Structural Dynamics of Electronic and Photonic Systems Ephraim Suhir,T. X. Yu,David S.

Steinberg,2011-04-04 The proposed book will offer comprehensive and versatile methodologies and recommendations on how to determine dynamic characteristics of typical micro- and opto-electronic structural elements (printed circuit boards, solder joints, heavy devices, etc.) and how to design a viable and reliable structure that would be able to withstand high-level dynamic loading. Particular attention will be given to portable devices and systems designed for operation in harsh environments (such as automotive, aerospace, military, etc.) In-depth discussion from a mechanical engineer's viewpoint will be conducted to the key components' level as well as the whole device level. Both theoretical (analytical and computer-aided) and experimental methods of analysis will be addressed. The authors will identify how the failure control parameters (e.g. displacement, strain and stress) of the vulnerable components may be affected by the external vibration or shock loading, as well as by the internal parameters of the infrastructure of the device. Guidelines for material selection, effective protection and test methods will be developed for engineering practice.

**Subjective Quality Measurement of Speech** Kazuhiro Kondo,2012-02-06 It is becoming crucial to accurately estimate and monitor speech quality in various ambient environments to guarantee high quality speech communication. This practical hands-on book shows speech intelligibility measurement methods so that the readers can start measuring or estimating speech intelligibility of their own system. The book also introduces subjective and objective speech quality measures, and describes in detail speech intelligibility measurement methods. It introduces a diagnostic rhyme test which uses rhyming word-pairs, and includes: An investigation into the effect of word familiarity on speech intelligibility. Speech intelligibility measurement of localized speech in virtual 3-D acoustic space using the rhyme test. Estimation of speech intelligibility using objective measures, including the ITU standard PESQ measures, and automatic speech recognizers.

**The Nature of Biological Systems as Revealed by Thermal Methods** Dénes Lörinczy,2006-02-21 After a kind motivation by Judit Simon (Editor-in-Chief of the Journal of Thermal Analysis and Calorimetry, Kluwer Academic Publisher) and negotiations with possible contributors - lasting for more than one year - it was decided to write a book about the application of thermal methods in biology. Its aim was to be a guide how to perform experiments and what kind of information might be gained by them. We tried to collect information that could be achieved only during a long personal practice. In this way scientists from biology and medicine, e. g., who are not so skilled in physics and mathematics may realize very soon the beauty and power of this tool at one hand. On the other hand, those scientists with better background in natural sciences can be more sensitive to find out exciting biological problems.

**Structural Connections for Lightweight Metallic Structures** Pedro M.G.P. Moreira,Lucas F. M. da Silva,Paulo M.S.T. de Castro,2012-02-05 Increasing concern with fuel consumption leads to widespread interest in lightweight structures for transportation vehicles. Several competing technologies are available for the structural connections of these structures, namely welding, mechanical fastening / riveting, and adhesive technologies. Arranged in a single volume, this work presents state-of-the-art discussions of those aspects and processes presenting greater novelty whilst simultaneously keeping wide applicability potential and interest. The topics chosen have the common feature of being of currently applied in lightweight structures, and one of the characteristics of this work is bringing together relevant state-of-the-art information usually presented in separate publications specializing in a single technology. The book provides discussions and examples of concrete applications, so that it appeals to researchers and designers and engineers involved in the design and fabrication of lightweight structures.

**The Environments of the Sun and the Stars** Jean-Pierre Rozelot, Coralie Neiner, 2012-08-17  
Based on lectures given at a CNRS summer school in France, this book covers many aspects of stellar environments (both observational and theoretical) and offers a broad overview of the field. More specifically, Part I of the book focuses on the Sun, the properties of the ejected plasma, of the solar wind and on space weather. The second part deals with tides in planetary systems and in binary stellar systems, as well as with interactions in massive binary stars as seen by interferometry. Finally the chapters of Part III discuss the environments of young or evolved stars, stellar winds, agnetic fields and disks. With its broad approach the book will provide advanced students as well as researchers with a good overview of the environments of the Sun and the stars.

*The Challenges of the New EU Pharmaceutical Legislation* José Luis Valverde, Paul Weissenberg, 2005  
In the domain of public policy on pharmaceuticals, protecting public health requires a dual strategy: robust regulation on the one hand and stimulation of competitiveness and innovation on the other. Regulation must be robust to ensure that only medicines meeting exact standards of safety, quality and efficacy are authorised for human and animal use. At the same time competitiveness and innovation must be stimulated. Without innovation in pharmaceuticals, the incurable diseases of today will remain incurable. Competitiveness drives innovation and innovation saves lives. Increased competitiveness of the pharmaceutical sector will not only better protect public health, but will also create high quality jobs and create growth. In this context the implementation of the G10 recommendations, particularly regarding the pricing and reimbursement of medicines by Member States, remains a considerable challenge.

**Strings and Fundamental Physics** Marco Baumgartl, Ilka Brunner, Michael Haack, 2012-04-05  
The basic idea, simple and revolutionary at the same time, to replace the concept of a point particle with a one-dimensional string, has opened up a whole new field of research. Even today, four decades later, its multifaceted consequences are still not fully conceivable. Up to now string theory has offered a new way to view each particle: as different excitations of the same fundamental object. It has celebrated success in discovering the graviton in its spectrum, and it has naturally led scientists to posit space-times with more than four dimensions—which in turn has triggered numerous interesting developments in fields as varied as condensed matter physics and pure mathematics. This book collects pedagogical lectures by leading experts in string theory, introducing the non-specialist reader to some of the newest developments in the field. The carefully selected topics are at the cutting edge of research in string theory and include new developments in topological strings, or AdS/CFT dualities, as well as newly emerging subfields such as doubled field theory and holography in the hydrodynamic regime. The contributions to this book have been selected and arranged in such a way as to form a self-contained, graduate level textbook.

**The High Energy Solar Corona: Waves, Eruptions, Particles** Karl L. Klein, Alexander L. MacKinnon, 2007-09-26  
An outgrow of an earlier workshop held by the community of European Solar Radio Astronomers (CESRA), this topical volume collects reviews on the current multiwavelength findings and perspectives from the space missions RHESSI, TRACE and SOTTO. The aspects of solar physics dealt with are particle acceleration during flares, large-scale disturbances, and coronal plasma physics.

*The Challenge of Change: Dealing with the Legacy of the Modern Movement* D. van den Heuvel, M. Mesman, W. Quist, 2008-09-11  
Conservation of architecture - and the conversation of Modern architecture in particular - has assumed new challenges. Rather than attempting to return a Modern building to its resumed original state, the challenge of these proceedings is to revalue the essence of the manifold manifestations of Modern architecture and redefine its meanings in a rapidly changing world of digital revolution, worldwide mobility and environmental awareness. This volume aims to provide a variety of platforms for the exchange of ideas and experience. A large, international group of architects, historians, scholars, preservationists and other parties involved in the processes of preserving, renovating and transforming Modern buildings has been invited to investigate the paradox

of the Modern monument, and to reflect on the manifold dilemmas of change and continuity. The general theme is elaborated through five sub-themes. The sub-theme 'Change and Continuity' addresses the tensions between change and continuity from a historical-theoretical perspective. 'Restructuring Cities and Landscapes' focuses on the larger scale of city and landscape, while 'Shifts in Programme and Flexibility' draws attention to the scale of the building or building complex, and questions limits of re-use and flexibility. The fourth sub-theme deals with education and the fifth sub-theme 'Progress, Technology and Sustainability' considers specific issues of techniques and materials.

The Physics of Phase Space Young S. Kim, Woodford W. Zachary, 2005-09-13 The concept of phase space plays a decisive role in the study of the transition from classical to quantum physics. This is particularly the case in areas such as nonlinear dynamics and chaos, geometric quantization and the study of the various semi-classical theories, which are the setting of the present volume. Much of the content is devoted to the study of the Wigner distribution. This volume gives the first complete survey of the progress made by both mathematicians and physicists. It will serve as an excellent reference for further research.

**The Story of De Stijl** Hans Janssen, Michael White, 2011 In the early 1920s, a group of Dutch artists and architects influenced by some of the ideas of Dada, formed a movement called De Stijl (The Style). The Story of De Stijl presents work by Piet Mondrian, Theo van Doesburg, Gerrit Rietveld, and the other members of this influential group, as well as archival photographs of the artists. The authors - experts in this seminal abstract style that encompassed painting, sculpture, architecture, interior design, and more - explore the evolution of the movement not just through traditional art-historical analysis, but also through anecdotes, conversations, articles, and other contemporary sources. With more than 325 colour illustrations, The Story of De Stijl makes clear the lasting importance and influence of this once avant-garde movement-- Publicaciones Arquitectura y Arte.

*Sustainable Rural and Urban Ecosystems: Design, Implementation and Operation* Gunther Geller, Detlef Glücklich, 2016-08-23 These days human beings have a profound influence on aspects of the planetary ecosystem, e.g. on climate change and biodiversity, to name only two. This manual is intended to help practitioners, who are dealing with human-based rural and urban settlement-ecosystems, in the key steps towards their realization (design, implementation, and operation) and helpful for all, who are concerned about ensuring their practical sustainability. The ecosystem-approach is holistic and integrative, encompassing various disciplines like architecture, landscape architecture, environmental engineering, social sciences, life sciences, ecology, and management. It also considers issues such as energy-savings, ecological cycles, reuse, natural resources, socio-cultural background, real participation, and holistic quality management. Thus it not only explains the general concept, the steps of realization and the respective involved stakeholders, but also gives hints and tools for practitioners. The information, recommendations and tools are directed to the following target groups, among others: • Local planning authorities (giving hints for the procedure and the involved stakeholders) • Designers (holistic approach, procedures, tools) • Regulatory bodies, licensing and financing authorities (requirements for approach and procedures) • Construction and implementing firms and institutions (recommendations, tools) • Operating bodies (hints for operation, tools) The experiences are based on a joint German-Ghanaian program at Valley View University, the biggest private university in Ghana, intended to help realize the vision of a truly holistic ecological university. It was financed originally by the German Ministry of Education and Research and recently by the German Ministry for the Environment in the frame of the Climate Change Initiative of the Federal Government of Germany.

**Subsea Control and Data Acquisition** Society for Underwater Technology (SUT), 1986-09-30 The biennial conferences of the Society for Underwater Technology have achieved an excellent reputation for the quality of their presentations, which cover topics of the most acute current interest, as well as those at the forefront of review and development. The 1994 conference on Subsea Control and Data Acquisition formed no exception, since it covers subjects at the cutting edge of modern technology. It is a matter of increasing concern that products are becoming overspecified, resulting in excessive costs and longer development schedules, while not conferring an equivalent benefit in

reliability of the finished product. Subsea Control and Data Acquisition is vital reading for all subsea control system designers, manufacturers and operators, equipment consultants, application engineers, academics in the subsea engineering field, and all subsea engineers.
