Selling Above and Below the Line William Miller,2015-02-11 Most salespeople work hard to become proficient in reaching the frontline managers in their markets. However, a salesperson who wishes to achieve long-lasting success with a client will learn how to also appeal to top-level executives from an "above the line" perspective. Master sales trainer Skip Miller shows how to simultaneously sell to both the frontline manager as well as the executive who is more concerned with profit/loss indicators such as ROI, time saved, risk lowered, and productivity improved – a strategy used by Google, Apple, Cisco WebEx, and other powerhouses. In *Selling Above and Below the Line*, you will learn how to: Create energy by including executives early in the sales process. Ask the right questions and pinpoint big-picture financial needs. Keep "below the line" managers from feeling bypassed. Uncover value propositions that target each set of decision-makers. Sales that seem locked in will stall or go dark. Customers who have been loyal to you suddenly back out of the relationship due to decisions made above the manager's head. This often could have been avoided had the salesperson been intentional to sell both the technical and financial fit. In *Selling Above and Below the Line*, learn to effectively communicate both, leading to more successful and lucrative deals than ever before.

Welcome to Writing Workshop Stacey Shubitz,Lynne R. Dorfman,2019 Stacey

Shubitz and Lynne Dorfman warmly welcome you to experience writing workshop for the first time or in a new light with Welcome to Writing Workshop. Through strategic routines, tips, resources, and short focused video clips, teachers can create the sights and sounds of a thriving writing workshop where: * both students and teachers are working authors * students spend most of their time writing--not just learning about it * student choice is encouraged to help create engaged writers, not compliant ones * students are part of the formative assessment process * students will look forward to writing time--not dread it. From explanations of writing process and writing traits to small-group strategy lessons and minilessons, this book will provide the know-how to feel confident and comfortable in the teaching of writers.

Independent Music and Digital Technology in the Philippines Monika E.

Schoop,2017-04-21 Since the turn of the century, the impact of digital technologies on the promotion, production and distribution of music in the Philippines has both enabled and necessitated an increase in independent musical practices. In the first in-depth investigation into the independent music scene in the Philippines, Monika E. Schoop exposes and portrays the as yet unexplored restructurings of the Philippine music industries, showing that digital technologies have played an ambivalent role in these developments. While they have given rise to new levels of piracy, they have also offered unprecedented opportunities for artists. The near collapse of the transnational recording industry in the Philippines stands in stark contrast to a thriving independent music scene in the county's national capital region, Metro Manila, which cuts across musical genres and whose members successfully adjust to a rapidly evolving industry scenario. Independent practices have been facilitated by increased access to broadband Internet, the popularity of social media platforms and home recording technology. At the same time, changing music industry structures often leave artists with no other option but to operate independently. Based on extensive fieldwork online and offline, the book explores the diverse and innovative music production, distribution, promotion and financing strategies that have become constitutive of the independent music scene in twenty-first-century Manila.

Data Stream Management Minos Garofalakis,Johannes Gehrke,Rajeev

Rastogi,2016-07-11 This volume focuses on the theory and practice of data stream management, and the novel challenges this emerging domain poses for data-management algorithms, systems, and applications. The collection of chapters, contributed by authorities in the field, offers a comprehensive introduction to both the algorithmic/theoretical foundations of data streams, as well as the streaming systems and applications built in different domains. A short introductory chapter provides a brief summary of some basic data streaming concepts and models, and discusses the key elements of a generic stream query processing architecture. Subsequently, Part I focuses on basic streaming algorithms for some key analytics functions (e.g., quantiles, norms, join aggregates, heavy hitters) over streaming data. Part II then examines important techniques for basic stream mining tasks (e.g., clustering, classification, frequent itemsets). Part III discusses a number of advanced topics on stream processing algorithms, and Part IV focuses on system and language aspects of data stream processing with surveys of influential system prototypes and language designs. Part V then presents some representative applications of streaming techniques in different domains (e.g., network management, financial analytics). Finally, the volume concludes with an overview of current data streaming products and new application domains (e.g. cloud computing, big data analytics, and complex event processing), and a discussion of future directions in this exciting field. The book provides a comprehensive overview of core concepts and technological foundations, as well as various systems and applications, and is of particular interest to students, lecturers and researchers in the area of data stream management.
