Energiya-Buran Bart Hendrickx,Bert Vis,2007-12-05 This absorbing book describes the long development of the Soviet space shuttle system, its infrastructure and the space agency's plans to follow up the first historic unmanned mission. The book includes comparisons with the American shuttle system and offers accounts of the Soviet test pilots chosen for training to fly the system, and the operational, political and engineering problems that finally sealed the fate of Buran and ultimately of NASA's Shuttle fleet.

The Strange Case of Origami Yoda (Origami Yoda #1) Tom Angleberger,2012-08-07 In this funny, uncannily wise portrait of the dynamics of a sixth-grade class and of the greatness that sometimes comes in unlikely packages, Dwight, a loser, talks to his classmates via an origami finger puppet of Yoda. If that weren't strange enough, the puppet is uncannily wise and prescient. Origami Yoda predicts the date of a pop quiz, guesses who stole the classroom Shakespeare bust, and saves a classmate from popularity-crushing embarrassment with some well-timed advice. Dwight's classmate Tommy wonders how Yoda can be so smart when Dwight himself is so clueless. With contributions from his puzzled classmates, Tommy assembles this first case file in the blockbuster bestselling Origami Yoda series, written by Tom Angleberger, author of Star Wars: Return of the Jedi: Beware the Power of the Dark Side, and hailed by School Library Journal as "honest, funny, and immensely entertaining." From Cave Man to Cave Martian Manfred "Dutch" von Ehrenfried,2019-04-05 This book explores the practicality of using the existing subsurface geology on the Moon and Mars for protection against radiation, thermal extremes, micrometeorites and dust storms rather than building surface habitats at great expense at least for those first few missions. It encourages NASA to plan a precursor mission using this concept and employ a "Short Stay" Opposition Class mission to Mars as the first mission rather than the "Long Stay" concept requiring a mission that is too long, too dangerous and too costly for man's first missions to Mars. Included in these pages is a short history on the uses of caves by early humans over great periods of time. It then describes the ongoing efforts to research caves, pits, tunnels, lava tubes, skylights and the associated technologies that pertain to potential lunar and Mars exploration and habitation. It describes evidence for existing caves and lava tubes on both the Moon and Mars. The work of noted scientists, technologists and roboticists are referenced and described. This ongoing work is more extensive than one would think and is directly applicable to longer term habitation and exploration of the Moon and Mars. Emphasis is also given to the operational aspects of working and living in lunar and Martian caves and lava tubes.

The Local Foods Wheel - San Francisco Bay Area Jessica Prentice,Maggie Gosselin,Sarah Klein,2009-01-15 The Local Foods Wheels are beautifully designed, full-color dials showing which foods are grown locally and when they are in season. The first two dials in the new series cover the San Francisco Bay area and the New York City area. Each is 12 inches in diameter and features charming hand-drawn images of vegetables, fruits, grains, dairy products, meats, and traditionally preserved regional foods. The top wheel of each dial shows the foods that are available year-round, and the bottom shows foods that are available only seasonally. As you turn the top wheel, it exposes one season of the bottom wheel at a time, so that you can see what seasonal foods are available in addition to the year-round local foods. At any time of year, the dial shows at a glance the incredible bounty available in the San Francisco Bay or New York City area. Turn the wheel over, and you will find seasonality references, arranged alphabetically. This list gives greater detail about when local foods are harvested and available. The combination of beauty and functionality makes the Local Foods Wheel an ideal gift item and perfect for mounting on the refrigerator with magnets as an appealing reminder of the abundance that comes from local fields. Both children and adults will find the wheel a fun and inspirational educational tool, and it is an invaluable aid for seasonal menu planning and in preparing a shopping list for the local farmers' market!

Achtung-Panzer! Heinz Guderian,1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

Updrift Errin Stevens,2020-02-15 Since her father died, Kate Sweeting's home life has been in the pits, her well-being on life support. Her future looks desolate until she and her mother, Cara, make another plan: abandon their shriveled existence for more promising prospects on the coast, where Cara can play small-town librarian-bachelorette and Kate can figure out what's up with that secretive Blake family from the beach. Everyone is eerily captivated with Kate and her mother, and Cara is the first to figure out why when the man of her dreams arrives all dripping and devoted and closed-mouthed about what he intends. Kate is willing to go along with their subterfuge for a while, but eventually makes a charge for the water to learn what her mother is hiding. Gabe Blake is there waiting for her...and so is someone considerably less friendly. By the time Kate navigates her way home, everything will have changed for her-what she feels, what she wants, and what she'll risk to be with the man she loves.

Amok Journal Stuart Swezey,1995 Subtitled A Compendium of Phycho-Physiological Investigation, what you get in the Amok Journal's SENSURROUND EDITION is a collection of reports, articles and general research on autoerotic fatalities, trepanation, Gualtiero Jacopetti, cargo cults, Neue Slowenische Kunst, self-mutilation and amputee fetishism, infrasound and a collection of true emergency room reports called Psych-Out. All of the material presented here is true. Some of it seems unbelievable but all the reports here are covering behaviors that these people were engaging in willingly (even some of the fatal ones) for the purpose of having some sort of heightened sensory experience. Nearly all of this behavior does NOT involve drugs, focusing more on altered experience through altered body state. Not for the easily squeamish. Despite the extreme subject matter, this volume is highly intelligent and an amazing psychological peek into the fringes of human experiences.
