The Floatplane Notebooks Clyde Edgerton,2012-09-15 This novel set in North Carolina is “warmly humorous, gossipy, and rich” a book with the soul of a family reunion” (The New York Times Book Review). The Copeland family goes back a long way in North Carolina. Albert Copeland keeps a written record, of sorts, in some notebooks he bought back in 1956 to log the flights of his home-built floatplane. He embarked on that project when the kids were still little, but now they’re all grown: Thatcher has a son of his own; Meredith and Mark are back from Vietnam; and Noralee is off dating hippies. The notebooks are thick with the floatplane’s failures to lift off, and bulging with color Polaroids of the wisteria blossoms near the family plot, favorite family dogs, and Thatcher and Bliss’s wedding; records of Noralee’s height and weight; a diagram of the graveyard; a newspaper story about wild-child Meredith’s many backfired schemes. This novel travels back in time more than one hundred years, to the Copeland bride who first planted the wisteria by the back porch that would take over the surrounding woods, and then back to the present again to show how even though times change, people are pretty much the same. “Among the wisest, most heartfelt writing to emerge from the South in our generation . . . Meredith Copeland’s first-person account of his Vietnam experience, homecoming, and physical paralysis in North Carolina is breathtakingly stark, full, and real.” Los Angeles Times “The Floatplane Notebooks has all the marks of a master storyteller going straight for the mystery itself. All the marks, that is, of a new American classic.” The Atlanta Journal-Constitution “A wonderful celebration of family and tradition, with warts, humor, tragedy, and triumph . . . An exceedingly rich book, a celebration of the human spirit that is brilliantly conceived, structured, and executed.” The Cincinnati Post

A Proud American Joe Foss,Donna Wild Foss,2002 Flying over Guadalcanal in the fall and winter of 1942-43, Joe Foss rewrote the aerial combat record books by becoming the first American to match legendary World War I ace Eddie Rickenbacker's twenty-six victories, a feat that earned him the Medal of Honor. After the war, Joe Foss entered a new war zone--politics--becoming South Dakota's youngest governor. In the 1960s he was tapped to become the founding commissioner of the American Football League and was instrumental in creating the Super Bowl.

Zero Fighter Martin Caidin,1970 The agile, brilliant fighter planes and their masterly pilots blasted all oppositions from the air. The '... weren't just good--they were hell on wheels'. For a fatally long time the horrifying reports came in and were disbelieved. For that space zero fighter ruled the Pacific sky.

Danger's Hour Maxwell Taylor Kennedy,2009-11-03 Drawing on years of research and firsthand interviews with both American and Japanese survivors, Maxwell Taylor Kennedy draws a gripping portrait of men bravely serving their countries in war and the advent of a terrifying new weapon, suicide bombing, that nearly halted the most powerful nation in the world. In the closing months of World War II, Americans found themselves facing a new weapon: kamikazes--the first men to use airplanes as suicide weapons. By the beginning of 1945, facing imminent invasion, Japan turned to its most idealistic young men and demanded of them the greatest sacrifice. On May 11, 1945, days after Germany's surrender, the USS Bunker Hill--with thousands of crewmen and the most sophisticated naval technology available--was 70 miles off the coast of Okinawa when pilot Kiyoshi Ogawa flew his plane into the ship, killing 393 Americans in the worst suicide attack against America until September 11.--From publisher description.

Hirohito's War Francis Pike,2016-09-08 Named one of Foreign Affairs' Best Books of 2016 In his magisterial 1,208 page narrative of the Pacific War, Francis Pike's Hirohito's War offers an original interpretation, balancing the existing Western-centric view with attention to the Japanese perspective on the conflict. As well as giving a 'blow-by-blow' account of campaigns and battles, Francis Pike offers many challenges to the standard interpretations with regards to the causes of the war; Emperor Hirohito's war guilt; the inevitability of US Victory; the abilities of General MacArthur and Admiral Yamamoto; the role of China, Great Britain and Australia; military and naval technology; and the need for the fire-bombing of Japan and the eventual use of the atom bomb on Hiroshima and Nagasaki. Hirohito's War is accompanied by additional online resources, including more details on logistics, economics, POWs, submarines and kamikaze, as well as a 1930-1945 timeline and over 200 maps.

Iwo Jima and the Bonin Islands in U.S.-Japan Relations Robert D. Eldridge,2015-04-19 Like my two other books about security and territorial issues in the U.S.-Japan relationship, The Origins of the Bilateral Okinawa

Problem: Okinawa in U.S.-Japan Relations, 1945-1952³ and The Return of the Amami Islands: The Reversion Movement and U.S.-Japan Relations, 4 this is first and foremost a study on the intra-alliance dynamics in which one country, the United States, continued to occupy and administer islands that were recognized as Japanese territory but, for a number of reasons, the United States and its wartime allies felt necessary to continue to administer. The longer this control continued, the more unnecessary it was seen by increasingly larger segments of the public and government of both countries due to the political erosion of the relationship caused by this friction. The question for policy makers and political leaders was finding the balance between security concerns, reversion demands, and national sentiment (in both countries), particularly as it related to the memory and sacrifices at Iwo Jima, in an effort to maintain friendly and cooperative relations. Eventually, the U.S. government agreed to Japanese requests to return the islands and this was done on 26 June 1968, a full four years prior to the even more problematic, but strategically important, Okinawa.

The First Team John Lundstrom, 2013-04-11 Hailed as one of the finest examples of aviation research, this comprehensive 1984 study presents a detailed and scrupulously accurate operational history of carrier-based air warfare. From the earliest operations in the Pacific through the decisive Battle of Midway, it offers a narrative account of how ace fighter pilots like Jimmy Thach and Butch O'Hare and their skilled VF squadron mates - called the first team - amassed a remarkable combat record in the face of desperate odds. Tapping both American and Japanese sources, historian John B. Lundstrom reconstructs every significant action and places these extraordinary fighters within the context of overall carrier operations. He writes from the viewpoint of the pilots themselves, after interviewing some fifty airmen from each side, to give readers intimate details of some of the most exciting aerial engagements of the war. At the same time he assesses the role the fighter squadrons played in key actions and shows how innovations in fighter tactics and gunnery techniques were a primary reason for the reversal of American fortunes. After more than twenty years in print, the book remains the definitive account and is being published in paperback for the first time to reach an even larger audience.

366 Days of World War II Richard Binder, 2015-02-21 World War II lasted six years. That's 2,194 days. What happened in those six years? In this new diary, author Richard Binder takes a radical new approach to telling the story of the worst conflict humanity has ever experienced. Instead of trying to cover everything, he relates the happenings of just 366 days, the length of a single year. Choosing events great and small from the beginning of the war to its bitter end, he gives you a fascinating and sometimes shocking look at things you know from your high-school history and things you may never have heard of.

Boeing B-29 Superfortress John M. Campbell, 1997 The famed B-29 Superfortress is presented in this all new collection of World War II and Korean War era photographs. Many of the 850+ photographs appear here for the first time and are identified as to unit and location. John Campbell is also the author of Consolidated B-24 Liberator, and Talisman: A Collection of Nose Art (available from Schiffer Publishing Ltd.).

The Mighty Eighth Roger Anthony Freeman, 2000 The US 8th Air Force was based in the UK from 1942 onwards, spread exclusively across East Anglia and operating from over 40 locations. The remains of some of these sites can still be found and a few are still airfields. The 8th flew intensive bomber and fighter sorties over Europe. Over 2000 aircraft, mostly B-17s, B-26s and P-47s, involving 150,000 men and a vastly sophisticated supply chain, were engaged in a ceaseless war of high-altitude daylight precision bombing that did much to secure eventual Allied success.
