Ann Coulter

The God Shot Tara-Leigh Cobble, 2022-10-04 See a Clearer Picture of Who God Really Is Scripture is meant to reveal God to us, but sometimes it's hard for us to see Him there. What if all you needed was a new lens? We often look to the Bible for advice on how to live, but when that becomes our focus, it's easy to miss the point of Scripture: to reveal God and His character to us. What does He want to tell us about Himself? He describes Himself as the God of peace. The God who protects. The God of joy. These are truths we can lean on every day of our lives, but we miss the beautiful attributes of God when we look for only ourselves in our Bibles. In this 100-day devotional, trusted Bible teacher Tara-Leigh Cobble explores powerful sections from each book of the New Testament. Each day's reading points toward a name or attribute of God from that passage. These snapshots are dense with theological truth, helping you grow in the truth of His character and rest in His goodness and kindness.

Godless Ann Coulter, 2007-06-26 If a martian landed in America and set out to determine the nation's official state religion, he would have to conclude it is liberalism, while Christianity and Judaism are prohibited by law. Many Americans are outraged by liberal hostility to traditional religion. But as Ann Coulter reveals in this, her most explosive book yet, to focus solely on the Left's attacks on our Judeo-Christian tradition is to miss a larger point: liberalism is a religion—a godless one. And it is now entrenched as the state religion of this country. Though liberalism rejects the idea of God and reviles people of faith, it bears all the attributes of a religion. In *Godless*, Coulter throws open the doors of the Church of Liberalism, showing us its sacraments (abortion), its holy writ (*Roe v. Wade*), its martyrs (from Soviet spy Alger Hiss to cop-killer Mumia Abu-Jamal), its clergy (public school teachers), its churches (government schools, where prayer is prohibited but condoms are free), its doctrine of infallibility (as manifest in the absolute moral authority of spokesmen from Cindy Sheehan to Max Cleland), and its cosmology (in which mankind is an inconsequential accident). Then, of course, there's the liberal creation myth: Charles Darwin's theory of evolution. For liberals, evolution is the touchstone that separates the enlightened from the benighted. But Coulter neatly reverses the pretense that liberals are rationalists guided by the ideals of free inquiry and the scientific method. She exposes the essential truth about Darwinian evolution that liberals refuse to confront: it is bogus science. Writing with a keen appreciation for genuine science, Coulter reveals that the so-called gaps in the theory of evolution are all there is—Darwinism is nothing but a gap. After 150 years of dedicated searching into the fossil record, evolution's proponents have failed utterly to substantiate its claims. And a long line of supposed evidence, from the infamous Piltdown Man to the evolving peppered moths of England, has been exposed as hoaxes. Still, liberals treat those who question evolution as religious heretics and prohibit students from hearing about real science when it contradicts Darwinism. And these are the people who say they want to keep faith out of the classroom? Liberals' absolute devotion to Darwinism, Coulter shows, has nothing to do with evolution's scientific validity and everything to do with its refusal to admit the possibility of God as a guiding force. They will brook no challenges to the official religion. Fearlessly confronting the high priests of the Church of Liberalism and ringing with Coulter's razor-sharp wit, *Godless* is the most important and riveting book yet from one of today's most lively and impassioned conservative voices. Liberals love to boast that they are not 'religious,' which is what one would expect to hear from the state-sanctioned religion. Of course liberalism is a religion. It has its own cosmology, its own miracles, its own beliefs in the supernatural, its own churches, its own high priests, its

own saints, its own total worldview, and its own explanation of the existence of the universe. In other words, liberalism contains all the attributes of what is generally known as 'religion.' —From *Godless*

Introductory Grammar of Amharic Wolf Leslau, 2000 This book closes the gap for beginners who want to study the Amharic language and had difficulties in finding the right grammar for this purpose: The first grammar of Amharic, the national language of Ethiopia, was published by Hiob Ludolf in 1698. The Amharic grammar published by Praetorius in 1879 is based on Amharic religious texts and on scattered material, usually composed by missionaries. A milestone in the study of Amharic is Marcel Cohen's *Traite de langue amharique* (1936), but this grammar, too is not completely suited for beginners since the author's generalizations are at times aimed at linguists. The grammar that comes closest to the concept of a beginner's grammar is that of C.H. Dawkin (1960), yet this grammar is extremely short, does not give examples and does not introduce the student to the intricacies of the language. The new book gives all the grammatical forms and the sentences of the present grammar in Amharic script and in phonetic transcription. The illustrative examples have a free and a literal translation. This procedure should likewise prove to be useful for the Semitist as well as for the general linguist.

Original Blessing Danielle Shroyer, 2016-10-24 Of the world's major religions, only Christianity holds to a doctrine of original sin. Ideas are powerful, and they shape who we are and who we become. The fact that many Christians believe there is something in human nature that is, and will always be, contrary to God, is not just a problem but a tragedy. So why do the doctrine's assumptions of human nature so infiltrate our pulpits, sermons, and theological bookshelves? How is it so misconstrued in times of grief, pastoral care, and personal shame? How did we fall so far from God's original blessing in the garden to this pervasive belief in humanity's innate inability to do good? In this book, Danielle Shroyer takes readers through an overview of the historical development of the doctrine, pointing out important missteps and overcalculations, and providing alternative ways to approach often-used Scriptures. Throughout, she brings the primary claims of original sin to their untenable (and unbiblical) conclusions. In *Original Blessing*, she shows not only how we got this doctrine wrong, but how we can put sin back in its rightful place: in a broader context of redemption and the blessing of humanity's creation in the image of God.

Not Exactly Ghosts Andrew Caldecott, 2022-09-15 *Not Exactly Ghosts* by Andrew Caldecott is a collection of downright terrifying tales of blood, anger, and jealousy. Excerpt: Narrow in bounds, but wide in variety, the garden of Tilchington Rectory was one of the most beautiful in the South Country. It lay in a hollow, some four to five chains broad, down the middle of which ran a small and clear brook marked on the Ordnance map as R. Tilch, but beloved of its riparians as, simply, our stream.

The Cambridge History of Medieval Music Mark Everist, Thomas Forrest Kelly, 2018-08-09 Spanning a millennium of musical history, this monumental volume brings together nearly forty leading authorities to

survey the music of Western Europe in the Middle Ages. All of the major aspects of medieval music are considered, making use of the latest research and thinking to discuss everything from the earliest genres of chant, through the music of the liturgy, to the riches of the vernacular song of the *trouvères* and *troubadours*. Alongside this account of the core repertory of monophony, *The Cambridge History of Medieval Music* tells the story of the birth of polyphonic music, and studies the genres of organum, conductus, motet and polyphonic song. Key composers of the period are introduced, such as Leoninus, Perotinus, Adam de la Halle, Philippe de Vitry and Guillaume de Machaut, and other chapters examine topics ranging from musical theory and performance to institutions, culture and collections.

The Renewal of Pagan Antiquity Aby Warburg, 1999 A collection of essays by the art historian Aby Warburg, these essays look beyond iconography to more psychological aspects of artistic creation: the conditions under which art was practised; its social and cultural contexts; and its conceivable historical meaning.

History of the Decline and Fall of the Roman Empire Edward Gibbon, 2013-01-18 Gibbon offers an explanation for why the Roman Empire fell, a task made difficult by a lack of comprehensive written sources, though he was not the only historian to tackle the subject. Most of his ideas are directly taken from what few relevant records were available: those of the Roman moralists of the 4th and 5th centuries.

The Promised Land Mary Antin, 1912 Antin emigrated from Polotzk (Polotsk), Belarus [Russia], to Boston, Massachusetts, at age 13. She tells of Jewish life in Russia and in the United States.

Modern Peoplehood John Lie, 2011-04 [A] most impressive achievement by an extraordinarily intelligent, courageous, and—that goes without saying—'well-read' mind. The scope of this work is enormous: it provides no less than a comprehensive, historically grounded theory of 'modern peoplehood,' which is Lie's felicitous umbrella term for everything that goes under the names 'race,' 'ethnicity,' and 'nationality.' Christian Joppke, *American Journal of Sociology* Lie's objective is to treat a series of large topics that he sees as related but that are usually treated separately: the social construction of identities, the origins and nature of modern nationalism, the explanation of genocide, and racism. These multiple themes are for him aspects of something he calls 'modern peoplehood.' His mode of demonstration is to review all the alternative explanations for each phenomenon, and to show why each successively is inadequate. His own theses are controversial but he makes a strong case for them. This book should renew debate. Immanuel Wallerstein, Yale University and author of *The Decline of American Power: The U.S. in a Chaotic World*

City Economics Brendan O'Flaherty, 2005-10-30 This introductory but innovative textbook on the economics of cities is aimed at students of urban and regional policy as well as of undergraduate economics. It deals with standard topics, including automobiles, mass transit, pollution, housing, and education but it also discusses non-standard topics such as segregation, water supply, sewers, garbage, fire prevention, housing codes, homelessness, crime, illicit drugs, and economic development. Its methods of analysis are primarily verbal, geometric, and arithmetic. The author achieves coherence by showing how the analysis of various topics reinforces one another. Thus, buses can tell us something about schools and optimal tolls about land prices. Brendan O'Flaherty looks at almost everything through the lens of Pareto optimality and potential Pareto optimality--how policies affect people and their well-being, not abstract entities such as cities or the economy or growth or the environment. Such traditionalism leads to radical questions, however: Should cities have police and fire departments? Should tax preferences for home ownership be repealed? Should public schools charge for their services? O'Flaherty also gives serious consideration to such heterodox policies as pay-at-the-pump auto insurance, curb rights for buses, land taxes, marginal cost water pricing, and sidewalk zoning.
