They Met in a Tavern Elijah Menchaca,2021-08-10 They used to be heroes . . . and it was all downhill from there. The Starbreakers were your classic teenage heroes. Using their combined powers and skills, they were the most successful group of glintchasers in Corsar. But that all changed the day the city of Relgen died. The group went their separate ways, placing the blame on each other. Brass carried on as a solo act. Snow found work as a notorious assassin. Church became a town's spiritual leader. Angel was the owner of a bar and inn. And after overcoming his own guilt, Phoenix started a new life as a family man. Seven years after their falling out, a hefty bounty is placed on their heads. Phoenix tries to reunite the Starbreakers before everything they have left is taken from them. But a lot can change in seven years. And if mending old wounds was easy, they would have done it a long time ago.

Crampton Hodnet Barbara Pym,2013-08-01 Miss Morrow is content in her position as spinster companion to Miss Doggett, even if her employer and the woman's social circle regard her as a piece of furniture. Murder With Peacocks Donna Andrews,2006-02-07 Three Weddings...And a Murder So far Meg Langslow's summer is not going swimmingly. Down in her small Virginia hometown, she's maid of honor at the nuptials of three loved ones--each of whom has dumped the planning in her capable hands. One bride is set on including a Native American herbal purification ceremony, while another wants live peacocks on the lawn. Only help from the town's drop-dead gorgeous hunk, disappointingly rumored to be gay, keeps Meg afloat in a sea of dotty relatives and outrageous neighbors. And, in whirl of summer parties and picnics, Southern hospitality is strained to the limit by an offensive newcomer who hints at skeletons in the guests' closets. But it seems this lady has offended one too many when she's found dead in suspicious circumstances, followed by a string of accidents--some fatal. Soon, level-headed Meg's to-do list extends from flower arrangements and bridal registries to catching a killer--before the next catered event is her own funeral...

What Technology Wants Kevin Kelly,2011-09-27 From the author of the New York Times bestseller *The Inevitable*—a sweeping vision of technology as a living force that can expand our individual potential In this provocative book, one of today's most respected thinkers turns the conversation about technology on its head by viewing technology as a natural system, an extension of biological evolution. By mapping the behavior of life, we paradoxically get a glimpse at where technology is headed-or what it wants. Kevin Kelly offers a dozen trajectories in the coming decades for this near-living system. And as we align ourselves with technology's agenda, we can capture its colossal potential. This visionary and optimistic book explores how technology gives our lives greater meaning and is a must-read for anyone curious about the future.

[The Second Self](#) Sherry Turkle,1984 In *The Second Self*, Sherry Turkle looks at the computer not as a tool, but as part of our social and psychological lives; she looks beyond how we use computer games and spreadsheets to explore how the computer affects our awareness of ourselves, of one another, and of our relationship with the world. Technology, she writes, catalyzes changes not only in what we do but in how we think. First published in 1984, *The Second Self* is still essential reading as a primer in the psychology of computation. This twentieth anniversary edition allows us to reconsider two decades of computer culture-to (re)experience what was and is most novel in our new media culture and to view our own contemporary relationship with technology with fresh eyes. Turkle frames this classic work with a new introduction, a new epilogue, and extensive notes added to the original text. Turkle talks to children, college students, engineers, AI scientists, hackers, and personal computer owners-people confronting machines that seem to think and at the same time suggest a new way for us to think-about human thought, emotion, memory, and understanding. Her interviews reveal that we experience computers as being on the border between inanimate and animate, as both an extension of the self and part of the external world. Their special place betwixt and between traditional categories is part of what makes them compelling and evocative. In the introduction to this edition, Turkle quotes a PDA user as saying, When my Palm crashed, it was like a death. I thought I had lost my mind. Why we think of the workings of a machine in psychological terms-how this happens, and what it means for all of us-is the ever more timely subject of *The Second Self*. Book jacket.

Everyone Eats E. N. Anderson,2005-03-01 Everyone eats, but rarely do we ask why or investigate why we eat what we eat. Why do we love spices, sweets, coffee? How did rice become such a staple food throughout so much of eastern Asia? *Everyone Eats* examines the social and cultural reasons for our food choices and provides an explanation of the nutritional reasons for why humans eat, resulting in a unique cultural and biological approach to the topic. E. N. Anderson explains the economics of food in the globalization era, food's relationship to religion, medicine, and ethnicity as well as offers suggestions on how to end hunger, starvation, and malnutrition. *Everyone Eats* feeds our need to understand human ecology by explaining the ways that cultures and political systems structure the edible environment.

Zoo Animal Welfare Terry Maple,Bonnie M Perdue,2013-03-22 Zoo Animal Welfare thoroughly reviews the scientific literature on the welfare of zoo and aquarium animals. Maple and Perdue draw from the senior author’s 24 years of experience as a zoo executive and international leader in the field of zoo biology. The authors’ academic training in the interdisciplinary field of psychobiology provides a unique perspective for evaluating the ethics, practices, and standards of modern zoos and aquariums. The book offers a blueprint for the implementation of welfare measures and an objective rationale for their widespread use. Recognizing the great potential of zoos, the authors have written an inspirational book to guide the strategic vision of superior, welfare-oriented institutions. The authors speak directly to caretakers working on the front lines of zoo management, and to the decision-makers responsible for elevating the priority of animal welfare in their respective zoo. In great detail, Maple and Perdue demonstrate how zoos and aquariums can be designed to achieve optimal standards of welfare and wellness.
