

Apt 202 Keith Barbee,2009-04-28 Salacious but endearing, APT 202 is written with such visual vigor that you are entranced from the first line. The characters, their thoughts and actions, leap from the page and strangle your thoughts. However, you are not left breathless. The author resuscitates you with a literary agility that is all his own. APT 202 is a character-driven assault on our decisions and the consequences that ensue,” said Barbee. “It is a testament to the capitol city and its inhabitants.” Keisha and Antonio, along with a host of friends and family, take you through Chocolate City in a way that’s much different from the tourism guides. This is DC as they live it. This foray into novel writing is uniquely Keith Barbee. Overrun with pop culture references and mired in materialism, this is exactly what you would expect from a Tastemaker. However, Barbee knows how to tell a story- A good story.

Spitfire V vs C.202 Folgore Donald Nijboer,2014-04-20 The inability of the Italians and Germans to invade Malta proved decisive for Allied victory in the Mediterranean during World War II, as the islands provided the Allies with a base from which to project air power. Early Italian efforts to pound the islands into submission were supplemented by major German forces from January 1942 and in a few weeks the situation for the defenders reached a critical stage; in response, in March 1942 the first Spitfires were delivered to Malta. Throughout the summer C.202s fought over Malta, escorting tiny formations of Cant Z.1007s, SM.79s and Ju 88s. The fighting subsided in August and September, but grew in strength with the arrival of more C.202s. In October the Regia Aeronautica could muster three Gruppi with a total of 74 C.202s. For ten days the Italians pressed a relentless attack before attrition brought the offensive to a halt. Throughout the bombing campaign the British were able to supply Malta with ever increasing numbers of Spitfires.

Macchi C.202/C.205V Units in Combat Marco Mattioli,2022-05-26 A study of the Macchi Folgore and Veltro, the most successful Italian fighters in World War II. With specially commissioned profiles, the book examines how these fighters were conceived, their performance and the fascinating stories of their pilots. Italian fighters, such as the Fiat G.50 and Macchi C.200, had always struggled with their straight-line speed and restricted armament when engaging their Allied counterparts. To solve these problems, Macchi initially designed the C.202 Folgore using German engines, which contributed to create a faster aircraft, with a superior rate of climb and reachable altitude. Folgore's success in various North African engagements then paved the way for the development of Macchi's most successful fighter, the C.205V Veltro, which managed to combine increased speed and increased power. Packed with specially commissioned artwork and original photos, and written by Italian military aviation specialist Marco Mattioli, this fascinating book explores how the premier Italian fighter of the war came to life and the historical circumstances that prevented it from becoming one of the most dreaded aircraft in the Mediterranean.

Illustrated History of the Sturmgeschütz-Abteilung 202 Norbert Számvéber,2016-05-24 The Sturmgeschütz-Abteilung 202 was one of the most successful German assault gun units in the Second World War. It had been deployed exclusively on the Eastern Front against the Red Army between 1941 and 1945. The StuGs of this unit were very effective AFVs on the battlefield in the role of heavy weapons for infantry fire support and also as mobile antitank firepower. Dr. Norbert Számvéber, author of *Waffen-SS Armour in Normandy and Days of Battle*, presents a detailed combat history of this unit, primarily based on archival sources. The book includes a significant number of rare photographs and several maps.

Macchi C.202 Folgore Davide F. Jabes,Alessandro Romanello,Niccolò Tognarini,2021-12-02 The Macchi C.202 was probably the most successful Italian fighter during the Second World War. It is generally agreed that the performance of the Macchi was superior to both the Hawker Hurricane and the Curtiss P-40 Kittyhawk and on a par with the Supermarine Spitfire Mk. V. It is not by chance that virtually all the Italian top scoring aces flew this plane either with the Regia Aeronautica or the Aeronautica Nazionale Repubblicana. At the same time, the Mc.202 is the symbol of the dysfunctions in the Italian military-industrial complex: the lack of sound industrial planning resulting in orders from the Regia Aeronautica for an exaggerated number of different aircraft; the lack of the development of adequate engines limiting aircraft performance and reducing capacity to house weapons with a proper punch; the corruption of politics and the culpable connivance of the high military spheres. The Mc.202 was therefore produced in limited numbers, while there is consensus that air war, especially in the African theatre, would have been different had the aircraft been adopted before.
