**Papertoy Monsters** Brian Castleforte,2010-12-29 A breakthrough paper-folding book for kids—paper airplanes meet Origami meets Pokemon. Papertoys, the Internet phenomenon that’s hot among graphic designers and illustrators around the world, now comes to kids in the coolest new book. Created and curated by Brian Castleforte, a graphic designer and papertoy pioneer who rounded up 25 of the hottest papertoy designers from around the world (Indonesia, Japan, Australia, Italy, Croatia, Chile, even Jackson, Tennessee), Papertoy Monsters offers 50 fiendishly original die-cut designs that are ready to pop out, fold, and glue. The book interleaves card stock with paper stock for a unique craft package; the graphics are colorful and hip, combining the edginess of anime with the goofy fun of Uglydolls and other collectibles. Plus each character comes with its own back-story. And the results are delicious: meet Pharaoh Thoth Amon, who once ruled Egypt but is now a mummy who practices dark magic in his sarcophagus. Or Zumbie the Zombie, who loves nothing more than a nice plate of brains and yams. NotSoScary, a little monster so useless at frightening people that he has to wear a scary mask. Yucky Chuck, the lunchbox creature born in the deepest depths of your school bag. Plus Zeke, the monster under your bed, Nom Nom, eater of cities, and Grumpy Gramps, the hairy grandpa monster with his very own moustache collection.

**Star Wars Kirigami** Marc Hagan-Guirey,2017-09-01 Celebrated paper artist and designer Marc Hagan-Guirey has applied his genius to the Star Wars galaxy in this book of 15 unique kirigami (cut-and-fold) ships featured in the saga's films. Ranging in difficulty from beginner to expert, each beautifully detailed model features step-by-step instructions and a template printed on cardstock—all that's needed are a utility knife, a cutting mat, and a ruler. Clear tips and guidance through the tricky stages help readers craft their own X-wing, Imperial Star Destroyer, Millennium Falcon, and a dozen more ships and vehicles, each accompanied by colorful and inspiring photographs of the final model on display (or ready for a jump to Hyperspace). © and TM Lucasfilm Ltd. **Elements of Art with God in Heart** Masha Hemmerling,2021-02-26 The Holy Spirit craves a strong Christian presence in artistic communities around the world. With a focus on raising artists who will be that presence, Masha Hemmerling shares an art teacher’s manual, designed to teach visual arts from a Christian perspective. Hemmerling, a seasoned art teacher and Christian, teaches elements of art through theology, theory, practice, and projects within eight engaging and equipping lessons. Students will learn about God as a Creator of each particular element, why He invented it, and how He used it in His creation. Pupils will discover how each element of art is used in different disciplines, professions, and industries, and how famous artists have used elements in their artwork. After practicing elements with different tools, media, and techniques, students then have an opportunity to create an art project using a step-by-step process of developing artwork from an idea and then switching to pencil drawing or painting, and applying finishing touches. Elements of Art with God in Heart is a teaching manual that guides Christian artists to rely on God’s grace to inspire their creations, and then become witnesses of His power and unconditional love to be lights in the world.

Papertoy Glowbots introduces 46 robots that have the added cool factor of lighting up, whether using glow-in-the-dark stickers that come with the book or light sources like flashlights, Christmas tree lights, and electric tea lights. The 46 die-cut paper robots are created by Brian Castleforte, author of Papertoy Monsters, along with the hottest papertoy designers from around the world. Meet the robots and read about their entertaining backstories in the front, then turn to the card stock section in the back to build them. The templates are die-cut and ready to pop out, fold, and glue. Bold, colorful graphics ensure the robots look as amazing in the daytime as they do with the lights off.

**Global Trends 2030** National Intelligence Council (U.S.),2012 This report is intended to stimulate thinking about the rapid and vast geopolitical changes characterizing the world today and possible global trajectories over the next 15 years. As with the NIC's previous Global Trends reports, we do not seek to predict the future, which would be an impossible feat, but instead provide a framework for thinking about possible futures and their implications. In-depth research, detailed modeling and a variety of analytical tools drawn from public, private and academic sources were employed in the production of Global Trends 2030. NIC leadership engaged

with experts in nearly 20 countries, from think tanks, banks, government offices and business groups, to solicit reviews of the report.

**Seeing Sideways** Kristin Hersh,2021-05-04 Doony, Ryder, Wyatt, Bodhi. The names of Kristin Hersh’s sons are the only ones included in her new memoir, Seeing Sideways. As the book unfolds and her sons’ voices rise from its pages, it becomes clear why: these names tell the story of her life. This story begins in 1990, when Hersh is the leader of the indie rock group Throwing Muses, touring steadily, and the mother of a young son, Doony. The chapters that follow reveal a woman and mother whose life and career grow and change with each of her sons: the story of a custody battle for Doony is told alongside that of Hersh’s struggles with her record company and the resulting PTSD; the tale of breaking free from her record label stands in counterpoint to her recounting of her pregnancy with Ryder; a period of writer’s block coincides with the development of Wyatt as an artist and the family’s loss of their home; and finally, soon after Bodhi’s arrival, Hersh and her boys face crises from which only strange angels can save them. Punctuated with her own song lyrics, Seeing Sideways is a memoir about a life strange enough to be fiction, but so raw and moving that it can only be real.
