Artificial Hells Claire Bishop, 2012-07-24 Since the 1990s, critics and curators have broadly accepted the notion that participatory art is the ultimate political art: that by encouraging an audience to take part an artist can promote new emancipatory social relations. Around the world, the champions of this form of expression are numerous, ranging from art historians such as Grant Kester, curators such as Nicolas Bourriaud and Nato Thompson, to performance theorists such as Shannon Jackson. *Artificial Hells* is the first historical and theoretical overview of socially engaged participatory art, known in the US as social practice. Claire Bishop follows the trajectory of twentieth-century art and examines key moments in the development of a participatory aesthetic. This itinerary takes in Futurism and Dada; the Situationist International; Happenings in Eastern Europe, Argentina and Paris; the 1970s Community Arts Movement; and the Artists Placement Group. It concludes with a discussion of long-term educational projects by contemporary artists such as Thomas Hirschhorn, Tania Bruguera, Paweł Althamer and Paul Chan. Since her controversial essay in *Artforum* in 2006, Claire Bishop has been one of the few to challenge the political and aesthetic ambitions of participatory art. In *Artificial Hells*, she not only scrutinizes the emancipatory claims made for these projects, but also provides an alternative to the ethical (rather than artistic) criteria invited by such artworks. *Artificial Hells* calls for a less prescriptive approach to art and politics, and for more compelling, troubling and bolder forms of participatory art and criticism.

Brian Eno Eric Enno Tamm, 1995-08-22 Musician, composer, producer: Brian Eno is unique in contemporary music. Best known in recent years for producing U2's sensational albums, Eno began his career as a synthesizer player for Roxy Music. He has since released many solo albums, both rock and ambient, written music for film and television soundtracks, and collaborated with David Bowie, David Byrne, Robert Fripp, and classical and experimental composers. His pioneering ambient sound has been enormously influential, and without him today's rock would have a decidedly different sound. Drawing on Eno's own words to examine his influences and ideas, this book—featuring a new afterword and an updated discography and bibliography—will long remain provocative and definitive.

Living as Form Nato Thompson, 2012 'Living as Form' grew out of a major exhibition at Creative Time in New York City. Like the exhibition, the book is a landmark survey of more than 100 projects selected by a 30-person curatorial advisory team; each project is documented by a selection of colour images.

Experiential Marketing Kerry Smith, Dan Hanover, 2016-03-29 The most researched, documented, and comprehensive manifesto on experiential marketing. As customers take control over what, when, why, and how they buy products and services, brands face the complete breakdown and utter failure of passive marketing strategies designed more than a half-century ago. To connect with a new generation of customers, companies must embrace and deploy a new marketing mix, powered by a more effective discipline: experiences. Experiential marketing, the use of live, face-to-face engagements to connect with audiences, create relationships and drive brand affinity, has become the fastest-growing form of marketing in the world as the very companies that built their brands on the old Madison Avenue approach—including Coca-Cola, Nike, Microsoft, American Express and others—open the next chapter of marketing. . . as experiential brands. Using hundreds of case studies, exclusive research, and interviews with more than 150 global brands spanning a decade, global experiential marketing experts Kerry Smith and Dan Hanover present the most in-depth book ever written on how companies are using experiences as the anchor of reinvented marketing mixes. You'll learn: The history and

fundamental principles of experiential marketing How top brands have reset marketing mixes as experience-driven portfolios The anatomy of a brand experience The psychology of engagement and experience design The 10 habits of highly experiential brands How to measure the impact of experiential marketing How to combine digital and social media in an experiential strategy The experiential marketing vocabulary How to begin converting to experiential marketing Marketers still torn between outdated marketing models and the need to reinvent how they market in today's customer-controlled economy will find the clarity they need to refine their marketing strategies, get a roadmap for putting their brands on a winning path, and walk away inspired to transition into experiential brands.

Trouble Boys Bob Mehr,2016-03-01 Trouble Boys is the first definitive, no-holds-barred biography of one of the last great bands of the twentieth century: The Replacements. With full participation from reclusive singer and chief songwriter Paul Westerberg, bassist Tommy Stinson, guitarist Slim Dunlap, and the family of late band co-founder Bob Stinson, author Bob Mehr is able to tell the real story of this highly influential group, capturing their chaotic, tragic journey from the basements of Minneapolis to rock legend. Drawing on years of research and access to the band's archives at Twin/Tone Records and Warner Bros. Mehr also discovers previously unrevealed details from those in the group's inner circle, including family, managers, musical friends and collaborators.

Antarcticness Ilan Kelman,2022-02-08 Antarcticness joins disciplines, communication approaches and ideas to explore meanings and depictions of Antarctica. Personal and professional words in poetry and prose, plus images, present and represent Antarctica, as presumed and as imagined, alongside what is experienced around the continent and by those watching from afar. These understandings explain how the Antarctic is viewed and managed while identifying aspects which should be more prominent in policy and practice. The authors and artists place Antarctica, and the perceptions and knowledge through Antarcticness, within inspirations and imaginations, without losing sight of the multiple interests pushing the continent's governance as it goes through rapid political and environmental changes. Given the diversity and disparity of the influences and changes, the book's contributions connect to provide a more coherent and encompassing perspective of how society views Antarctica, scientifically and artistically, and what the continent provides and could provide politically, culturally and environmentally. Offering original research, art and interpretations of different experiences and explorations of Antarctica, explanations meld with narratives while academic analyses overlap with first-hand experiences of what Antarctica does and does not – could and could not – bring to the world.

E-learning Methodologies Beatrice Ghirardini,2011 The E-Learning Methodologies guide will support professionals involved in the design and development of e-learning projects and products. The guide reviews the basic concepts of e-learning with a focus on adult learning, and introduces the various activities and roles involved in an e-learning project. The guide covers methodologies and tips for creating interactive content and for facilitating online learning, as well as some of the technologies used to create and deliver e-learning.

Consciousness and the Brain Stanislas Dehaene,2014-01-30 WINNER OF THE 2014 BRAIN PRIZE From the acclaimed author of Reading in the Brain and How We Learn, a breathtaking look at the new science that can track consciousness deep in the brain How does our brain generate a conscious thought? And why does so much of our knowledge remain unconscious? Thanks to clever psychological and brain-imaging experiments, scientists are closer to cracking this mystery than ever before. In this lively book, Stanislas Dehaene describes the pioneering work his lab and the labs of other cognitive neuroscientists worldwide have accomplished in defining, testing, and explaining the brain events behind a conscious state. We can now pin down the neurons that fire when a

person reports becoming aware of a piece of information and understand the crucial role unconscious computations play in how we make decisions. The emerging theory enables a test of consciousness in animals, babies, and those with severe brain injuries. A joyous exploration of the mind and its thrilling complexities, *Consciousness and the Brain* will excite anyone interested in cutting-edge science and technology and the vast philosophical, personal, and ethical implications of finally quantifying consciousness.

Deeper Learning, Dialogic Learning, and Critical Thinking Emmanuel Manalo, 2019-09-30 Deeper learning, dialogic learning, and critical thinking are essential capabilities in the 21st-century environments we now operate. Apart from being important in themselves, they are also crucial in enabling the acquisition of many other 21st-century skills/capabilities such as problem solving, collaborative learning, innovation, information and media literacy, and so on. However, the majority of teachers in schools and instructors in higher education are inadequately prepared for the task of promoting deeper learning, dialogic learning, and critical thinking in their students. This is despite the fact that there are educational researchers who are developing and evaluating strategies for such promotion. The problem is bridging the gap between the educational researchers' work and what gets conveyed to teachers and instructors as evidence-based, usable strategies. This book addresses that gap: in it, leading scholars from around the world describe strategies they have developed for successfully cultivating students' capabilities for deeper learning and transfer of what they learn, dialogic learning and effective communication, and critical thought. They explore connections in the promotion of these capabilities, and they provide, in accessible form, research evidence demonstrating the efficacy of the strategies. They also discuss answers to the questions of how and why the strategies work. A seminal resource, this book creates tangible links between innovative educational research and classroom teaching practices to address the all-important question of how we can realize our ideals for education in the 21st century. It is a must read for pre-service and in-service teachers, teacher educators and professional developers, and educational researchers who truly care that we deliver education that will prepare and serve students for life.

Artificial Intelligence and Games Georgios N. Yannakakis, Julian Togelius, 2018-02-17 This is the first textbook dedicated to explaining how artificial intelligence (AI) techniques can be used in and for games. After introductory chapters that explain the background and key techniques in AI and games, the authors explain how to use AI to play games, to generate content for games and to model players. The book will be suitable for undergraduate and graduate courses in games, artificial intelligence, design, human-computer interaction, and computational intelligence, and also for self-study by industrial game developers and practitioners. The authors have developed a website (<http://www.gameaibook.org>) that complements the material covered in the book with up-to-date exercises, lecture slides and reading.

Architectonics of Game Spaces Andri Gerber, Ulrich Götz, 2020-03-31 What consequences does the design of the virtual yield for architecture and to what extent can the nature of architecture be used productively to turn game-worlds into sustainable places - over here, in »reality«? This pioneering collection gives an overview of contemporary developments in designing video games and of the relationships such practices have established with the design of architecture. Due to their often simulatory nature, games reveal constructions of reality while positively impacting spatial ability and allowing for alternative avenues to complex topics and processes of negotiation. Granting insight into the merging of the design of real and virtual environments, this volume offers an invaluable platform for further debate.

The Invariant Theory of Matrices Corrado De Concini, Claudio Procesi, 2017-11-16 This book gives a unified, complete, and self-

contained exposition of the main algebraic theorems of invariant theory for matrices in a characteristic free approach. More precisely, it contains the description of polynomial functions in several variables on the set of matrices with coefficients in an infinite field or even the ring of integers, invariant under simultaneous conjugation. Following Hermann Weyl's classical approach, the ring of invariants is described by formulating and proving (1) the first fundamental theorem that describes a set of generators in the ring of invariants, and (2) the second fundamental theorem that describes relations between these generators. The authors study both the case of matrices over a field of characteristic 0 and the case of matrices over a field of positive characteristic. While the case of characteristic 0 can be treated following a classical approach, the case of positive characteristic (developed by Donkin and Zubkov) is much harder. A presentation of this case requires the development of a collection of tools. These tools and their application to the study of invariants are explained in an elementary, self-contained way in the book.

Necessary Luxuries Matt Erlin, 2014-05-29 Matt Erlin considers books and the culture around books during this period, focusing specifically on Germany where literature, and the fine arts in general, were the subject of soul-searching debates over the legitimacy of luxury.

Making Futures Pelle Ehn, Elisabet M. Nilsson, Richard Topgaard, 2014-10-31 This book describes experiments in innovation, design, and democracy, undertaken largely by grassroots organizations, non-governmental organizations, and multi-ethnic working-class neighborhoods. These stories challenge the dominant perception of what constitutes successful innovations. They recount efforts at social innovation, opening the production process, challenging the creative class, and expanding the public sphere. The cases considered include a collective of immigrant women who perform collaborative services, the development of an open-hardware movement, grassroots journalism, and hip-hop performances on city buses. They point to the possibility of democratized innovation that goes beyond solo entrepreneurship and crowdsourcing in the service of corporations to include multiple futures imagined and made locally by often-marginalized publics.

The 100 Thing Challenge Dave Bruno, 2010-12-28 “Reading this will lead you to a better life.” —Dean Nelson, author of *God Hides in Plain Sight* In *The 100 Thing Challenge* Dave Bruno relates how he remade his life and regained his soul by getting rid of almost everything. But *The 100 Thing Challenge* is more than just the story of how one man started a movement to unhook himself from consumerism by winnowing his life's possessions down to 100 things in one year. It's also an inspiring, invigorating guide to how we all can begin to live simpler, more meaningful lives.

Pharmako/Poeia Dale Pendell, 2009 *Pharmako poeia: plant powers, poisons, and herbcraft* focuses on familiar psychoactive plant-derived substances and related synthetics, ranging from the licit (tobacco, alcohol) to the illicit (cannabis, opium) and the exotic (absinthe, salvia divinorum, nitrous oxide)--Provided by publisher.

Experimental Systems Michael Schwab, 2013 In the sciences, the experimental approach has proved its worth in generating what subsequently requires understanding. Can the emergent field of artistic research be inspired by recent thinking about the history and workings of science?

Script and Society Philip J. Boyes, 2021-03-15 By the 13th century BC, the Syrian city of Ugarit hosted an extremely diverse range of writing practices. As well as two main scripts – alphabetic and logographic cuneiform – the site has also produced inscriptions in a wide range of scripts and languages, including Hurrian, Sumerian, Hittite, Egyptian hieroglyphs, Luwian hieroglyphs and Cypro-

Minoan. This variety in script and language is accompanied by writing practices that blend influences from Mesopotamian, Anatolian and Levantine traditions together with what seem to be distinctive local innovations. *Script and Society: The Social Context of Writing Practices in Late Bronze Age Ugarit* explores the social and cultural context of these complex writing traditions from the perspective of writing as a social practice. It combines archaeology, epigraphy, history and anthropology to present a highly interdisciplinary exploration of social questions relating to writing at the site, including matters of gender, ethnicity, status and other forms of identity, the relationship between writing and place, and the complex relationships between inscribed and uninscribed objects. This forms a case- study for a wider discussion of interdisciplinary approaches to the study of writing practices in the ancient world.

Adventures among Ants Mark W. Moffett, 2010-05-05 Intrepid international explorer, biologist, and photographer Mark W. Moffett, the Indiana Jones of entomology, takes us around the globe on a strange and colorful journey in search of the hidden world of ants. In tales from Nigeria, Indonesia, the Amazon, Australia, California, and elsewhere, Moffett recounts his entomological exploits and provides fascinating details on how ants live and how they dominate their ecosystems through strikingly human behaviors, yet at a different scale and a faster tempo. Moffett's spectacular close-up photographs shrink us down to size, so that we can observe ants in familiar roles; warriors, builders, big-game hunters, and slave owners. We find them creating marketplaces and assembly lines and dealing with issues we think of as uniquely human—including hygiene, recycling, and warfare. *Adventures among Ants* introduces some of the world's most awe-inspiring species and offers a startling new perspective on the limits of our own perception. • Ants are world-class road builders, handling traffic problems on thoroughfares that dwarf our highway systems in their complexity • Ants with the largest societies often deploy complicated military tactics • Some ants have evolved from hunter-gatherers into farmers, domesticating other insects and growing crops for food
