The Strange Case of Origami Yoda (Origami Yoda #1) Tom Angleberger,2012-08-07 In this funny, uncannily wise portrait of the dynamics of a sixth-grade class and of the greatness that sometimes comes in unlikely packages, Dwight, a loser, talks to his classmates via an origami finger puppet of Yoda. If that weren't strange enough, the puppet is uncannily wise and prescient. Origami Yoda

predicts the date of a pop quiz, guesses who stole the classroom Shakespeare bust, and saves a classmate from popularity-crushing embarrassment with some well-timed advice. Dwight's classmate Tommy wonders how Yoda can be so smart when Dwight himself is so clueless. With contributions from his puzzled classmates, Tommy assembles this first case file in the blockbuster bestselling Origami Yoda series, written by Tom Angleberger, author of *Star Wars: Return of the Jedi: Beware the Power of the Dark Side*, and hailed by *School Library Journal* as "honest, funny, and immensely entertaining." Paper Mice Megan Wagner Lloyd,2019-05-21 A Bank Street Best Book of the Year “Perfect for storytime, and with so much to explore on each page, a one-on-one read is also a must.” —School Library Journal “A sweet depiction of companionship and creature comforts.” —Publishers Weekly It’s the middle of the night, and two paper mice find adventure—and each other—as they explore their new home in this beautifully written, stunningly illustrated story of friendship. With a snip and a clip, two paper mice are made. They are given names: Della and Ralph. Each alone, they explore their new house in the dark. Della dashes up the stairs; Ralph skitters through the dining room. There is so much to see and so much to discover! But a big, dark house can be scary for those so small, until they find...each other. Beautiful, cut-paper illustrations bring to life this lyrical story of adventure and

friendship.

The Paper Zoo Charlotte Sleight, 2017-03-08 For many, their first experience of the natural world is in the pages of books and in library collections--a Paper Zoo. This stunning book gathers together a wide range of beautiful nature illustrations from the British Library's collections, including manuscripts, prints and drawings, and rare printed books, and featuring items from all around the world. With striking images of butterflies, beetles, spiders, animals, shells, fish and birds, the pages bring readers into contact with some of the world's most renowned natural history illustrators, such as Audubon and Catesby, and on expeditions to discover the lesser known rare finds as well. The text traces the story of the art of natural history from the Renaissance through the great age of exploration to the 19th century, to demonstrate how the collaboration between the fields of art and science has rendered such exquisite forms. The plates, all taken from books, are organized into several themed sections, though not on strict taxonomic grounds, but rather on broader themes of exotic, native, domestic, and paradoxical (with reference to what the species were at that time--for what is native now may well

once have been exotic).
