*Narrow Dog to Carcassonne* Terry Darlington, 2008-03-25 The hilarious and true story of two senior-citizens and their whippet dog who hatch, plan and carry out a “lunatic scheme” to sail from Stone in Staffordshire to Carcassonne in the South of France.

**Hornblower and the Atropos** C.S. Forester, 2023-02-21 In the wake of a humbling incident aboard a canal boat in the Cotswolds, young Captain Horatio Hornblower arrives in London to take command of the Atropos, a 22-gun sloop barely large enough to require a captain. Her first assignment under Hornblower's command is as flagship for the funeral procession of Lord Nelson. Soon Atropos is part of the Mediterranean Fleet's harassment of Napoleon, recovering treasure that lies deep in Turkish waters and boldly challenging a Spanish frigate several times her size. At the center of each adventure is Hornblower, Forester's most inspired creation, whose blend of cautious preparation and spirited execution dazzles friend and foe alike.

Offshore Penelope Fitzgerald, 1998 On the Battersea Reach of the Thames, a mixed bag of eccentrics lives in houseboats. Belonging to neither land nor sea, they belong to one another. How each of their lives complicates the others is the stuff of this perfect little novel. Winner of a 1997 Booker Prize.

*The Coal Question* William Stanley Jevons, 1865 Reproduction from the The Goldsmiths' Library of Economic Literature, Senate House Library, University of London. Publisher's advertising: [2] p., 3rd count. Includes bibliographical references. Access is available to the Yale community.

**Narrow Dog to Indian River** Terry Darlington, 2009-04-28 Following the triumph of thier trip through France to Carcassonne, these two pensioners (and thier whippet, Jim) now cast off in thier narrowboat down the Intracoastal Waterway of the USA – from Virginia to the Gulf of Mexico.

The Sumerians Samuel Noah Kramer, 2010-09-17 The Sumerians, the pragmatic and gifted people who preceded the Semites in the land first known as Sumer and later as Babylonia, created what was probably the first high civilization in the history of man, spanning the fifth to the second millenniums B.C. This book is an unparalleled compendium of what is known about them. Professor Kramer communicates his enthusiasm for his subject as he outlines the history of the Sumerian civilization and describes their cities, religion, literature, education, scientific achievements, social structure, and psychology. Finally, he considers the legacy of Sumer to the ancient and modern world. There are few scholars in the world qualified to write such a book, and certainly Kramer is one of them. . . . One of the most valuable features of this book is the quantity of texts and fragments which are published for the first time in a form available to the general reader. For the layman the book provides a readable and up-to-date introduction to a most fascinating culture. For the specialist it presents a synthesis with which he may not agree but from which he will nonetheless derive stimulation.—American Journal of Archaeology An uncontested authority on the civilization of Sumer, Professor Kramer writes with grace and urbanity.—Library Journal

*Waterways* Kyell Gold, 2010-12 Kory was having enough trouble in high school. His girlfriend just dumped him, his poetry made him a target for ridicule, and college applications were looming. The very last thing he needed was to fall in love with another boy. Waterways is the complete novel from award-winning author Kyell Gold that includes his beloved story Aquifers. Join Kory as his feelings and faith collide, washing away the life he knew. His brother Nick, friends Samaki and Malaya, and Father Joe are there to help, but it's Kory who has to navigate the thrills and perils of the new waterways that make up his life. At stake? Nothing much -- just a chance at true love and happiness. And he still has to graduate from high school...

*The Spirit of Cities* Daniel A. Bell, Avner de-Shalit, 2013-10-27 A lively and personal book that returns the city to political thought. Cities shape the lives and outlooks of billions of people, yet they have been overshadowed in contemporary political thought by nation-states, identity groups, and concepts like justice and freedom. The Spirit of Cities revives the classical idea that a city expresses its own distinctive ethos or values. In the ancient world, Athens was synonymous with democracy and Sparta represented military discipline. In this original and engaging book, Daniel Bell and Avner de-Shalit explore how this classical idea can be applied to today's cities, and they explain why philosophy and the social sciences need to rediscover the spirit of cities. Bell and de-Shalit look at nine modern cities and the prevailing ethos that distinguishes each one. The cities are Jerusalem (religion), Montreal (language), Singapore (nation building), Hong Kong (materialism), Beijing (political power), Oxford (learning), Berlin (tolerance and intolerance), Paris (romance), and New York (ambition). Bell and de-Shalit draw upon the richly varied histories of each city, as well as novels, poems, biographies, tourist guides, architectural landmarks, and the authors' own personal reflections and insights. They show how the ethos of each city is expressed in political, cultural, and economic life, and also how pride in a city's ethos can oppose the homogenizing tendencies of globalization and curb the excesses of nationalism. The Spirit of Cities is unreservedly impressionistic. Combining strolling and storytelling with cutting-edge theory, the book encourages debate and opens up new avenues of inquiry in philosophy and the social sciences. It is a must-read for lovers of cities everywhere. In a new preface, Bell and de-Shalit further develop their idea of civicism, the pride city dwellers feel for their city and its ethos over that of others.

Wealth, Poverty and Politics Thomas Sowell, 2016-09-06 In *Wealth, Poverty, and Politics*, Thomas Sowell, one of the foremost conservative public intellectuals in this country, argues that political and ideological struggles have led to dangerous confusion about income inequality in America. Pundits and politically motivated economists trumpet ambiguous statistics and sensational theories while ignoring the true determinant of income inequality: the production of wealth. We cannot properly understand inequality if we focus exclusively on the distribution of wealth and ignore wealth production factors such as geography, demography, and culture. Sowell contends that liberals have a particular interest in misreading the data and chastises them for using income inequality as an argument for the welfare state. Refuting Thomas Piketty, Paul Krugman, and others on the left, Sowell draws on accurate empirical data to show that the inequality is not nearly as extreme or sensational as we have been led to believe. Transcending partisanship through a careful examination of data, *Wealth, Poverty, and Politics* reveals the truth about the most explosive political issue of our time.

*London's Urban Landscape* Christopher Tilley, 2019-05-07 *London's Urban Landscape* is the first major study of a global city to adopt a materialist perspective and stress the significance of place and the built environment to the urban landscape. Edited by Christopher Tilley, the volume is inspired by phenomenological thinking and presents fine-grained ethnographies of the practices of everyday life in London. In doing so, it charts a unique perspective on the city that integrates ethnographies of daily life with an analysis of material culture. The first part of the volume considers the residential sphere of urban life, discussing in detailed case studies ordinary residential streets, housing estates, suburbia and London's mobile 'linear village' of houseboats. The second part analyses the public sphere, including ethnographies of markets, a park, the social rhythms of a taxi rank, and graffiti and street art. *London's Urban Landscape* returns us to the everyday lives of people and the manner in which they understand their lives. The deeply sensuous character of the embodied experience of the city is invoked in the thick descriptions of entangled relationships between people and places, and the paths of movement between them. What stories do door bells and house facades tell us about contemporary life in a Victorian terrace? How do antiques acquire value and significance in a market? How does living in a concrete megastructure relate to the lives of the people who dwell there? These and a host of other questions are addressed in this fascinating book that will appeal widely to all readers interested in London or contemporary urban life.

**Narrow Dog to Wigan Pier** Terry Darlington,2012-06-21 At seventy-five, Terry and Monica Darlington had done everything they could think of doing, including starting a business and becoming athletes and running a literary society.Lately they had become boating adventurers and Terry a bestselling writer. But in their Midlands canal town in November, life was looking dull and short on surprises. Then their famous canal boat was destroyed by fire. Within a few days they had bought a new one and soon headed north in the Phyllis May 2 - to Liverpool, Lancaster, the Pennines and Wigan Pier. Terry recorded the journey, and alongside it the story of his life and his marriage and his dog Jim, with his broken ear like a flat cap, and Monica’s dog Jess, known with heartbreaking reason as the Flying Catastrophe. Funny, affecting and beautifully told, this is a story that brims with incident and excitement, and is full of the famous and fascinating people the Darlingtons have met - a story of an adventurous life well lived.

**Edison** Frank Lewis Dyer,Thomas Commerford Martin,1910  
**Towns and Villages of the Lower Ohio** Darrel E. Bigham,2015 No other region in America is so fraught with projected meaning as Appalachia. Many people who have never set foot in Appalachia have very definite ideas about what the region is like. Whether these assumptions originate with movies like Deliverance (1972) and Coal Miner's Daughter (1980), from Robert F. Kennedy's widely publicized Appalachian Tour, or from tales of hiking the Appalachian Trail, chances are these suppositions serve a purpose to the person who holds them. A person's concept of Appalachia may function to reassure them that there remains an authentic America untouched by consumerism, to feel a sense of superiority about their lives and regions, or to confirm the notion that cultural differences must be both appreciated and managed. In *Selling Appalachia: Popular Fictions, Imagined Geographies, and Imperial Projects*, 1878-2003, Emily Satterwhite explores the complex relationships readers have with texts that portray Appalachia and how these varying receptions have created diverse visions of Appalachia in the national imagination. She argues that words themselves not inherently responsible for creating or destroying Appalachian stereotypes, but rather that readers and their interpretations assign those functions to them. Her study traces the changing visions of Appalachia across the decades from the Gilded Age (1865-1895) to the present and includes texts such as John Fox Jr.'s *Trail of the Lonesome Pine* (1908), Harriet Arnow's *Hunter's Horn* (1949), and Silas House's *Clay's Quilt* (2001), charting both the portrayals of Appalachia in fiction and readers' responses to them. Satterwhite's unique approach doesn't just explain how people view Appalachia, it explains why they think that way. This innovative book will be a noteworthy contribution to Appalachian studies, cultural and literary studies, and reception theory.

**Role of Transportation in the Industrial Revolution** Rick Szostak,1991-06-01 Szostak develops a model that establishes causal links between transportation and industrialization and shows how improvements in transportation could have a beneficial effect on an economy such as that of eighteenth-century England. This model shows the Industrial Revolution to involve four primary phenomena: increased regional specialization, the emergence of new industries, an expanding scale of production, and an accelerated rate of technological innovation. Through detailed analysis, Szostak explicates the effects of the different systems of transportation in France and England on the four components of the Industrial Revolution. He outlines the development in late eighteenth-century England of a reliable system of all-weather transportation, made up of turnpike roads and canals, that was far superior to the system in France at the same period. He goes on to examine in detail the iron, textile, and pottery industries in each country, focusing on the effect of the quality of available transportation on the decisions of individual entrepreneurs and innovators. Szostak shows that in every case these industries were more highly developed in England than in France.

**How to Build a Wooden Boat** David C. McIntosh,1988-03 David C. Bud McIntosh was a designer, builder, and sailor of large and small wooden cruising boats for more than 50 years, and wrote about it for over 10 of those years. He made his home on New Hampshire's Piscataqua River, where he was teacher and friend to both amateur and professional boatbuilders.

*Social Media in an English Village* Daniel Miller,2016-02-29 Daniel Miller spent 18 months undertaking an ethnographic study with the residents of an English village, tracking their use of the different social media platforms. Following his study, he argues that a focus on platforms such as Facebook, Twitter and Instagram does little to explain what we post on social media. Instead, the key to understanding how people in an English village use social media is to appreciate just how ‘English’ their usage has become. He introduces the ‘Goldilocks Strategy’: how villagers use social media to calibrate precise levels of interaction ensuring that each relationship is neither too cold nor too hot, but ‘just right’.
