**Atlas of the Human Body** Branislav Vidic,Milan Milisavljevic,2017-03-10 Atlas of Human Body: Central Nervous System and Vascularization is a multidisciplinary approach to the technical coverage of anatomical structures and relationships. It contains surface and 3D dissection images, native and colored cross sectional views made in different planes, MRI comparisons, demonstrations of cranial nerve origins, distribution of blood vessels by dissection, and systematic presentation of arterial distribution from the precapillary level, using the methyl metacrylate injection and subsequent tissue digestion method. Included throughout are late prenatal (fetal) and early postnatal images to contribute to a better understanding of structure/relationship specificity of differentiation at various developmental intervals (conduits, organs, somatic, or branchial derivatives). Each chapter features clinical correlations providing a unique perspective of side-by side comparisons of dissection images, magnetic resonance imaging and computed tomography. Created after many years of professional and scientific cooperation between the authors and their parent institutions, this important resource will serve researchers, students, and doctors in their professional work. Contains over 700 color photos of ideal anatomical preparations and sections of each part of the body that have been prepared, recorded, and processed by the authors Covers existing gaps including developmental and prenatal periods, detailed vascular anatomy, and neuro anatomy Features a comprehensive alphabetical index of structures for ease of use Features a companion website which contains access to all images within the book

*Seven Days That Divide the World* John C. Lennox,2011-08-23 What did the writer of Genesis mean by “the first day”? Is it a literal week or a series of time periods? If I believe that the earth is 4.5 billion years old, am I denying the authority of Scripture? In response to the continuing controversy over the interpretation of the creation narrative in Genesis, John Lennox proposes a succinct method of reading and interpreting the first chapters of Genesis without discounting either science or Scripture. With examples from history, a brief but thorough exploration of the major interpretations, and a look into the particular significance of the creation of human beings, Lennox suggests that Christians can heed modern scientific knowledge while staying faithful to the biblical narrative. He moves beyond a simple response to the controversy, insisting that Genesis teaches us far more about the God of Jesus Christ and about God’s intention for creation than it does about the age of the earth. With this book, Lennox offers a careful yet accessible introduction to a scientifically-savvy, theologically-astute, and Scripturally faithful interpretation of Genesis.

The Substance of Style Virginia Postrel,2009-03-17 Whether it's sleek leather pants, a shiny new Apple computer, or a designer toaster, we make important decisions as consumers every day based on our sensory experience. Sensory appeals are everywhere, and they are intensifying, radically changing how Americans live and work. The twenty-first century has become the age of aesthetics, and whether we realize it or not, this influence has taken over the marketplace, and much more. In this penetrating, keenly observed book, Virginia Postrel makes the argument that appearance counts, that aesthetic value is real. Drawing from fields as diverse as fashion, real estate, politics, design, and economics, Postrel deftly chronicles our culture's aesthetic imperative and argues persuasively that it is a vital component of a healthy, forward-looking society. Intelligent, incisive, and thought-provoking, *The Substance of Style* is a groundbreaking portrait of the democratization of taste and a brilliant examination of the way we live now.

Plandemic Mikki Willis,2021-10-19 USA Today Bestseller The incredible true story of the most banned documentary in history. Researching the controversy arising after the release of the viral phenomenon known as Plandemic, the most seen and censored documentary in history, an investigative journalist sets out to disprove and debunk claims made throughout the film. Instead, the journalist opens a Pandora’s box to witness firsthand an underworld of corruption, lies, and the darkest of unsolved mysteries. The result? A fascinating behind-the-scenes account about the making of Plandemic and Plandemic: Indoctrination; an exposé of the truth behind the origins of COVID-19; an alarming examination of individuals, such as Dr. Anthony Fauci and Bill Gates, and organizations like the CDC, NIH, WHO, and Bill & Melinda Gates Foundation, among others, driving the global vaccination agenda; and a look at the tech giant and mainstream media forces doing their utmost to silence and suppress the veracity of these findings. Investigative filmmaker Mikki Willis focuses his unflinching lens on two key subjects: virologist Dr. Judy Mikovits, who speaks frankly about the machinations for control and profit corrupting individuals and institutions tasked with overseeing public health; and Dr. David E. Martin, whose research and shocking data corroborate allegations of conflicts of interest. The US media and fact checkers condemned the two documentaries as “dangerous conspiracy theory.” Today, the two-part bombshell is being hailed globally for warning the world of the crimes against humanity that are just now being uncovered. From the death of his brother and mother due to bad medicine, to his awakening at Ground Zero on 9/11, Mikki Willis describes in detail the incredible life experiences that led him to risk his career and safety to create the Plandemic series.

**Fossil Men** Kermit Pattison,2020-11-10 Riveting. ... Pattison's uncanny ability [is] to write evocatively about science. ... In this, he is every bit as good as the best scientist writers. —New York Times Book Review (Editors' Choice) Brilliant. ... A work of staggering depth. —Minneapolis Star Tribune A decade in the making, *Fossil Men* is a scientific detective story played out in anatomy and the natural history of the human body: the first full-length account of the discovery of a startlingly unpredicted human ancestor more than a million years older than Lucy It is the ultimate mystery: where do we come from? In 1994, a team led by fossil-hunting legend Tim White uncovered a set of ancient bones in Ethiopia’s Afar region. Radiometric dating of nearby rocks indicated the resulting skeleton, classified as *Ardipithecus ramidus*—nicknamed “Ardi”—was an astounding 4.4 million years old, more than a million years older than the world-famous “Lucy.” The team spent the next 15 years studying the bones in strict secrecy, all while continuing to rack up landmark fossil discoveries in the field and becoming increasingly ensnared in bitter disputes with scientific peers and Ethiopian bureaucrats. When finally revealed to the public, Ardi stunned scientists around the world and challenged a half-century of orthodoxy about human evolution—how we started walking upright, how we evolved our nimble hands, and, most significantly, whether we were descended from an ancestor that resembled today’s chimpanzee. But the discovery of Ardi wasn’t just a leap forward in understanding the roots of humanity--it was an attack on scientific convention and the leading authorities of human origins, triggering an epic feud about the oldest family skeleton. In *Fossil Men*, acclaimed journalist Kermit Pattison brings us a cast of eccentric, obsessive scientists, including White, an uncompromising perfectionist whose virtuoso skills in the field were matched only by his propensity for making enemies; Gen Suwa, a Japanese savant whose deep expertise about teeth rivaled anyone on Earth; Owen Lovejoy, a onetime creationist-turned-paleoanthropologist with radical insights into human locomotion; Berhane Asfaw, who survived imprisonment and torture to become Ethiopia’s most senior paleoanthropologist; Don Johanson, the discoverer of Lucy, who had a rancorous falling out with the Ardi team; and the Leakeys, for decades the most famous family in paleoanthropology. Based on a half-decade of research in Africa, Europe and North America, *Fossil Men* is not only a brilliant investigation into the origins of the human lineage, but the oldest of human emotions: curiosity, jealousy, perseverance and wonder.

*Ghettoside* Jill Leovy,2015 Discusses the hundreds of murders that occur in Los Angeles each year, and focuses on the story of the dedicated group of detectives who pursued justice at any cost in the killing of Bryant Tennelle--Publisher's description.
