Practical Ship Design D.G.M. Watson,2002-02-22 The ever-growing demand for commercial activities at sea has meant that ships are rapidly developing and that the rules governing their construction and operation are changing. Practical Ship Design records these changes, their outcomes and the reasoning behind them. It deals with every aspect of ship design and handles a wide range of both merchant ships and naval ships with authority. It provides coverage of cargo ships and passenger ships, tugs, dredgers and other service craft. It also includes concept design, detail design, structural design, hydrodynamics design, the effect of regulations, the preparation of specifications and matters of costs and economics. Drawing on the author's extensive practical experience, Practical Ship Design is likely to interest everybody involved in the design, construction, repair and operation of ships. Students and the most experienced professionals will all benefit from the book's vast store of design data and its conclusions and recommendations.

The Leatherback Turtle James R. Spotila,Pilar Santidrián Tomillo,2015-10-30 The most comprehensive book ever written on leatherback sea turtles. Weighing as much as 2,000 pounds and reaching lengths of over seven feet, leatherback turtles are the world's largest reptile. These unusual sea turtles have a thick, pliable shell that helps them to withstand great depths—they can swim more than one thousand meters below the surface in search of food. And what food source sustains these goliaths? Their diet consists almost exclusively of jellyfish, a meal they crisscross the oceans to find. Leatherbacks have been declining in recent decades, and some predict they will be gone by the end of this century. Why? Because of two primary factors: human redevelopment of nesting beaches and commercial fishing. There are only twenty-nine index beaches in the world where these turtles nest, and there is immense pressure to develop most of them into homes or resorts. At the same time, longline and gill net fisheries continue to overwhelm waters frequented by leatherbacks. In *The Leatherback Turtle*, James R. Spotila and Pilar Santidrián Tomillo bring together the world's leading experts to produce a volume that reveals the biology of the leatherback while putting a spotlight on the conservation problems and solutions related to the species. The book leaves us with options: embark on the conservation strategy laid out within its pages and save one of nature's most splendid creations, or watch yet another magnificent species disappear.

Human Lifeworlds David Dunér,Göran Sonesson,2016 This book, which presents a cognitive-semiotic theory of cultural evolution, including that taking place in historical time, analyses various cognitive-semiotic artefacts and abilities. It claims that what makes human beings human is fundamentally the semiotic and cultural skills by means of which they endow their Lifeworld with meaning. The properties that have made human beings special among animals living in the terrestrial biosphere do not derive entirely from their biological-genetic evolution, but also stem from their interaction with the environment, in its culturally interpreted form, the Lifeworld. This, in turn, becomes possible thanks to the human ability to learn from other thinking beings, and to transfer experiences, knowledge, meaning, and perspectives to new generations.

Brief History of Indonesia Tim Hannigan,2015-08-18 Sultans, Spices, and Tsunamis: The Incredible Story of the World's Largest Archipelago Indonesia is by far the largest nation in Southeast Asia and has the fourth largest population in the world after the United States. Indonesian history and culture are especially relevant today as the Island nation is an emerging power in the region with a dynamic new leader. It is a land of incredible diversity and unending paradoxes that has a long and rich history stretching back a thousand years and more. Indonesia is the fabled Spice Islands of every school child's dreams—one of the most colorful and fascinating countries in history. These are the islands that Europeans set out on countless voyages of discovery to find and later fought bitterly over in the 15th, 16th and 17th centuries. This was the land that Christopher Columbus sought, and Magellan actually reached and explored. One tiny Indonesian island was even exchanged for the island of Manhattan in 1667! This fascinating history book tells the story of Indonesia as a narrative of kings, traders, missionaries, soldiers and revolutionaries, featuring stormy sea crossings, fiery volcanoes, and the occasional tiger. It recounts the colorful visits of foreign travelers who have passed through these shores for many centuries—from Chinese Buddhist pilgrims and Dutch adventurers to English sea captains and American movie stars. For readers who want an entertaining introduction to Asia's most fascinating country, this is delightful reading.

Anagram Solver Bloomsbury Publishing,2009-01-01 Anagram Solver is the essential guide to cracking all types of quiz and crossword featuring anagrams. Containing over 200,000 words and phrases, Anagram Solver includes plural noun forms, palindromes, idioms, first names and all parts of speech. Anagrams are grouped by the number of letters they contain with the letters set out in alphabetical order so that once the letters of an anagram are arranged alphabetically, finding the solution is as easy as locating the word in a dictionary.

Fugitive Knowledge Andreas Beer,Gesa Mackenthun,2015 Encounters between cultures are also encounters between knowledge systems. This volume brings together a number of case studies that explore how some knowledge in cultural contact zones becomes transient, evanescent, and ephemeral. The essays examine various aspects of cultural, especially colonial, epistemic exchanges, placing special emphasis on the fate of those knowledges that are not easily appropriated by or translated from one cultural sphere into another and thus remain at the margins of cross-cultural exchanges. In addition, the imposition of colonial power is unthinkable without the strategic deployment and use of knowledge; most colonial states, including those of Germany in the Baltic and in West Africa, were knowledge-acquiring machines - yet, acquisition always includes rejection, detainment and subjugation of recalcitrant epistemes. Bringing together insights from various scholarly disciplines, including literary studies, history, historical anthropology, and political science, the essays in this volume investigate how different or unfamiliar knowledge was, and in some cases still is, disarticulated by being belittled, discredited, and demonized. But they also show the strategies of resilience deployed by subjugated and subaltern people: the ways in which certain materials have escaped the coloniality of knowledge - how fragments and shards of other epistemologies remain inscribed in the polyphony and fuzziness of intercultural documents and archives.

Advances in Safety and Reliability C. Guedes Soares,1997-06-19 These three volumes comprise the papers presented at the ESREL '97 International Conference on Safety and Reliability held in Lisbon, Portugal, 17-20 June 1997. The purpose of the annual ESREL conferences is to provide a forum for the presentation of technical and scientific papers covering both methods and applications of safety and reliability to a wide range of industrial sectors and technical disciplines and, in so doing, to enhance cross-fertilization between them. A broad view is taken of safety and reliability which includes probabilistically-based methods, or, more generally, methods that deal with the quantification of the uncertainty in the knowledge of the real world and with decision-making under this uncertainty. The areas covered include: design and product liability; availability, reliability and maintainability; assessment and management of risks to technical systems; health and the environment; and mathematical methods of reliability and statistical analysis of data. The organization of the book closely follows the sessions of the conference with each of the three volumes containing papers from two parallel sessions, comprising a total of 270 papers by authors from 35 countries.

Connections in Steel Structures R. Bjorhovde,J. Brozzetti,A. Colson,1988-02-19 This book is the Proceedings of a State-of-the-Art Workshop on Connections and the Behaviour, Strength and Design of Steel Structures held at Laboratoire de Mécanique et Technologie, Ecole Normale, Cachan France from 25th to 27th May 1987. It contains the papers presented at the above proceedings and is split into eight main sections covering: Local Analysis of Joints, Mathematical Models, Classification, Frame Analysis, Frame Stability and Simplified Methods, Design Requirements, Data Base Organisation, Research and Development Needs. With papers from 50 international contributors this text will provide essential reading for all those involved with steel structures.

Agents of Translation John Milton,Paul Bandia,2009-02-12 Agents of Translation contains thirteen case studies by internationally recognized scholars in which translation has been used as a way of influencing the target

culture and furthering literary, political and personal interests. The articles describe Francisco Miranda, the “precursor” of Venezuelan independence, who promoted translations of works on the French Revolution and American independence; 19th century Brazilian translations of articles taken from the *Révue Britannique* about England; Ahmed Midhat, a late 19th century Turkish journalist who widely translated from Western languages; Henry Vizetelly , who (unsuccessfully) attempted to introduce the works of Zola to a wider public in Victorian Britain; and Henry Bohn, who, also in Victorian Britain, (successfully) published a series of works from the classics, many of which were expurgated; Yukichi Fukuzawa, whose adaptation of a North American geography textbook in the Meiji period promoted the concept of the superiority of the Japanese over their Asian neighbours; Samuli Suomalainen and Juhani Konkka, whose translations helped establish Finnish as a literary language; Hasan Alî Yücel, the Turkish Minister of Education, who set up the Turkish Translation Bureau in 1939; the Senegalese intellectual, Cheikh Anta Diop, whose work showed that the Ancient Egyptians had African rather than Indo-European roots; the Centro Cultural de Évora theatre group, which introduced Brecht and other contemporary drama into Portugal after the 1974 Carnation Revolution; 20th century Argentine translators of poetry; Haroldo and Augusto de Campos, who have brought translation to the forefront of literary activity in Brazil; and, finally, translators of Bosnian poetry, many of whom work in exile.

Ship Design for Efficiency and Economy Volker Bertram,H. Schneekluth,1998-10-15 The previous edition of Ship Design for Efficiency and Economy was published as a Butterworth's marine engineering title. It has now been completely revised and updated by Schneekluth and Bertram. This book gives advice to students and naval architects on how to design ships - in particular with regard to hull design. The previous edition of this book was published in 1987. Since then, there have been numerous important developments in this area and the new additions to this book reflect these changes. Chapter 3 has been completely rewritten with added information on methodology of optimization, optimization shells and concept exploration methods. There is also a new sub-chapter on Computational Fluid Dynamics (CFD) for ship-hull design. Plus, a new method to predict ship resistance based on the evaluation of modern ship hull design will be detailed. The emphasis of the this book is on design for operational economy. The material is directly usable not only in practice, in the design office and by shipowners, but also by students at both undergraduate and postgraduate levels.

Achtung-Panzer! Heinz Guderian,1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

Proceedings of the Thirty-first Annual Symposium on Sea Turtle Biology and Conservation ,2012

Sea Turtles of the Eastern Pacific Jeffrey A. Seminoff,Bryan P. Wallace,2012-06 The oceanographic conditions that make this an epicenter of sea turtle activity promote massive artisanal and industrial fishing efforts that, coupled with illegal harvesting of eggs and turtles, have led to declines of several turtle populations in the region. The essays and stories in Sea Turtles of the Eastern Pacific describe for the first time the history of this exploitation, as well as recent sea turtle conservation initiatives and scientific research in the region.

Regional State of the Coast Report United Nations Publications,2017-04-03 The Regional State of Coast Report for the western Indian Ocean (WIO) is the first comprehensive regional synthesis to provide insights into the enormous economic potential around the WIO, the consequential demand for marine ecosystem goods and services to match the increasing human population, the pace and scale of environmental changes taking place in the region and the opportunities to avoid serious degradation in one of the world's unique and highly biodiverse oceans.

SIPRI Yearbook 1994 Stockholm International Peace Research Institute,1994 The SIPRI Yearbook 1994 continues SIPRI's review of the latest developments in nuclear weapons, world military expenditure, the international arms trade and arms production, chemical and biological weapons, the proliferation of ballistic missile technology, armed conflicts in 1993, and nuclear and conventional arms control. It is the most complete and authoritative source available for up-to-date information in war studies, strategic studies, peace studies, and international relations.
