*A Guide to Tribes in Indonesia* Zulyani Hidayah,2020-04-28 This encyclopedia provides a comprehensive overview of the traditions, cultures, kinship norms, and other significant cultural aspects of the tribes, or otherwise named ethnic groups, of Indonesia, by an Indonesian anthropologist. The entries are supported by illustrations drawn by the late author himself, and are also accompanied by maps indicating the geographic locations and distributions of each tribe throughout the vast archipelago. Originally written and published in Bahasa Indonesian, the text has been translated into English and revised to feature up-to-date information. In showcasing the extent of diversity and the distinctiveness of the numerous tribal cultures in Indonesia, the volume presents itself as an important academic reference in Indonesian anthropology and ethnography studies, now finally available to global readership. Intended as a short work of reference, it will be indispensable to students and scholars researching Indonesia from anthropological, sociocultural, and ethnographic perspectives.

Zain,Mohamad Kamal Abd Aziz,Oskar Hasdinor Hassan,Shahriman Zainal Abidin,2018-06-18 This book of conference proceedings contains papers presented at the Art and Design International Conference (AnDIC 2016). With a strong focus on how the Cyberology world influences and changes the methods and works of artists, this book features topics that are relevant to four key players - artists, intermediaries, policy makers, and the audience - in a cultural system, especially in the world of art and design. It examines the development, problems and issues of traditional cultural values, identity and new trends in contemporary art. Most importantly, the book attempts to discuss the past, present and future of art and design whilst looking at some underlying issues that need to be addressed collectively.

*The Heritage Theatre* Marlite Halbertsma,2011-05-25 The Heritage Theatre is a book about cultural heritage and globalisation. Cultural heritage is the stage on which the global community, smaller communities and individuals play out their similarities and differences, their identities and singularities. Cultural heritage forms an implicit cultural code governing the relationship between parts and the whole, individuals and communities, communities and outsiders, as well as the relationship between communities and the world as a whole. Cultural heritage, by way of its producers, its products and its audience, presents an image of the world and its inner coherence. The subjects in this book range from places as distant from each other as Dar-es-Salaam, Jakarta, Amsterdam, Le Creusot, Trinidad, Brazzaville, Bremerhaven, New York and Prague, and deal with themes such as wayang, Kylie Minogue, airports and heritage, modernist architecture in Africa and the impact of DNA research on the concept of roots. The volume is based on papers presented at a conference organised by the Erasmus School of History, Culture and Communication of Erasmus University Rotterdam. The authors have backgrounds in cultural studies, art history, anthropology, museum studies, sociology, tourist studies and history.

**Conceptual Spaces** Peter Gardenfors,2004-01-30 Within cognitive science, two approaches currently dominate the problem of modeling representations. The symbolic approach views cognition as computation involving symbolic manipulation. Connectionism, a special case of associationism, models associations using artificial neuron networks. Peter Gärdenfors offers his theory of conceptual representations as a bridge between the symbolic and connectionist approaches. Symbolic representation is particularly weak at modeling concept learning, which is paramount for understanding many cognitive phenomena. Concept learning is closely tied to the notion of similarity, which is also poorly served by the symbolic approach. Gärdenfors's theory of conceptual spaces presents a framework for representing information on the conceptual level. A conceptual space is built up from geometrical structures based on a number of quality dimensions. The main applications of the theory are on the constructive side of cognitive science: as a constructive model the theory can be applied to the development of artificial systems capable of solving cognitive tasks. Gärdenfors also shows how conceptual spaces can serve as an explanatory framework for a number of empirical theories, in particular those concerning concept formation, induction, and semantics. His aim is to present a coherent research program that can be used as a basis for more detailed investigations.

**Animation Mini: Flexibility and Weight** Richard E. Williams,2020-08-06 FLEXIBILITY AND WEIGHT From Richard Williams' The Animator's Survival Kit comes key chapters in mini form. The Animator's Survival Kit is the essential tool for animators. However, sometimes you don't want to carry the hefty expanded edition around with you to your college or studio if you're working on just one aspect of it that day. The Animation Minis take some of the most essential chapters and make them available in smaller, lightweight, hand-bag/backpack size versions. Easy to carry. Easy to study. This Mini focuses on Flexibility and Weight. How do we loosen things up and get snap and vitality into our performance at the same time as keeping the figure stable and solid? The answer: successive breaking of joints to give flexibility. In this mini, Williams stresses the importance of knowing where the weight is on every drawing. He demonstrates that the best way to show weight is to be aware of it, conscious of it, and think about it all the time - knowing where the weight is coming from, where it's traveling over and where it's transferring to.

*Cinematography: Theory and Practice* Blain Brown,2013-05-02 There's more to being a DP than holdng a light meter! **Jaranan** Clara van Groenendael,2012-12-11 The dramatic genre of the horse dance (jaranan) is part of an age-old Javanese tradition displaying wide local and regional variations. A striking feature of the performances of the majority of horse dance groups is the appearance of trance dancers. These are used as a means of establishing contact with the spirits of the ancestors, who

continue to play an important part in the lives of their descendants as moral beacons in the solution of problems and the fulfillment of wishes. As a consequence of the modernization of society in almost every aspect of life, vigorously propagated as it was by the Suharto regime in the period 1966-1998, the trance in horse dancing has been strongly discouraged as an anachronism. This has prompted a search for new ways of preserving this dramatic genre for future generations. The way the administration of Kediri and a number of local horse dance companies set about solving this problem constitutes a dominant theme of this book. To bring the phenomenon of the horse dance in Java into sharper focus, a brief account is given of its history, as well as a description of the great variety of horse dance groups of and a range of aspects of this genre.

**Cultural and Civilisational Links between India and Southeast Asia** Shyam Saran, 2018-07-20 The book presents the study undertaken by the ASEAN-India Centre (AIC) at Research and Information System for Developing Countries (RIS) on India's cultural links with Southeast Asia, with particular reference to historical and contemporary dimensions. **Ondel - Ondel Galau** Frances Caitlin Tirtaguna, 2018-05-14 What do you know about the Ondel-ondel? How much do you know about Betawi culture? If you have no idea about Betawi culture, it's completely fine. I, myself, didn't think much about it until I was caught in Jakarta's traffic, when I saw a pair of exhausted Ondel-ondel in worn-out costumes roaming on the street, asking people for money. This embarrassing scene made me wonder and curious to know more about the Ondel-ondel story. What happened? Ondel-ondel Galau is about a young girl, Vina, who has been living a typical middle school life: going to school in the morning and heading back home in the afternoon. Worn out by the same cycle every day, Vina took on a new challenge and joined her school's traditional Betawi music club, where she plays the violin. With this new activity, she makes new friends, faces new challenges and exposing herself to her own native culture that she has never known before. Join Vina to know more about the Betawi Culture!

*Local Power & Politics in Indonesia* Edward Aspinall, 2003-08-01 Indonesia is experiencing an historic and dramatic shift in political and economic power from the centre to the local level. The collapse of the highly centralised Soeharto regime allowed long-repressed local aspirations to come to the fore. The new Indonesian Government then began one of the world's most radical decentralisation programmes, under which extensive powers are being devolved to the district level. In every region and province, diverse popular movements and local claimants to state power are challenging the central authorities. This book is the first comprehensive coverage on decentralisation in Indonesia. It contains contributions from leading academics and policy-makers on a wide range of topics relating to democratisation, devolution and the blossoming of local-level politics.

**Puppet** Kenneth Gross, 2011-09-01 The puppet creates delight and fear. It may evoke the innocent play of childhood, or become a tool of ritual magic, able to negotiate with ghosts and gods. Puppets can be creepy things, secretive, inanimate while also full of spirit, alive with gesture and voice. In this eloquent book, Kenneth Gross contemplates the fascination of these unsettling objects—objects that are also actors and images of life. The poetry of the puppet is central here, whether in its blunt grotesquery or symbolic simplicity, and always in its talent for metamorphosis. On a meditative journey to seek the idiosyncratic shapes of puppets on stage, Gross looks at the anarchic Punch and Judy show, the sacred shadow theater of Bali, and experimental theaters in Europe and the United States, where puppets enact everything from Baroque opera and Shakespearean tragedy to Beckettian farce. Throughout, he interweaves accounts of the myriad faces of the puppet in literature—Collodi's cruel, wooden Pinocchio, puppetlike characters in Kafka and Dickens, Rilke's puppet-angels, the dark puppeteering of Philip Roth's Micky Sabbath—as well as in the work of artists Joseph Cornell and Paul Klee. The puppet emerges here as a hungry creature, seducer and destroyer, demon and clown. It is a test of our experience of things, of the human and inhuman. A book about reseeing what we know, or what we think we know, Puppet evokes the startling power of puppets as mirrors of the uncanny in life and art.

The Art of 3D Isaac V. Kerlow, 2004 Publisher Description

Islam, Ethnicity, and Power Politics Rasul Bakhsh Rais, Rasul Bux Rais, 2017 Islam, Ethnicity, and Power Politics explores how the central state apparatus, social forces, ethnic groups, political elites, and religious factions have attempted to influence the construction of identity in Pakistan, and why it has become such a contested issue. The book analyzes the issue of identity in relation to power dynamics and competing ideologies, and argues that the choice and expression of a specific identity by contending political actors serves to claim, legitimize, and challenge power. The postcolonial inheritance of ethnic diversity and cultural pluralism that is embedded deep in regional histories as well as in the multiple layers of narrow tribal, caste, and parochial affiliations have not lent easily to the coveted idea of a single national culture or a particular sense of national identity. Against a conventional view of identity, the book makes the counter-argument of multiculturalism and a layered idea of identities that is contextualized. The defining idea of the book is that the cultural diversity of Pakistan—a rich mosaic—is not the problem that it is generally conceived to be. Conversely, it argues that diversity and pluralism in Pakistan or elsewhere can be managed and made to evolve into national solidarity and political cohesion through democratic, federal, and republican politics. However, such a diverse society requires a pluralistic political framework of equality, accommodation, inclusiveness, recognition, and rights.

Behind the Postcolonial Abidin Kusno, 2014-04-04 In *Behind the Postcolonial* Abidin Kusno shows how colonial representations have been revived and rearticulated in postcolonial Indonesia. The book shows how architecture and urban space can be seen, both historically and theoretically, as representations of political and cultural tendencies that characterize an emerging as well as a declining social order. It addresses the complex interactions between public memories of the present and past, between images of global urban cultures and the concrete historical meanings of the local. It shows how one might write a political history of postcolonial architecture and urban space that recognizes the political cultures of the present without neglecting the importance of the colonial past. In the process, it poses serious questions for the analysis and understanding of postcolonial states.

**Quakeland** Kathryn Miles, 2017-08-29 A journey around the United States in search of the truth about the threat of earthquakes leads to spine-tingling discoveries, unnerving experts, and ultimately the kind of preparations that will actually help guide us through disasters. It's a road trip full of surprises. Earthquakes. You need to worry about them only if you're in San Francisco, right? Wrong. We have been making enormous changes to subterranean America, and Mother Earth, as always, has been making some of her own. . . . The consequences for our real estate, our civil engineering, and our communities will be huge because they will include earthquakes most of us do not expect and cannot imagine—at least not without reading *Quakeland*. Kathryn Miles descends into mines in the Northwest, dissects Mississippi levee engineering studies, uncovers the horrific risks of an earthquake in the Northeast, and interviews the seismologists, structural engineers, and emergency managers around the country who are addressing this ground shaking threat. As Miles relates, the era of human-induced earthquakes began in 1962 in Colorado after millions of gallons of chemical-weapon waste was pumped underground in the Rockies. More than 1,500 quakes over the following seven years resulted. The Department of Energy plans to dump spent nuclear rods in the same way. Evidence of fracking's seismological impact continues to mount. . . . Humans as well as fault lines built our "quakeland". What will happen when Memphis,

home of FedEx's 1.5-million-packages-a-day hub, goes offline as a result of an earthquake along the unstable Reelfoot Fault? FEMA has estimated that a modest 7.0 magnitude quake (twenty of these happen per year around the world) along the Wasatch Fault under Salt Lake City would put a \$33 billion dent in our economy. When the Fukushima reactor melted down, tens of thousands were displaced. If New York’s Indian Point nuclear power plant blows, ten million people will be displaced. How would that evacuation even begin? Kathryn Miles’ tour of our land is as fascinating and frightening as it is irresistibly compelling.
