**Talent Is Overrated** Geoff Colvin, 2011-01-11 What if everything you know about raw talent, hard work, and great performance is wrong? Few, if any, of the people around you are truly great at what they do. But why aren't they? Why don't they manage businesses like Jack Welch or Andy Grove, play golf like Tiger Woods or play the violin like Itzhak Perlman? Asked to explain why a few people truly excel, most of us offer one of two answers: hard work or a natural talent. However, scientific evidence doesn't support the notion that specific natural talents make great performers. In one of the most popular Fortune articles in years, Geoff Colvin offered new evidence that top performers in any field - from Tiger Woods and Winston Churchill to Warren Buffett and Jack Welch - are not determined by their inborn talents. Greatness doesn't come from DNA but from practice and perseverance honed over decades. And not just plain old hard work, but a very specific kind of work. The key is how you practice, how you analyze the results of your progress and learn from your mistakes, that enables you to achieve greatness. Now Colvin has expanded his article with much more scientific background and real-life examples. He shows that the skills of business - negotiating deals, evaluating financial statements, and all the rest - obey the principles that lead to greatness, so that anyone can get better at them with the right kind of effort. Even the hardest decisions and interactions

can be systematically improved. This new mind-set, combined with Colvin's practical advice, will change the way you think about your job and career - and will inspire you to achieve more in all you do.

**Energies of Transformation** Bonnie Greenwell,2002 This book is about the subtle energy of the life force, the pure consciousness beyond mind and the ecstatic experience of spiritual awakening. It also tells of physical collapse, psychic chaos, and personality upheaval, those elements of human transformation that uproot individuals to the core. It tells the stories of people, both ancient and modern, who have discovered and integrated an experience that pushes the edges of their sanity and their divinity. And it is a guide for survival and transformation. It appears that when people pray, meditate, or turn inward with great intensity to find God , what they may ultimately experience is the sat-chit-ananda of the ancient Indian scriptures. Sat is existence or beingness, the substance or essence that is all things. Chit is cosmic intelligence or knowledge that fills everything, a consciousness without personalidentity. Ananda is ecstatic bliss. Indian pandits identify these three qualities as the essential nature of existence. Direct intuition of them becomes possible following the eruption of Kundalini energy, which is latent in each of us. This book is to help you recognize and support a unique, universal and ageless process related to spiritual experience and psychological wholeness and identified in ancient times as Kundalini awakening.

*Themes and Issues in Asian Cartooning* John A. Lent,1999 Today, comic art is the favorite reading fare for millions of Asians, and is a government-sanctioned, value-added product, as in the case of Korean and Japanese animation. Yet not much is known about Asian cartooning. Themes and Issues in Asian Cartooning uses overviews and case studies by scholars to discuss Asian animation, humor magazines, gag cartoons, comic strips, and comic books. The first half of the book looks at contents and audiences of Malay humor magazines, cultural labor in Korean animation, the reception of Aladdin in Islamic Southeast Asia, and a Singaporean comic book as a reflection of that society's personality. Four other chapters treat gender and Asian comics, concentrating on Japanese anime and manga and Indian comic books.
