Bougainville before the conflict Anthony J Regan,Helga M Griffin,2015-08-03 One of the most beautiful island groups of the Pacific, Bougainville has a remarkable history. Tragically, it is as the site of devastating civil conflict that Bougainville is perhaps best known. In exploring the rich environmental, cultural and social heritage of Bougainville before the conflict, this collection provides an insight into the long-term causes of the crisis. In doing so, it surveys such topics as Bougainville's prehistory and traditional cultures, the impact of German

and Australian colonialism, the attempts by disparate local cultures to find a common identity, the assertion of political autonomy in the face of coercion to integrate with Papua New Guinea, and contemporary efforts to resolve conflict and plan a viable future. A landmark collaboration between expert commentators on Bougainville and Bougainvilleans themselves, this volume provides a comprehensive picture for those seeking to understand Bougainville's history and future directions. Bougainville before the conflict was published in association with the State, Society and Governance in Melanesia Project, which is supported by The Australian National University and the Commonwealth of Australia.

Principles of Infrastructure Hideo Nakamura,Kotaro Nagasawa,Kazuaki Hiraishi,K. E. Seetha Ram,Atsushi Hasegawa,Chul Ju Kim,Kai Xu,2019-09-24 Infrastructure is a priority around the world for all stakeholders. Infrastructure projects can continue for several years, from planning and construction to the provision of services. As development in Asia and the Pacific accelerates, governments must invest more in infrastructure to ensure continued economic growth. This book draws on lessons and case studies from Japan and worldwide, covering broad and long-term infrastructure projects. It describes the principles of developing quality infrastructure and focuses on the various steps of a project--from design, planning, and construction to operation and management. It also discusses overseas development assistance, taking examples from Asian Development Bank and World Bank projects. This book is an important reference tool for policy makers in Asia who are planning and implementing large-scale public infrastructure.

Embedded Racism Debito Arudou,2021-11-26 Revised and updated for this Second Edition, Embedded Racism is

the product of three decades of work by a scholar living in Japan as a naturalized Japanese citizen. It offers a perspective into how Japan's overlooked racial discrimination not only undermines Japan's economic future but also emboldens white supremacists worldwide.

Peace through Tourism Lynda-ann Blanchard, Freya Higgins-Desbiolles, 2013-08-15 Peace through tourism refers to a body of analysis which suggests tourism may contribute to cross-cultural understanding, tolerance and even peace between communities and nations. What has been largely missing to date is a sustained critique of the potential and capacities of tourism to foster global peace. This timely volume fills this void, by providing a critical look at tourism in order to ascertain its potential as a social force to promote human rights, justice and peace. It presents an alternative characterisation of the possibilities for peace through tourism: embedding an understanding of the phenomenon in a deep grounding in multi-disciplinary perspectives and envisioning tourism in the context of human rights, social justice and ecological integrity. Such an approach engages the ambivalence and dichotomy of views held on peace tourism by relying on a pedagogy of peace. It integrates a range of perspectives from scholars from many disciplinary backgrounds, non-governmental organisations (NGOs), tourism industry operators and community, all united by an interest in critical approaches to understanding peace through tourism. Additionally diverse geo-political contexts are represented in this book from the USA, India, Japan, Israel, Palestine, Kenya, the Koreas, Indonesia, East Timor and Indigenous Australia. Written by leading academics, this groundbreaking book will provide students, researchers and academics a sustained critique of the potential and capacities of tourism to foster global peace.

Shipping Economics Kevin Cullinane, 2005-06-15

Shipping is by far the most significant mode of transportation for the carriage of freight. In terms of volume alone, no other mode comes close. Its dominance is even more overwhelming when distances are accounted for. This book is concerned with the economics of this pivotal mode of transportation. It reveals that the influences on the development and current state of shipping economics research are extremely eclectic. The various chapters in the book represent areas that are of central concern to ongoing research in the field. As such, the book is useful to students, researchers, industrialists, policy makers and consultants. The authors of the contributed chapters are some of the leading names in the world of shipping economics, addressing a number of diverse areas: The econometric modeling of shipping markets; Shipping finance (a critical issue in such a capital intensive industry); Fiscal policy (and its impact on an international industry with great asset mobility) and Safety and security (aspects that have risen to prominence with increasing concerns over the environment and international terrorism). Ultimately, while shipping as a business depends upon trade, it is absolutely certain that the business of trade depends upon shipping. The final two chapters, therefore, incorporate aspects of network economics, welfare economics and international trade theory to analyze where and how shipping sits within the wider perspective of industrial supply chains. Professor Kevin Cullinane, BA BSc MSc PhD FCILT CNI Professor Kevin Cullinane is Chair in Marine Transport and Management at the University of Newcastle in the U.K. He was previously Professor and Head of the Department of Shipping and Transport Logistics at the Hong Kong Polytechnic University, Head of the Centre for International Shipping and Transport at Plymouth University, Senior Partner in his own transport

consultancy company and Research Fellow at the University of Oxford Transport Studies Unit. He is a Fellow of the Chartered Institute of Logistics and Transport and has been a transport adviser to the governments of Hong Kong, Egypt, Chile and the U.K. He holds visiting Professorships at a number of institutions and an Honorary Professorship at the University of Hong Kong.

Drone Law and Policy Anthony A. Tarr, Julie-Anne Tarr, Maurice Thompson, Jeffrey Ellis, 2021-08-11 Drone Law and Policy describes the drone industry and its evolution, describing the benefits and risks of its exponential growth. It outlines the current and proposed regulatory framework in Australia, the United States, the United Kingdom and Europe, taking into consideration the current and evolving technological and insurance landscape. This book makes recommendations as to additional regulatory and insurance initiatives which the authors believe are necessary to achieve an effective balance between the various competing interests. The 23 chapters are written by global specialists on crucial topics, such as terrorism and security, airport and aircraft safety, maritime deployment, cyber-risks, regulatory oversight, licensing, standards and insurance. This book will provide authoritative reference and expert guidance for regulators and government agencies, legal practitioners, insurance companies and brokers globally, as well as for major organisations utilising drones in industrial applications.

Twelve Years a Slave Solomon Northup, 2024-01-04 Filmatized in 2013 and the official recipient of three Oscars, Solomon Northup's powerful slave narrative 'Twelve Years a

Slave' depicts Nortup's life as he is sold into slavery after having spent 32 years of his life living as a free man in New York. Working as a travelling musician, Northup goes to Washington D.C, where he is kidnapped, sent to New Orleans, and sold to a planter to suffer the relentless and brutal life of a slave. After a dozen years, Northup escapes to return to his family and pulls no punches, as he describes his fate and that of so many other black people at the time. It is a harrowing but vitally important book, even today. For further reading on this subject, try 'Uncle Tom's Cabin' by Harriet Beecher Stowe. Solomon Northup (c.1807-c.1875) was an American abolitionist and writer, best remembered for his powerful race memoir 'Twelve Years a Slave'. At the age of 32, when he was a married farmer, father-of-three, violinist and free-born man, he was kidnapped in Washington D.C and shipped to New Orleans, sold to a planter and enslaved for a dozen years. When he gained his freedom, he wrote his famous memoir and spent some years lecturing across the US, on behalf of the abolitionist movement. 'Twelve Years a Slave' was published a year after 'Uncle Tom's Cabin' by Harriet Beecher Stowe and built on the anti-slavery momentum it had developed. Northup's final years are something of a mystery, though it is thought that he struggled to cope with family life after being freed.

Robotics and Automation in Construction Carlos Balaguer, Mohamed Abderrahim, 2008-10-01 This book addresses several issues related to the introduction of automaton and robotics in the construction industry in a collection of 23 chapters. The chapters are grouped in 3 main sections according to the theme or the type of technology they treat. Section I is dedicated to describe and analyse the main research challenges of Robotics and Automation in Construction (RAC). The second section

consists of 12 chapters and is dedicated to the technologies and new developments employed to automate processes in the construction industry. Among these we have examples of ICT technologies used for purposes such as construction visualisation systems, added value management systems, construction materials and elements tracking using multiple IDs devices. This section also deals with Sensorial Systems and software used in the construction to improve the performances of machines such as cranes, and in improving Human-Machine Interfaces (MMI). Authors adopted Mixed and Augmented Reality in the MMI to ease the construction operations. Section III is dedicated to describe case studies of RAC and comprises 8 chapters. Among the eight chapters the section presents a robotic excavator and a semi-automated façade cleaning system. The section also presents work dedicated to enhancing the force of the workers in construction through the use of Robotic-powered exoskeletons and body joint-adapted assistive units, which allow the handling of greater loads.

The Midnight Eye Guide to New Japanese Film Tom Mes,Jasper Sharp,2005 Thanks to directors such as Kitano, Miike and Miyazaki, Japanese cinema has recently undergone something of a resurgence. This title profiles the work of these established film-makers, as well as looking at the creations of new, up-and-coming directors.

Overcoming School Refusal Joanne Garfi,2018-01-31
School refusal affects up to 5% of children and is a complex and stressful issue for the child, their family and school. The more time a child is away from school, the more difficult it is for the child to resume normal school life. If school refusal becomes an ongoing issue it can negatively impact the child's social and educational development. Psychologist Joanne Garfi spends most of her working life assisting parents, teachers, school counsellors, caseworkers, and community policing officers on how best to deal with school refusal. Now her experiences and expertise are available in this easy-to-read practical book. Overcoming School Refusal helps readers understand this complex issue by explaining exactly what school refusal is and provides them with a range of strategies they can use to assist children in returning to school. Areas covered include: • types of school refusers • why children refuse to go to school • symptoms • short term and long term consequences • accurate assessment • treatment options • what parents can do • what schools can do • dealing with anxious high achievers • how to help children on the autism spectrum with school refusal

To Stand with the Nations of the World Mark Ravina,2017-09-15
The samurai radicals who overthrew the last shogun in 1868 promised to restore ancient and pure Japanese ways. Foreign observers were terrified that Japan would lapse into violent xenophobia. But the new Meiji

government took an opposite course. It copied best practices from around the world, building a powerful and modern Japanese nation with the help of European and American advisors. While revering the Japanese past, the Meiji government boldly embraced the foreign and the new. What explains this paradox? How could Japan's 1868 revolution be both modern and traditional, both xenophobic and cosmopolitan? To Stand with the Nations of the World explains the paradox of the Restoration through the forces of globalization. The Meiji Restoration was part of the global long nineteenth century during which ambitious nation states like Japan, Britain, Germany, and the United States challenged the world's great multi-ethnic empires--Ottoman, Qing, Romanov, and Hapsburg. Japan's leaders wanted to celebrate Japanese uniqueness, but they also sought international recognition. Rather than simply mimic world powers like Britain, they sought to make Japan distinctly Japanese in the same way that Britain was distinctly British. Rather than sing God Save the King, they created a Japanese national anthem with lyrics from ancient poetry, but Western-style music. The Restoration also resonated with Japan's ancient past. In the 600s and 700s, Japan was threatened by the Tang dynasty, a dynasty as powerful as the Roman empire. In order to resist the Tang, Japanese leaders borrowed Tang methods, building a centralized Japanese state on Tang models, and learning continental science and technology. As in the 1800s, Japan co-opted international norms while insisting on Japanese distinctiveness. When confronting globalization in 1800s, Japan looked back to that ancient globalization of the 600s and 700s. The ancient past was therefore not remote or distant, but immediate and vital.
