Hiroshima John Hersey, 2020-06-23 Hiroshima is the story of six people—a clerk, a widowed seamstress, a physician, a Methodist minister, a young surgeon, and a German Catholic priest—who lived through the greatest single manmade disaster in history. In vivid and indelible prose, Pulitzer Prize–winner John Hersey traces the stories of these half-dozen individuals from 8:15 a.m. on August 6, 1945, when Hiroshima was destroyed by the first atomic bomb ever dropped on a city, through the hours and days that followed. Almost four decades after the original publication of this celebrated book, Hersey went back to Hiroshima in search of the people whose stories he had told, and his account of what he discovered is now the eloquent and moving final chapter of Hiroshima.

The Atomic Bombings of Hiroshima and Nagasaki United States. Army. Corps of Engineers. Manhattan District, 2024-02-02 Explore a pivotal moment in history and unravel the profound impact of the atomic bombings of Hiroshima and Nagasaki with *The Atomic Bombings of Hiroshima and Nagasaki: Unraveling the Impact of History* by the United States Army Corps of Engineers Manhattan District. Delve into the complexities of this harrowing chapter, examining its historical significance and enduring legacy. As the Manhattan District Corps of Engineers sheds light on the events that shaped the course of World War II and the subsequent nuclear age, witness the devastation wrought by these catastrophic weapons of mass destruction. Navigate through the aftermath, exploring the ethical dilemmas, geopolitical ramifications, and human toll of these unprecedented acts of warfare. But amidst the devastation and despair, a haunting question emerges: Can humanity confront the horrors of its past and forge a path towards peace and reconciliation, or are we doomed to repeat the mistakes of history? Engage with the meticulous research and firsthand accounts that illuminate the untold stories of Hiroshima and Nagasaki, capturing the resilience of the survivors and the imperative of remembrance. Join the journey of remembrance and reflection as we confront the sobering realities of war and nuclear proliferation. Are we prepared to heed the lessons of history and work towards a future free from the specter of nuclear annihilation? Immerse yourself in the depth of analysis and historical context provided by the Manhattan District Corps of Engineers, offering invaluable insights into one of the most consequential events of the 20th century. Now is the time to honor the memory of those affected by the atomic bombings and reaffirm our commitment to peace and nuclear disarmament. Let this profound exploration be a catalyst for dialogue, understanding, and collective action. Secure your copy of *The Atomic Bombings of Hiroshima and Nagasaki* today and embark on a journey of discovery, remembrance, and reconciliation. Together, let us strive to ensure that the horrors of Hiroshima and Nagasaki are never forgotten and never repeated.

A Little History of the World E. H. Gombrich, 2014-10-01 E. H. Gombrich's *Little History of the World*, though written in 1935, has become one of the treasures of historical writing since its first publication in English in 2005. The Yale edition alone has now sold over half a million copies, and the book is available worldwide in almost thirty languages. Gombrich was of course the best-known art historian of his time, and his text suggests illustrations on every page. This illustrated edition of the *Little History* brings together the pellucid humanity

of his narrative with the images that may well have been in his mind's eye as he wrote the book. The two hundred illustrations—most of them in full color—are not simple embellishments, though they are beautiful. They emerge from the text, enrich the author's intention, and deepen the pleasure of reading this remarkable work. For this edition the text is reset in a spacious format, flowing around illustrations that range from paintings to line drawings, emblems, motifs, and symbols. The book incorporates freshly drawn maps, a revised preface, and a new index. Blending high-grade design, fine paper, and classic binding, this is both a sumptuous gift book and an enhanced edition of a timeless account of human history.

Spearhead of Logistics Benjamin King, Richard C. Biggs, 2016-02-25 *Spearhead of Logistics* is a narrative branch history of the U.S. Army's Transportation Corps, first published in 1994 for transportation personnel and reprinted in 2001 for the larger Army community. The Quartermaster Department coordinated transportation support for the Army until World War I revealed the need for a dedicated corps of specialists. The newly established Transportation Corps, however, lasted for only a few years. Its significant utility for coordinating military transportation became again transparent during World War II, and it was resurrected in mid-1942 to meet the unparalleled logistical demands of fighting in distant theaters. Finally becoming a permanent branch in 1950, the Transportation Corps continued to demonstrate its capability of rapidly supporting U.S. Army operations in global theaters over the next fifty years. With useful lessons of high-quality support that validate the necessity of adequate transportation in a viable national defense posture, it is an important resource for those now involved in military transportation and movement for ongoing expeditionary operations. This text should be useful to both officers and noncommissioned officers who can take examples from the past and apply the successful principles to future operations, thus ensuring a continuing legacy of Transportation excellence within Army operations. Additionally, military science students and military historians may be interested in this volume.

Geospatial Technologies and Homeland Security Daniel Sui, 2008-05-25 Homeland security and context In the *Geographical Dimensions of Terrorism (GDOT)* (Cutter et al. 2003), the first book after 9/11 to address homeland security and geography, we developed several thematic research agendas and explored intersections between geographic research and the importance of context, both geographical and political, in relationship to the concepts of terrorism and security. It is good to see that a great deal of new thought and research continues to flow from that initial research agenda, as illustrated by many of the papers of this new book, entitled *Geospatial Technologies and Homeland Security: Research Frontiers and Future Challenges*. Context is relevant not only to understanding homeland security issues broadly, but also to the conduct of research on geospatial technologies. It is impossible to understand the implications of a homeland security strategy, let alone hope to make predictions, conduct meaningful modeling and research, or assess the value and dangers of geospatial technologies, without

consideration of overarching political, social, economic, and geographic contexts within which these questions are posed.

Ethics, Technology, and Engineering Ibo van de Poel, Lamber Royakkers, 2011-05-02 Featuring a wide range of international case studies, Ethics, Technology, and Engineering presents a unique and systematic approach for engineering students to deal with the ethical issues that are increasingly inherent in engineering practice. Utilizes a systematic approach to ethical case analysis -- the ethical cycle -- which features a wide range of real-life international case studies including the Challenger Space Shuttle, the Herald of Free Enterprise and biofuels. Covers a broad range of topics, including ethics in design, risks, responsibility, sustainability, and emerging technologies Can be used in conjunction with the online ethics tool Agora (<http://www.ethicsandtechnology.com>) Provides engineering students with a clear introduction to the main ethical theories Includes an extensive glossary with key terms

Warfare in a Fragile World Stockholm International Peace Research Institute, Arthur H. Westing, 1980 Among the crucial problems that confront mankind today are those associated with a degraded environment. This book examines the extent to which warfare and other military activities contribute to such degradation. The military capability to damage the environment and to cause ecological disruption has escalated, and there is no sign that the level of conflict in the world is decreasing. The military use and abuse of each of the several major global habitats -- temperate, tropical, desert, arctic, insular, and oceanic -- are evaluated separately in the light of the civil use and abuse of that habitat--Dust jacket.

Mirror of the World Julian Bell, 2010-05-25 "Exuberant, astute, and splendidly illustrated history of world art . . . draws fascinating parallels between artistic developments in Western and non-Western art."--Publishers Weekly In this beautifully written story of art, Julian Bell tells a vivid and compelling history of human artistic achievements, from prehistoric stone carvings to the latest video installations. Bell, himself a painter, uses a variety of objects to reveal how art is a product of our shared experience and how, like a mirror, it can reflect the human condition. With hundreds of illustrations and a uniquely global perspective, Bell juxtaposes examples that challenge and enlighten the reader: dancing bronze figures from southern India, Romanesque sculptures, Baroque ceilings, and jewel-like Persian manuscripts are discussed side by side. With an insider's knowledge and an unerring touch, Bell weaves these diverse strands into an invaluable introduction to the wider history of world art.

Building Shanghai Edward Denison,Guang Yu Ren,2013-12-20 Shanghai's illustrious history and phenomenal future is celebrated in this book, which examines the evolution of the city's architecture and urban form in order to contextualise the challenges facing the city today. The physical legacies that reflect Shanghai's uniqueness historically and contemporarily are examined chronologically using specific case studies of exemplary architecture interwoven in a compelling narrative that unlocks the many mysteries surrounding this amazing metropolis. Some of the most influential colonial architecture in the world, outstanding examples of Modernism and Art Deco, and an exceptional selection of eclectic and vernacular architecture reflecting Shanghai's many adopted cultures are revealed. This is the first book ever to examine this remarkable subject in a manner that is both comprehensive and captivating in its written content and stunningly illustrated with over 300 archive and contemporary photographs and maps.

A Short History of Asia Colin Mason,2000 This text covers the whole scope of Asian history in a single volume. It requires no prior knowledge of Asian history and seeks to be clear and readable. It particularly identifies inter-relationships between the developing Western and Asian societies.

Dangerous Memory in Nagasaki Gwyn McClelland,2020 On 9th August 1945, the US dropped the second atomic bomb on Nagasaki. Of the dead, approximately 8500 were Catholic Christians, representing over sixty percent of the community. In this collective biography, nine Catholic survivors share personal and compelling stories about the aftermath of the bomb and their lives since that day. Examining the Catholic community's interpretation of the A-bomb, this book not only uses memory to provide a greater understanding of the destruction of the bombing, but also links it to the past experiences of religious persecution, drawing comparisons with the 'Secret Christian' groups which survived in the Japanese countryside after the banning of Christianity. Through in-depth interviews, it emerges that the memory of the atomic bomb is viewed through the lens of a community which had experienced suffering and marginalisation for more than 400 years. Furthermore, it argues that their dangerous memory confronts Euro-American-centric narratives of the atomic bombings, whilst also challenging assumptions around a providential bomb. *Dangerous Memory in Nagasaki* presents the voices of Catholics, many of whom have not spoken of their losses within the framework of their faith before. As such, it will be invaluable to students and scholars of Japanese history, religion and war history.

Biography of an Industrial Town Alessandro Portelli,2017-09-27 A pioneering work in oral history, this book tells the story of the rise and fall of the industrial revolution and the apogee and crisis of the labor movement through an oral history of Terni, a steel town in Central Italy and the seat of the first large industrial enterprise in Italy. This story is told through a combination of stories, songs, myths and memories from over 200 voices of five generations, woven with a wealth of archival material.

Values in Heritage Management Erica Avrami,Susan Macdonald,Randall Mason,David Myers,2019-12-03 Bringing together leading conservation scholars and professionals from around the world, this volume offers a timely look

at values-based approaches to heritage management. Over the last fifty years, conservation professionals have confronted increasingly complex political, economic, and cultural dynamics. This volume, with contributions by leading international practitioners and scholars, reviews how values-based methods have come to influence conservation, takes stock of emerging approaches to values in heritage practice and policy, identifies common challenges and related spheres of knowledge, and proposes specific areas in which the development of new approaches and future research may help advance the field.
