The Strange Case of Origami Yoda (Origami Yoda #1) Tom Angleberger, 2012-08-07 In this funny, uncannily wise portrait of the dynamics of a sixth-grade class and of the greatness that sometimes comes in unlikely packages, Dwight, a loser, talks to his classmates via an origami finger puppet of Yoda. If that weren't strange enough, the puppet is uncannily wise and prescient. Origami Yoda predicts the date of a pop quiz, guesses who stole the classroom Shakespeare bust, and saves a classmate from popularity-crushing embarrassment with some well-timed advice. Dwight's classmate Tommy wonders how Yoda can be so smart when Dwight himself is so clueless. With contributions from his puzzled classmates, Tommy assembles this first case file in the blockbuster bestselling Origami Yoda series, written by Tom Angleberger, author of *Star Wars: Return of the Jedi: Beware the Power of the Dark Side*, and hailed by *School Library Journal* as "honest, funny, and immensely entertaining." The Golden Age of Piracy Benerson Little, 2016-10-04 For thousands of years, pirates have terrorized the ocean voyager and the coastal inhabitant, plundered ship and shore, and wrought havoc on the lives and livelihoods of rich and poor alike. Around these desperate men has grown a body of myths and legends—fascinating tales that today strongly influence our notions of pirates and piracy. Most of these myths derive from the pirates of the "Golden Age," from roughly 1655 to 1725. This was the age of the Spanish Main, of Henry Morgan and Blackbeard, of Bartholomew Sharp and Bartholomew Roberts. The history of pirate myth is rich in action, at sea and ashore. However, the truth is far more interesting. In *The Golden Age of Piracy*, expert pirate

historian Benerson Little debunks more than a dozen pirate myths that derive from this era—from the flying of the Jolly Roger to the burying of treasure, from walking the plank to the staging of epic sea battles—and shows that the truth is far more fascinating and disturbing than the romanticized legends. Among Little's revelations are that pirates of the Golden Age never made their captives walk the plank and that they, instead, were subject to horrendous torture, such as being burned or hung by their arms. Likewise, epic sea battles involving pirates were fairly rare because most prey surrendered immediately. The stories are real and are drawn heavily from primary sources. Complementing them are colorful images of flags, ships, and buccaneers based on eyewitness accounts. Skyhorse Publishing, as well as our Arcade imprint, are proud to publish a broad range of books for readers interested in history--books about World War II, the Third Reich, Hitler and his henchmen, the JFK assassination, conspiracies, the American Civil War, the American Revolution, gladiators, Vikings, ancient Rome, medieval times, the old West, and much more. While not every title we publish becomes a New York Times bestseller or a national bestseller, we are committed to books on subjects that are sometimes overlooked and to authors whose work might not otherwise find a home.

The Confederate Carpetbaggers Daniel E.

Sutherland, 1988-06-01 Following the American Civil War, many former Confederates fled their southern homeland. Some became expatriates, settling in Canada, Europe, Mexico, South America, and Asia. Others migrated to the western United States, seeking fresh starts in the newly forming territories. But a third, somewhat more audacious group invaded the land of their Yankee foe. Settling in northeastern and midwestern towns and cities, these Confederate carpetbaggers believed that northern economic and educational opportunities offered the quickest means of rebuilding shattered fortunes and lives. In *The Confederate Carpetbaggers*, Daniel E. Sutherland examines the lives of those southern men and women who moved north between 1865 and 1880. Dealing with their various motives for moving north, problems of adaptation to northern society, attempts to find new identities, and efforts to maintain personal ties with other Confederates in the North as well as with old friends in the South, Sutherland provides a detailed and illuminating account of the contributions these displaced southerners made to the financial, literary, artistic, and political life of the nation. The principal characters in Sutherland's story are Burton Norvell Harrison, who served as private secretary to Jefferson Davis, and his wife, Constance Cary Harrison, a popular belle in wartime Richmond. In 1867 the Harrisons moved to New York City, where they remained for four decades. Their exploits, beliefs, and emotions serve as a prism through which to view the successes and failures of other Confederate carpetbaggers. Although some emigrants returned to the South after brief, unpleasant northern sojourns, others spent the remainder of their lives in the North. Some became millionaires; others suffered poverty and ill health. Some became famous; most settled into tolerable, unobtrusive lives as productive citizens in a reunited nation. Sutherland's study breaks new and significant ground in explaining the complexities of Reconstruction and late nineteenth-century American life. Traditional approaches to Reconstruction history concentrate on

the South, particularly on the plight of freedmen and on the political battle for control of state governments. Some scholars have made passing references to the most prominent Confederates in the North, but until now no one has explored the lives of these men and women in detail. In this entertaining and well-written account, Sutherland suggests that while the Confederate carpetbaggers were relatively few in number, they made significant contributions to American progress in the years following the war—contributions they might not have made had they remained in the South.

Achtung-Panzer! Heinz Guderian, 1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

From Cave Man to Cave Martian Manfred "Dutch" von Ehrenfried, 2019-04-05 This book explores the practicality of using the existing subsurface geology on the Moon and Mars for protection against radiation, thermal extremes, micrometeorites and dust storms rather than building surface habitats at great expense at least for those first few missions. It encourages NASA to plan a precursor mission using this concept and employ a "Short Stay" Opposition Class mission to Mars as the first mission rather than the "Long Stay" concept requiring a mission that is too long, too dangerous and too costly for man's first missions to Mars. Included in these pages is a short history on the uses of caves by early humans over great periods of time. It then describes the ongoing efforts to research caves, pits, tunnels, lava tubes, skylights and the associated technologies that pertain to potential lunar and Mars exploration and habitation. It describes evidence for existing caves and lava tubes on both the Moon and Mars. The work of noted scientists, technologists and roboticists are referenced and described. This ongoing work is more extensive than one would think and is directly applicable to longer term habitation and exploration of the Moon and Mars. Emphasis is also given to the operational aspects of working and living in lunar and Martian caves and lava tubes.
