Khwadāynāmag The Middle Persian Book of Kings Jaakko Hämeen-Anttila, 2018-04-17 In Khwadāynāmag. The Middle Persian Book of Kings Jaakko Hämeen-Anttila analyses the lost sixth-century historiographical work of the Sasanians, its lost Arabic translations, and the sources of Firdawsī's Shāhnāme.

**The Look of the Book** Elaine Julia Wright, 2012 Revision of the author's doctoral thesis, submitted to the Oriental Institute of Oxford University in 1997.

The Topkapi Scroll Gülru Necipoğlu, 1996-03-01 Since precious few architectural drawings and no theoretical treatises on architecture remain from the premodern Islamic world, the Timurid pattern scroll in the collection of the Topkapi Palace Museum Library is an exceedingly rich and valuable source of information. In the course of her in-depth analysis of this scroll dating from the late fifteenth or early sixteenth century, Gülru Necipoğlu throws new light on the conceptualization, recording, and transmission of architectural design in the Islamic world between the tenth and sixteenth centuries. Her text has particularly far-reaching implications for recent discussions on vision, subjectivity, and the semiotics of abstract representation. She also compares the Islamic understanding of geometry with that found in medieval Western art, making this book particularly valuable for all historians and critics of architecture. The scroll, with its 114 individual geometric patterns for wall surfaces and vaulting, is reproduced entirely in color in this elegant, large-format volume. An extensive catalogue includes illustrations showing the underlying geometries (in the form of incised "dead" drawings) from which the individual patterns are generated. An essay by Mohammad al-Asad discusses the geometry of the muqarnas and demonstrates by means of CAD drawings how one of the scroll's

patterns could be used to design a three-dimensional vault.

**Contemporary Bioethics** Mohammed Ali Al-Bar, Hassan Chamsi-Pasha, 2015-05-27 This book discusses the common principles of morality and ethics derived from divinely endowed intuitive reason through the creation of al-fitr' a (nature) and human intellect (al-'aql). Biomedical topics are presented and ethical issues related to topics such as genetic testing, assisted reproduction and organ transplantation are discussed. Whereas these natural sources are God's special gifts to human beings, God's revelation as given to the prophets is the supernatural source of divine guidance through which human communities have been guided at all times through history. The second part of the book concentrates on the objectives of Islamic religious practice – the maqa' sid – which include: Preservation of Faith, Preservation of Life, Preservation of Mind (intellect and reason), Preservation of Progeny (al-nasl) and Preservation of Property. Lastly, the third part of the book discusses selected topical issues, including abortion, assisted reproduction devices, genetics, organ transplantation, brain death and end-of-life aspects. For each topic, the current medical evidence is followed by a detailed discussion of the ethical issues involved.

**Lost Enlightenment** S. Frederick Starr, 2015-06-02 The forgotten story of Central Asia's enlightenment—its rise, fall, and enduring legacy In this sweeping and richly illustrated history, S. Frederick Starr tells the fascinating but largely unknown story of Central Asia's medieval enlightenment through the eventful lives and astonishing accomplishments of its greatest minds—remarkable figures who built a bridge to the modern world. Because nearly all of these figures wrote in Arabic, they were long assumed to have been Arabs. In fact, they were from Central Asia—drawn from the Persianate and Turkic peoples of a region that today extends from Kazakhstan southward through Afghanistan, and from the easternmost province of Iran through Xinjiang, China. Lost Enlightenment recounts how, between the years 800 and 1200, Central Asia led the world in trade and economic development, the size and sophistication of its cities, the refinement of its arts, and, above all, in the advancement of knowledge in many fields. Central Asians achieved signal breakthroughs in astronomy, mathematics, geology, medicine, chemistry, music, social science, philosophy, and theology, among other subjects. They gave algebra its name, calculated the earth's diameter with unprecedented precision, wrote the books that later defined European medicine, and penned some of the world's greatest poetry. One scholar, working in Afghanistan, even predicted the existence of North and South America—five centuries before Columbus. Rarely in history has a more impressive group of polymaths appeared at one place and time. No wonder that their writings influenced European culture from the time of St. Thomas Aquinas down to the scientific revolution, and had a similarly deep impact in India and much of Asia. Lost Enlightenment chronicles this forgotten age of achievement, seeks to explain its rise, and explores the competing theories about the cause of its eventual demise. Informed by the latest scholarship yet written in a lively and accessible style, this is a book that will surprise general readers and specialists alike.

**Contemplation:** Malik Badri, 2018-09-15 The human race is in crisis and very few of us – if any – are able to understand what is wrong with our lives and the world at large. How did this happen and how did humans become so 'disconnected' with humanity? Why are psychological disorders such as depression, anxiety, fear, and suicide on the increase, and why are conventional Western therapies unable to stem the tide? To approach this we must first look inside ourselves – to explore our own purpose in life and extend that principle to the rest of humanity. Despite the advances of modern Western psychology and the

development of therapies that do help many, one area that is largely unexplored is that of the ‘human spirit’ and spirituality since it is more convenient to consider the human mind as ‘machine’ that responds to external stimuli. In this powerful exploration into the human mind and its relationship with the human spirit, Malik Badri invites the reader to open the door to self-discovery, purpose and spirituality through the practice of contemplation, reflection and meditation – understanding the true meaning and experience of spirituality as well as one’s own place in Creation. Whilst central to worship in Islam, this will also be of great interest to, and help any reader wishing to explore the notion of spirituality whether as part of worship or simply as part of self development and inner healing.

Language between God and the Poets Alexander Key,2018-08-28 A free ebook version of this title is available through Luminos, University of California Press’s Open Access publishing program. Visit [www.luminosoa.org](http://www.luminosoa.org) to learn more. In the Arabic eleventh-century, scholars were intensely preoccupied with the way that language generated truth and beauty. Their work in poetics, logic, theology, and lexicography defined the intellectual space between God and the poets. In *Language Between God and the Poets*, Alexander Key argues that ar-Raghib al-Isfahani, Ibn Furak, Ibn Sina (Avicenna), and Abd al-Qahir al-Jurjani shared a conceptual vocabulary based on the words ma’na and haqiqah. They used this vocabulary to build theories of language, mind, and reality that answered perennial questions: how to structure language and reference, how to describe God, how to construct logical arguments, and how to explain poetic affect.

Trajectories of State Formation across Fifteenth-Century Islamic West-Asia Jo Van Steenberg,2020-06-15 The concept, practice, institution and appearance of ‘the state’ have been hotly debated ever since the emergence of history as a discipline within modern scholarship. The field of medieval Islamic history, however, has remained aloof from most of these debates. Rather it tends to take for granted the particularity of dynastic trajectories within slow-changing bureaucratic contexts. *Trajectories of State Formation* promotes a more critical and connected understanding of state formation in the late medieval Sultanates of Cairo and of the Timurid, Turkmen and Ottoman dynasties. Projecting seven case studies onto a broad canvas of European and West-Asian research, this volume presents a trans-dynastic reconstruction, interpretation and illustration of statist trajectories across fifteenth-century Islamic West-Asia. The contributors are: Georg Christ, Kristof D’hulster, Jan Dumolyn, Albrecht Fuess, Dimitri J. Kastritsis, Beatrice Forbes Manz, John L. Meloy, Jo Van Steenberg, and Patrick Wing.

**The Mongols and the Armenians (1220-1335)** Bayarsaikhan Dashdondog,2010-12-07 Covering more than one century, this book describes the complex issues of Mongol-Armenian political relations that involved many different ethnic groups in a vast geographical area stretching from China to the Mediterranean coast in the thirteenth and fourteenth centuries.

Ibn Taymiyya's Theodicy of Perpetual Optimism Jon Hoover,2007-07-30 The Muslim jurist Ibn Taymiyya (d. 1328) is famous for polemic against Islamic philosophy, theology and rationalizing mysticism, but his positive theological contribution has not been well understood. This comprehensive study of Ibn Taymiyya’s theodicy helps to rectify this lack. Exposition and analysis of Ibn Taymiyya’s writings on God’s justice and wise purpose, divine determination and human agency, the problem of evil, and juristic method in theological doctrine show that he articulates a theodicy of optimism in which God in His essence

perpetually wills the best possible world from eternity. This sets Ibn Taymiyya's theodicy apart from Ash'arī divine voluntarism, the free-will theodicy of the Mu'tazilīs, and the essentially timeless God of other optimists like Ibn Sīnā and Ibn 'Arabī.

**The Mongols and the Islamic World** Peter Jackson,2017-04-04 An epic historical consideration of the Mongol conquest of Western Asia and the spread of Islam during the years of non-Muslim rule The Mongol conquest of the Islamic world began in the early thirteenth century when Genghis Khan and his warriors overran Central Asia and devastated much of Iran. Distinguished historian Peter Jackson offers a fresh and fascinating consideration of the years of infidel Mongol rule in Western Asia, drawing from an impressive array of primary sources as well as modern studies to demonstrate how Islam not only survived the savagery of the conquest, but spread throughout the empire. This unmatched study goes beyond the well-documented Mongol campaigns of massacre and devastation to explore different aspects of an immense imperial event that encompassed what is now Iran, Iraq, Turkey, and Afghanistan, as well as Central Asia and parts of eastern Europe. It examines in depth the cultural consequences for the incorporated Islamic lands, the Muslim experience of Mongol sovereignty, and the conquerors' eventual conversion to Islam.

**New Readings in Arabic Historiography from Late Medieval Egypt and Syria** Jo van Steenberg, Maya Termonia,2021-04-19 The present volume contributes to research on historic Arabic texts from late medieval Egypt and Syria. Departing from dominant understandings of these texts through the prisms of authenticity and "literarization," it engages with questions of textual constructedness and authorial agency. It consists of 13 contributions by a new generation of scholars in three parts. Each part represents a different aspect of their new readings of particular texts. Part one looks at concrete instances of textual interdependencies, part two at the creativity of authorial agencies, and part three at the relationship between texts and social practice. New Readings thus participates in the reevaluation of late medieval Arabic historiography as a critical field of inquiry. Contributors: Rasmus Bech Olsen, Víctor de Castro León, Mohammad Gharaibeh, Kenneth A. Goudie, Christian Mauder, Evan Metzger, Zacharie Mochtari de Pierrepont, Clément Onimus, Tarek Sabraa, Iria Santás de Arcos, Gowaart Van Den Bossche, Koby Yosef.

**The Persianate World** Nile Green,2019-04-09 At publication date, a free ebook version of this title will be available through Luminos, University of California Press's Open Access publishing program. Visit [www.luminosoa.org](http://www.luminosoa.org) to learn more. Persian is one of the great lingua francas of world history. Yet despite its recognition as a shared language across the Islamic world and beyond, its scope, impact, and mechanisms remain underexplored. A world historical inquiry into pre-modern cosmopolitanism, *The Persianate World* traces the reach and limits of Persian as a Eurasian language in a comprehensive survey of its geographical, literary, and social frontiers. From Siberia to Southeast Asia, and between London and Beijing, this book shows how Persian gained, maintained, and finally surrendered its status to imperial and vernacular competitors. Fourteen essays trace Persian's interactions with Bengali, Chinese, Turkic, Punjabi, and other languages to identify the forces that extended "Persographia," the domain of written Persian. Spanning the ages expansion and contraction, *The Persianate World* offers a critical survey of both the supports and constraints of one of history's key languages of global exchange.

**Entangled Life** Merlin Sheldrake, 2021-04-13 NEW YORK TIMES BESTSELLER • A “brilliant [and] entrancing” (The Guardian) journey into the hidden lives of fungi—the great connectors of the living world—and their astonishing and intimate roles in human life, with the power to heal our bodies, expand our minds, and help us address our most urgent environmental problems. “Grand and dizzying in how thoroughly it recalibrates our understanding of the natural world.”—Ed Yong, author of *An Immense World* ONE OF THE BEST BOOKS OF THE YEAR—Time, BBC Science Focus, The Daily Mail, Geographical, The Times, The Telegraph, New Statesman, London Evening Standard, Science Friday When we think of fungi, we likely think of mushrooms. But mushrooms are only fruiting bodies, analogous to apples on a tree. Most fungi live out of sight, yet make up a massively diverse kingdom of organisms that supports and sustains nearly all living systems. Fungi provide a key to understanding the planet on which we live, and the ways we think, feel, and behave. In the first edition of this mind-bending book, Sheldrake introduced us to this mysterious but massively diverse kingdom of life. This exquisitely designed volume, abridged from the original, features more than one hundred full-color images that bring the spectacular variety, strangeness, and beauty of fungi to life as never before. Fungi throw our concepts of individuality and even intelligence into question. They are metabolic masters, earth makers, and key players in most of life’s processes. They can change our minds, heal our bodies, and even help us remediate environmental disaster. By examining fungi on their own terms, Sheldrake reveals how these extraordinary organisms—and our relationships with them—are changing our understanding of how life works. Winner of the Wainwright Prize, the Royal Society Science Book Prize, and the Guild of Food Writers Award • Shortlisted for the British Book Award • Longlisted for the Rathbones Folio Prize

**The Venture of Islam, Volume 1** Marshall G. S. Hodgson, 2009-05-15 The Venture of Islam has been honored as a magisterial work of the mind since its publication in early 1975. In this three-volume study, illustrated with charts and maps, Hodgson traces and interprets the historical development of Islamic civilization from before the birth of Muhammad to the middle of the twentieth century. This work grew out of the famous course on Islamic civilization that Hodgson created and taught for many years at the University of Chicago. This is a nonpareil work, not only because of its command of its subject but also because it demonstrates how, ideally, history should be written.—The New Yorker Volume 1, The Classical Age of Islam, analyzes the world before Islam, Muhammad's challenge, and the early Muslim state between 625 and 692. Hodgson then discusses the classical civilization of the High Caliphate. The volume also contains a general introduction to the complete work and a foreword by Reuben Smith, who, as Hodgson's colleague and friend, finished the Venture of Islam after the author's death and saw it through to publication.
