However, the crafts are so easy that non-English crafters will also be able to

Bally - A History of Footwear in the Interwar Period

Anna-Brigitte Schlittler, Katharina Tietze, 2021-02-28 Carl Franz Bally founded a shoe factory in Switzerland in 1851. Within decades, the Bally name had achieved worldwide recognition for its high-quality footwear. The history of modern footwear can be traced through the lens of Bally's corporate evolution. This book brings together the results of research on such topics as the economic importance of fashion, Bally's fortunes in the US, the career of shoe design, the sourcing and use of materials, and the rise of strategic product display. The research focuses on the 1930s and 1940s: years of economic crisis and war, characterized by a wide diversity of designs and increasing variety in product range. Shortages also led to experiments with materials and technical innovations. Featuring numerous points of contact with adjacent fields of historical study, this publication marks a contribution to the history of fashion as the history of industrially manufactured products.

The Well Spring of the Goths Ingemar Nordgren, 2004 The Goths-a rumored people first known by history around the river Vistula in present Poland-was the people that more than other contributed to the fall of the Roman Empire. It was however also the Goths who preserved the Roman culture against other Germanic tribes. Earlier it has been generally assumed the Goths

originated in Scandinavia but during the 20th c. many scholars have grown skeptical. The author has, using both Classical and Nordic sources and supplementary sciences, made probable there is an intimate connection between the Goths and the Nordic countries. Consequently it is quite possible that at least part of the Goths have a Nordic origin. The book rests on the basic hypothesis that the Goths are not a people but a number of tribes and peoples united through a common religious/cultic origin. The old dispute concerning the relationship between Svear and Gautar also gets quite a new meaning. The book is interdisciplinary and embraces history, religion, arts, linguistics and archaeology. In 1999 Ingemar Nordgren received his Ph.D. at Odense University, Denmark The book builds to a considerable extent on his dissertation but has been updated and partly rewritten with brand new material.

Gear Acquisition Syndrome Jan-Peter Herbst,Jonas Menze,2021-04-19 Gear Acquisition Syndrome, also known as GAS, is commonly understood as the musicians unrelenting urge to buy and own instruments and equipment as an anticipated catalyst of creative energy and bringer of happiness. For many musicians, it involves the unavoidable compulsion to spend money one does not have on gear perhaps not even needed. The urge is directed by the belief that acquiring another instrument will make one a better player. This book pioneers research into the complex phenomenon named GAS from a variety of disciplines, including popular music studies and music technology, cultural and leisure

studies, consumption research, sociology, psychology and psychiatry. The newly created theoretical framework and empirical studies of online communities and offline music stores allow the study to consider musical, social and personal motives, which influence the way musicians think about and deal with equipment. As is shown, GAS encompasses a variety of practices and psychological processes. In an often life-long endeavour, upgrading the rig is accompanied by musical learning processes in popular music.

A Dictionary of the Psalter Matthew Britt, 1928

E-Learning in Europe - Learning Europe Michael Kindt, Ullrich Dittler, Helge Kahler, This book contains contributions about the past, present and future of e-learning in twelve European countries. The papers are written by experts about their respective countries, together with one paper that deals with the subject from a transnational perspective. The main question treated and answered in this book is how digital media has contributed to Higher Education Development in different national contexts. Beyond a mere description of the situation in different countries, the socio-technical approach adopted in this book also offers the opportunity to make comparisons and thus fosters understanding between experts from different disciplines and cultures. This book takes stock of a decade of digital media in Higher Education in Europe by presenting a first comparative approach and encouraging discussion by adopting a relativist rather than a generalist approach. Readers are thus stimulated to envisage how e-learning might have developed in their own work and learning context and to shape how it may do so.
