europe as well as with its Others. As the authors show, these dark shadows of Europe's past must be integrated, and the fact that memories of Europe are contested must be accepted if any new attempts at a United Europe are to be successful.

Iron Landscapes Felix Jeschke,2021-07-01 Throughout the 1920s and 1930s, the newly formed country of Czechoslovakia built an ambitious national rail network out of what remained of the obsolete Habsburg system. While conceived as a means of knitting together a young and ethnically diverse nation-state, these railways were by their very nature a transnational phenomenon, and as such they simultaneously articulated and embodied a distinctive Czechoslovak cosmopolitanism. Drawing on evidence ranging from government documents to newsreels to train timetables, Iron Landscapes gives a nuanced account of how planners and authorities balanced these two imperatives, bringing the cultural history of infrastructure into dialogue with the spatial history of Central Europe.

The shadows have come for Louis and Lise's son, and nothing anyone can do will stop them.
