*Black Swan Green* David Mitchell, 2007-02-27 By the New York Times bestselling author of *The Bone Clocks* and *Cloud Atlas* | Longlisted for the Man Booker Prize Selected by Time as One of the Ten Best Books of the Year | A New York Times Notable Book | Named One of the Best Books of the Year by The Washington Post Book World, The Christian Science Monitor, Rocky Mountain News, and Kirkus Reviews | A Los Angeles Times Book Prize Finalist | Winner of the ALA Alex Award | Finalist for the Costa Novel Award From award-winning writer David Mitchell comes a sinewy, meditative novel of boyhood on the cusp of adulthood and the old on the cusp of the new. *Black Swan Green* tracks a single year in what is, for thirteen-year-old Jason Taylor, the sleepiest village in muddiest Worcestershire in a dying Cold War England, 1982. But the thirteen chapters, each a short story in its own right, create an exquisitely observed world that is anything but sleepy. A world of Kissingeresque realpolitik enacted in boys' games on a frozen lake; of "nightcreeping" through the summer backyards of strangers; of the tabloid-fueled thrills of the Falklands War and its human toll; of the cruel, luscious Dawn Madden and her power-hungry boyfriend, Ross Wilcox; of a certain Madame Eva van Outryve de Crommelynck, an elderly bohemian emigré who is both more and less than she appears; of Jason's search to replace his dead grandfather's irreplaceable smashed watch before the crime is discovered; of first cigarettes, first kisses, first Duran Duran LPs, and first deaths; of Margaret Thatcher's recession; of Gypsies camping in the woods and the hysteria they inspire; and, even closer to home, of a slow-motion divorce in four seasons. Pointed, funny, profound, left-field, elegiac, and painted with the stuff of life, *Black Swan Green* is David Mitchell's subtlest and most effective achievement to date. Praise for *Black Swan Green* "[David Mitchell has created] one of the most endearing, smart, and funny young narrators ever to rise up from the pages of a novel. . . . The always fresh and brilliant writing will carry readers back to their own childhoods. . . . This enchanting novel makes us remember exactly what it was like."—The Boston Globe "[David Mitchell is a] prodigiously daring and imaginative young writer. . . . As in the works of Thomas Pynchon and Herman Melville, one feels the roof of the narrative lifted off and oneself in thrall."—Time

*Experiential Marketing* Kerry Smith, Dan Hanover, 2016-03-29 The most researched, documented, and comprehensive manifesto on experiential marketing. As customers take control over what, when, why, and how they buy products and services, brands face the complete breakdown and utter failure of passive marketing strategies designed more than a half-century ago. To connect with a new generation of customers, companies must embrace and deploy a new marketing mix, powered by a more effective discipline: experiences. Experiential marketing, the use of live, face-to-face engagements to connect with audiences, create relationships and drive brand affinity, has become the fastest-growing form of marketing in the world as the very companies that built their brands on the old Madison Avenue approach—including Coca-Cola, Nike, Microsoft, American Express and others—open the next chapter of marketing. . . as experiential brands. Using hundreds of case studies, exclusive research, and interviews with more than 150 global brands spanning a decade, global experiential marketing experts Kerry Smith and Dan Hanover present the most in-depth book ever written on how companies are using experiences as the anchor of reinvented marketing mixes. You'll learn: The history and fundamental principles of experiential marketing How top brands have reset marketing mixes as experience-driven portfolios The anatomy of a brand experience The psychology of engagement and experience design The 10 habits of highly

experiential brands How to measure the impact of experiential marketing How to combine digital and social media in an experiential strategy The experiential marketing vocabulary How to begin converting to experiential marketing Marketers still torn between outdated marketing models and the need to reinvent how they market in today's customer-controlled economy will find the clarity they need to refine their marketing strategies, get a roadmap for putting their brands on a winning path, and walk away inspired to transition into experiential brands.

**Into Thin Air** Jon Krakauer, 1998-11-12 #1 NATIONAL BESTSELLER • The epic account of the storm on the summit of Mt. Everest that claimed five lives and left countless more—including Krakauer's—in guilt-ridden disarray. A harrowing tale of the perils of high-altitude climbing, a story of bad luck and worse judgment and of heartbreaking heroism. —PEOPLE A bank of clouds was assembling on the not-so-distant horizon, but journalist-mountaineer Jon Krakauer, standing on the summit of Mt. Everest, saw nothing that suggested that a murderous storm was bearing down. He was wrong. By writing *Into Thin Air*, Krakauer may have hoped to exorcise some of his own demons and lay to rest some of the painful questions that still surround the event. He takes great pains to provide a balanced picture of the people and events he witnessed and gives due credit to the tireless and dedicated Sherpas. He also avoids blasting easy targets such as Sandy Pittman, the wealthy socialite who brought an espresso maker along on the expedition. Krakauer's highly personal inquiry into the catastrophe provides a great deal of insight into what went wrong. But for Krakauer himself, further interviews and investigations only lead him to the conclusion that his perceived failures were directly responsible for a fellow climber's death. Clearly, Krakauer remains haunted by the disaster, and although he relates a number of incidents in which he acted selflessly and even heroically, he seems unable to view those instances objectively. In the end, despite his evenhanded and even generous assessment of others' actions, he reserves a full measure of vitriol for himself. This updated trade paperback edition of *Into Thin Air* includes an extensive new postscript that sheds fascinating light on the acrimonious debate that flared between Krakauer and Everest guide Anatoli Boukreev in the wake of the tragedy. I have no doubt that Boukreev's intentions were good on summit day, writes Krakauer in the postscript, dated August 1999. What disturbs me, though, was Boukreev's refusal to acknowledge the possibility that he made even a single poor decision. Never did he indicate that perhaps it wasn't the best choice to climb without gas or go down ahead of his clients. As usual, Krakauer supports his points with dogged research and a good dose of humility. But rather than continue the heated discourse that has raged since *Into Thin Air*'s denouncement of guide Boukreev, Krakauer's tone is conciliatory; he points most of his criticism at G. Weston De Walt, who coauthored *The Climb*, Boukreev's version of events. And in a touching conclusion, Krakauer recounts his last conversation with the late Boukreev, in which the two weathered climbers agreed to disagree about certain points. Krakauer had great hopes to patch things up with Boukreev, but the Russian later died in an avalanche on another Himalayan peak, Annapurna I. In 1999, Krakauer received an Academy Award in Literature from the American Academy of Arts and Letters—a prestigious prize intended to honor writers of exceptional accomplishment. According to the Academy's citation, Krakauer combines the tenacity and courage of the finest tradition of investigative journalism with the stylish subtlety and profound insight of the born writer. His account of an ascent of Mount Everest has led to a general reevaluation of climbing and of the commercialization of what was once a romantic, solitary sport; while his account of the life and death of Christopher McCandless, who died of starvation after challenging the Alaskan wilderness, delves even more deeply and disturbingly into the fascination of nature and the devastating effects of its lure on a young and curious mind.

**What Technology Wants** Kevin Kelly, 2011-09-27 From the author of the New York Times bestseller *The Inevitable*— a sweeping vision of technology as a living force that can expand our individual potential. In this provocative book, one of today's most respected thinkers turns the conversation about technology on its head by viewing technology as a natural system, an extension of biological evolution. By mapping the behavior of life, we paradoxically get a glimpse at where technology is headed—or what it wants. Kevin Kelly offers a dozen trajectories in the coming decades for this near-living system. And as we align ourselves with technology's agenda, we can capture its colossal potential. This visionary and optimistic book explores how technology gives our lives greater meaning and is a must-read for anyone curious about the future.

Swamp Thing (1985-1996) #50 Alan Moore, 2011-06-01 While John Constantine and the mystical heroes of the DC Universe wage a last-ditch effort to hold back the evil of the Brujeria, Swamp Thing, the Demon and others descend into hell itself to battle a horde of demons; includes Phantom Stranger, Spectre, Doctor Fate, and Deadman.

**Female Masculinity** Judith Halberstam, Jack Halberstam, 1998 Masculinity without men. In *Female Masculinity* Judith Halberstam takes aim at the protected status of male masculinity and shows that female masculinity has offered a distinct alternative to it for well over two hundred years. Providing the first full-length study on this subject, Halberstam catalogs the diversity of gender expressions among masculine women from nineteenth-century pre-lesbian practices to contemporary drag king performances. Through detailed textual readings as well as empirical research, Halberstam uncovers a hidden history of female masculinities while arguing for a more nuanced understanding of gender categories that would incorporate rather than pathologize them. She rereads Anne Lister's diaries and Radclyffe Hall's *The Well of Loneliness* as foundational assertions of female masculine identity. She considers the enigma of the stone butch and the politics surrounding butch/femme roles within lesbian communities. She also explores issues of transsexuality among transgender dykes--lesbians who pass as men--and female-to-male transsexuals who may find the label of lesbian a temporary refuge. Halberstam also tackles such topics as women and boxing, butches in Hollywood and independent cinema, and the phenomenon of male impersonators. *Female Masculinity* signals a new understanding of masculine behaviors and identities, and a new direction in interdisciplinary queer scholarship. Illustrated with nearly forty photographs, including portraits, film stills, and drag king performance shots, this book provides an extensive record of the wide range of female masculinities. And as Halberstam clearly demonstrates, female masculinity is not some bad imitation of virility, but a lively and dramatic staging of hybrid and minority genders.

**Poucher's Perfumes, Cosmetics and Soaps** H. Butler, 2013-06-29 Poucher's *Perfumes Cosmetics and Soaps* has been in print since 1923 and is the classic reference work in the field of cosmetics. Now in a fully updated 10th edition, this new volume provides a firm basic knowledge in the science of cosmetics (including toiletries) as well as incorporating the latest trends in scientific applications and legislation which have occurred since the 9th edition. This edition will not only be an excellent reference book for students entering the industry but also for those in specialized research companies, universities and other associated institutions who will be able to gain an overall picture of the modern cosmetic science and industry. The book has been logically ordered into four distinct parts. The historical overview of Part 1 contains an essay demonstrating William Arthur Poucher's influence on the 20th Century cosmetics industry as well as a chapter detailing the long history of cosmetics. Part 2 is a comprehensive listing of the properties and uses of common cosmetic types, ranging from Antiperspirants through to Sunscreen preparations. There are an increased number of raw materials in use today and their chemical, physical and safety benefits are

carefully discussed along with formulation examples. The many additions since the last edition demonstrate the dramatic recent expansion in the industry and how changes in legal regulations affecting the development, production and marketing of old, established and new products are operative almost worldwide. Information on specialist products for babies and others is included within individual chapters. The chapters in Part 3 support and outline the current guidelines regarding the assessment and control of safety and stability. This information is presented chemically, physically and microbiologically. Part 3 chapters also detail requirements for the consumer acceptability of both existing and new products. Those legal regulations now in force in the EU, the USA and Japan are carefully described in a separate chapter and the remaining chapters have been extensively updated to explain the technical and practical operations needed to comply with regulations when marketing. This information will be invaluable to European Union and North American companies when preparing legally required product information dossiers. The final chapters in Part 4 contain useful information on the psychology of perfumery as well as detailing methods for the conduct of assessment trials of new products. As ingredient labelling is now an almost universal legal requirement the International Nomenclature of Cosmetics Ingredients (INCI) for raw materials has been used wherever practicable. The advertised volume is the 10th edition of what was previously known as volume 3 of Poucher's Cosmetics and Soaps. Due to changes in the industry there are no plans to bring out new editions of volume 1 and 2.

**Nondestructive Characterization of Materials IV** J.F. Bussière, Robert E. Green, C.O. Ruud, 2013-11-11 There is a great deal of interest in extending nondestructive technologies beyond the location and identification of cracks and voids. Specifically there is growing interest in the application of nondestructive evaluation (NOE) to the measurement of physical and mechanical properties of materials. The measurement of materials properties is often referred to as materials characterization; thus nondestructive techniques applied to characterization become nondestructive characterization (NDC). There are a number of meetings, proceedings and journals focused upon nondestructive technologies and the detection and identification of cracks and voids. However, the series of symposia, of which these proceedings represent the fourth, are the only meetings uniquely focused upon nondestructive characterization. Moreover, these symposia are especially concerned with stimulating communication between the materials, mechanical and manufacturing engineer and the NDE technology oriented engineer and scientist. These symposia recognize that it is the welding of these areas of expertise that is necessary for practical development and application of NDC technology to measurements of components for in service life time and sensor technology for intelligent processing of materials. These proceedings are from the fourth international symposia and are edited by c.o. Ruud, J. F. Bussiere and R.E. Green, Jr. . The dates, places, etc of the

symposia held to date area as follows: Symposia on Nondestructive Methods for TITLE: Material Property Determination DATES: April 6-8, 1983 PLACE: Hershey, PA, USA CHAIRPERSONS: C.O. Ruud and R.E. Green, Jr.
