Information Extraction Maria T. Pazienza, 2003-07-31

Information extraction (IE) is a new technology enabling relevant content to be extracted from textual information available electronically. IE essentially builds on natural language processing and computational linguistics, but it is also closely related to the well established area of information retrieval and involves learning. In concert with other promising intelligent information processing technologies like data mining, intelligent data analysis, text summarization, and information agents, IE plays a crucial role in dealing with the vast amounts of information accessible electronically, for example from the Internet. The book is based on the Second International School on Information Extraction, SCIE-99, held in Frascati near Rome, Italy in June/July 1999.

Under the Net Iris Murdoch, 1977-10-27 Iris Murdoch's debut—a comic novel about work and love, wealth and fame Jake Donaghue, garrulous artist, meets Hugo Bellfounder, silent philosopher. Jake, hack writer and sponger, now penniless flat-hunter, seeks out an old girlfriend, Anna Quentin, and her glamorous actress sister, Sadie. He resumes acquaintance with the formidable Hugo, whose 'philosophy' he once presumptuously dared to interpret. These meetings involve Jake and his eccentric servant-companion, Finn, in a series of adventures that include the kidnapping of a film-star dog and a political riot on a film set of ancient Rome. Jake, fascinated, longs to learn Hugo's secret. Perhaps Hugo's secret is Hugo himself? Admonished, enlightened, Jake hopes at last to become a real writer.

A Psalm for the Wild-Built Becky Chambers, 2021-07-13 Winner of the Hugo Award! In A Psalm for the Wild-Built, bestselling Becky Chambers's delightful new Monk and Robot series, gives us hope for the future. It's been centuries since the robots of Panga gained self-awareness and laid down their tools; centuries since they wandered, en masse, into the wilderness,

never to be seen again; centuries since they faded into myth and urban legend. One day, the life of a tea monk is upended by the arrival of a robot, there to honor the old promise of checking in. The robot cannot go back until the question of what do people need? is answered. But the answer to that question depends on who you ask, and how. They're going to need to ask it a lot. Becky Chambers's new series asks: in a world where people have what they want, does having more matter? At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

Twelve Years a Slave Solomon Northup, 2024-01-04

Filmatised in 2013 and the official recipient of three Oscars, Solomon Northup's powerful slave narrative 'Twelve Years a Slave' depicts Northup's life as he is sold into slavery after having spent 32 years of his life living as a free man in New York. Working as a travelling musician, Northup goes to Washington D.C, where he is kidnapped, sent to New Orleans, and sold to a planter to suffer the relentless and brutal life of a slave. After a dozen years, Northup escapes to return to his family and pulls no punches, as he describes his fate and that of so many other black people at the time. It is a harrowing but vitally important book, even today. For further reading on this subject, try 'Uncle Tom's Cabin' by Harriet Beecher Stowe. Solomon Northup (c.1807-c.1875) was an American abolitionist and writer, best remembered for his powerful race memoir 'Twelve Years a Slave'. At the age of 32, when he was a married farmer, father-of-three, violinist and free-born man, he was kidnapped in Washington D.C and shipped to New Orleans, sold to a planter and enslaved for a dozen years. When he gained his freedom, he wrote his famous memoir and spent some years lecturing across the US, on behalf of the abolitionist movement. 'Twelve Years a Slave' was published a year after 'Uncle Tom's Cabin' by Harriet Beecher Stowe and built on the anti-slavery momentum it had developed. Northup's final years are something of a mystery, though it is

thought that he struggled to cope with family life after being freed.

As the symposium in its effort to address also different geographical areas and therefore different water problems moved to Istanbul in Turkey a special effort was made in developing a platform for industrial water management.

Being Heumann Judith Heumann, Kristen Joiner, 2020-02-25 A Publishers Weekly Best Book of the Year for Nonfiction ...an essential and engaging look at recent disability history.—
Buzzfeed One of the most influential disability rights activists in US history tells her personal story of fighting for the right to receive an education, have a job, and just be human. A story of fighting to belong in a world that wasn't built for all of us and of one woman's activism—from the streets of Brooklyn and San Francisco to inside the halls of Washington—*Being Heumann* recounts Judy Heumann's lifelong battle to achieve respect, acceptance, and inclusion in society. Paralyzed from polio at eighteen months, Judy's struggle for equality began early in life. From fighting to attend grade school after being described as a "fire hazard" to later winning a lawsuit against the New York City school system for denying her a teacher's license because of her

paralysis, Judy's actions set a precedent that fundamentally improved rights for disabled people. As a young woman, Judy rolled her wheelchair through the doors of the US Department of Health, Education, and Welfare in San Francisco as a leader of the Section 504 Sit-In, the longest takeover of a governmental building in US history. Working with a community of over 150 disabled activists and allies, Judy successfully pressured the Carter administration to implement protections for disabled peoples' rights, sparking a national movement and leading to the creation of the Americans with Disabilities Act. Candid, intimate, and irreverent, Judy Heumann's memoir about resistance to exclusion invites readers to imagine and make real a world in which we all belong.

9/11: The World Speaks Tribute WTC Visitor Center, Lee Ielpi, Meriam Lobel, 2011-08-16 Almost two million people from across the United States and around the world have come through the museum galleries of the Tribute WTC Visitor Center

since it opened in September 2006 right across the street from the World Trade Center site. Many of these visitors have written their poignant reflections about the impact of September 11th on visitor cards that are collected in the Center's final gallery. To date, the Center has collected 200,000 cards written in 48 languages by people from 120 countries. For the first time ever, this book brings together a choice selection of these cards, many of which talk about the inspiration people find in the outpouring of humanity in response to September 11th. In seeing the selflessness of first responders and ordinary citizens who rushed to help strangers and friends on that day, and in the many months of recovery that followed, adults and young people write that they have been inspired to help others in their communities and around the world. Moving us toward the future with empathy and hope, 9/11: The World Speaks is a remarkable collection of cards that include elaborate drawings, stories of personal experiences on September 11th, notes written by family members of victims, and statements by people of all cultural backgrounds decrying the use of violence. The book also features a preface from Tom Brokaw.

The Voice Of The Sphinx John J. Klingerman

MD,2022-01-06 We all have an inheritance to leave...only some leave more than what is required. There is no greater gift of inheritance than the gift of words; whether written or spoken, they remain someone's memory, and our legacy, forever. I do not ascribe to chance or happenstance. This novel was written over twenty years ago. I was working with my father-in-law to get it published before he passed from this life. Our plans and efforts, however, did not come to be; he passed away May 28, 2015. My daddy became sick the following year, putting this novel on hold. When my daddy passed away, I was left to care for my mother until I had to find an assisted-living facility to give her the care that she needed, and I could no longer personally provide. Which leads us to the setting of this novel, taking place in the early

1990s and having reference to stories as far back as the 1920s. I never thought that at the age of fifty-three, I would be able to recall a simpler time in my life that wasn't so long ago. In the early 1990s, we had not yet experienced the technology boom that forever changed communication and the way we live. In this novel, you will find no cell phones, no texting, no phone cameras, no social media, no key fobs, and no computerized medical notes. What you will find, however, is the simple beauty of the personal relationships of the residents and staff of an assisted-living facility. While the storyline of this novel is poignantly beautiful, there is a much deeper understanding to be gained. We would all do well if we could learn to listen honestly and become slower to speak. May we be provoked to desire to check ourselves, humble ourselves, and take it upon ourselves to ascertain the exact meaning of our vocabulary. My prayer is that we may be encouraged by the intention and desire of the author in the sharing of this novel, *The Voice of the Sphinx*—the inheritance of my father-in-law, John J. Klingerman, MD—to his dear children, John, Kelly, Mark, and Chris.

Your Evil Twin B. Sullivan, 2004-08-25 The crime of the twenty-first century doesn't discriminate: ID theft has hit ordinary citizens and celebrities alike, from Oprah Winfrey to Steven Spielberg, and costs the economy \$50 billion a year. *Your Evil Twin* covers this exploding crime from every possible angle. It includes exclusive whodunit details from mastermind identity thieves who have pilfered money from half the members of the Forbes 400, as well as exclusive interviews with a myriad of criminals in the Internet's underground, such as Russian hackers who have extorted money from U.S. banks. The book also issues a scathing indictment of the credit granting industry, from credit

card issuers to the secretive credit reporting agencies, who have misunderstood the crime from the start, have been slow to respond, and bear much of the responsibility for the epidemic. Finally, Bob Sullivan, author and identity theft expert, probes the tepid solutions now being cobbled together by the industry and government. Bob Sullivan (Snohomish, WA), senior technology writer for MSNBC.com, is the nation's leading journalist covering identity fraud. He has written more than 100 articles on the subject since 1996, and is a regular contributor to MSNBC, CNBC, NBC Nightly News, the Today show, and various local NBC affiliates. With colleague Mike Brunker, Sullivan received the prestigious 2002 Society of Professional Journalists Public Service Award for ongoing coverage of Internet fraud.

Delta CX Angie Born, Tanya Netayavichitr, Debbie Levitt, 2019-09-19 Delta CX is a refreshing model bringing CX and UX together in task and in name with the key goal of improving the products, services, and experiences (PSE) that we offer our potential and current customers. Rather than following trends or drinking the snake oil, Delta CX presents a time-tested, thorough approach that helps you establish values, vision, strategies, and goals. Great PSE require the right teams and strategies in place to proactively predict and mitigate the risk of delivering wrong or flawed PSE. Adopting Delta CX means we all finally speak the same language, from tasks and deliverables to job titles and required skills to where CX fits into Agile organizations to processes and teams. Calculate the ROI of investing more time and resources into building the right PSE the first time. Save time, money, and sanity. Replace guessing and assumptions with Lean customer research that is planned, conducted, and interpreted by experts. Learn why quality should be our #1

priority, and how to rededicate our organization to our external and internal customers. Target audiences: Managers, workers, practitioners, freelancers, consultants, contractors, execs, stakeholders, and everybody else working in CX, UX, Marketing, Product Management, Engineering, Project Management. Business Analysts (BAs), Data Scientists, Writers, Visual Designers, Information Architects, Interaction Designers, Product Designers, and Researchers. The long and problem-focused version: In an era of faster, faster, faster, our workplaces are sacrificing quality, collaboration, culture, and the customer experience to just ship it. Business goals don't seem to align with customers' needs. Customers constantly raise their standards and expectations, and they notice when companies are out of touch or get it wrong. Competitors, investors, shareholders, the press, bloggers, social media, and Wall Street also notice. Brands are being surprised when their products, services, and experiences (PSE) are disliked or rejected by customers, or go viral for the wrong reasons. Companies claim they are customer-focused, user-centric, and designing for the needs of real customers. Initiatives to increase the ability to build the right PSE should have meant hiring more CX and UX talent. However, with UX still misunderstood, circumvented, overruled, and excluded at many companies, workplaces that didn't know how to assess CX and UX talent hired anybody who put UX on their resume. Poor hiring choices lead to silos and bad design. Rather than wondering if UX workers were unqualified, leadership blamed UX and User-Centered Design (UCD): They must be bloated, outdated, not Lean, not Agile things we don't really need. We started imagining that everybody can be a designer. Get people sketching in design sprints, and solve our company's biggest challenges. We called for democratization and decentralization of UX and design because perhaps taking some power away from these high-ego UX people we hired will fix this. Suddenly, everybody was a design thinker doing design thinking, yet few people can agree on

what design thinking is. Everybody became quietly desperate. UX practitioners wanted to evangelize, and invited teammates to UX evangelism presentations, which often backfired. Companies of all sizes and ages, including Fortune 500s, tried methodologies designed for startups. Startups fail roughly 95% of the time. It's so rare that they innovate or build something the public actually wants. Why would we want to emulate a segment with such a high failure rate? We're lost. We need another business transformation, a return to prioritizing the quality of what we ideate, architect, design, test, build, and unleash on the public.(Return to the top for the short and happy version.)
