**Strengthening Forensic Science in the United States** National Research Council, Division on Engineering and Physical Sciences, Committee on Applied and Theoretical Statistics, Policy and Global Affairs, Committee on Science, Technology, and Law, Committee on Identifying the Needs of the Forensic Sciences Community, 2009-07-29 Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. *Strengthening Forensic Science in the United States: A Path Forward* provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. *Strengthening Forensic Science in the United States* gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

**Rethinking Community Policing in International Police Reform** Deniz Kocak, 2018-09-13 Community policing has often been promoted, particularly in liberal democratic societies, as the best approach to align police services with the principles of good security sector governance (SSG). The stated goal of the community policing approach is to reduce fear of crime within communities, and to overcome mutual distrust between the police and the communities they serve by promoting police-citizen partnerships. This SSR Paper traces the historical origins of the concept of community policing in Victorian Great Britain and analyses the processes of transfer, implementation, and adaptation of approaches to community policing in Imperialland post-war Japan, Singapore, and Timor-Leste. The study identifies the factors that were conducive or constraining to the establishment of community policing in each case. It concludes that basic elements of police professionalism and local ownership are necessary preconditions for successfully implementing community policing according to the principles of good SSG. Moreover, external initiatives for community policing must be more closely aligned to the realities of the local context.
