This is the Canon Joan Anim-Addo, Deirdre Osborne, Kadija Sesay, 2021-10-28 'A vital and timely introduction to some of the best books I've ever read. Perfectly curated and filled with brilliant literature' Nikesh Shukla 'The ultimate introduction to post-colonial literature for those who want to understand the classics and the pioneers in this exciting area of books' Symeon Brown These are the books you should read. This is the canon. Joan Anim-Addo, Deirdre Osborne and Kadija Sesay have curated a decolonized reading list that celebrates the wide and diverse experiences of people from around the world, of all backgrounds and all races. It disrupts the all-too-often white-dominated 'required reading' collections that have become the accepted norm and highlights powerful voices and cultural perspectives that demand a place on our shelves. From literary giants such as Toni Morrison and Chinua Achebe to less well known (but equally vital) writers such as Caribbean novelist Earl Lovelace or Indigenous Australian author Tony Birch, the novels recommended here are in turn haunting and lyrical; innovative and inspiring; edgy and poignant. The power of great fiction is that readers have the opportunity to discover new worlds and encounter other beliefs and opinions. This is the Canon offers a rich and multifaceted perspective on our past, present and future which deserves to be read by all bibliophiles - whether they are book club members or solitary readers, self-educators or teachers.

50 Years of Central Banking in Kenya Patrick Njoroge, Victor Murinde, 2021 This book documents important milestones in the epic journey traversed by the Central Bank of Kenya over the last 50 years, putting into perspective the evolution of central banking globally and within the East African region, and contemplating future prospects and challenges. The book is timely, mainly because the global financial landscape has shifted. Central bankers have expanded their mandates, beyond the singular focus on inflation and consider economic growth as their other important objective. Financial crises have continued to disrupt the functioning of financial institutions and markets, the most devastating episodes being the global financial crisis, which broke out in 2008 and from which the global financial system has not fully recovered, and the unprecedented challenges posed by the global coronavirus pandemic. Bank regulation has moved from Basel I, to Basel II, and somehow migrated to Basel III, although some countries are still at the cross-roads. The book originated from the wide ranging discussions on central banking, from a symposium to celebrate the 50 year anniversary on 13 September 2016 in Nairobi. The participants at the symposium included current and former central bank governors from Kenya and the Eastern Africa region, high level officials from multilateral financial institutions, policy makers, bank executives, civil society actors, researchers and students. The book is an invaluable resource for policy makers, practitioners and researchers, on how monetary policy and financial practices in vogue today in Kenya have evolved through time and worked very well, but also about some pitfalls--

50 Women against Hitler Stephan D. Yada-Mc Neal,2018-07-13 Women in the resistance is to this day a barely treated topic of the historiography of World War II. But many successful actions of the Allies, the knowledge of German activities would not have been possible without the perilous use of women. Whether as spies, as couriers of important news, in the supply and accommodation of resistance fighters or refugee soldiers of the Allies, without the energetic help of women many lives would have been lost. This book tries to use examples of women from different countries to record how active and sometimes very effective their work was. But this book also commemorates those women who lost their lives in this fight against oppression, occupation and barbarism.

50 Mindful Steps to Self-Esteem Janetti Marotta,2013-12-01 Sometimes we all need a little lift—something to put the bounce back in our step. If you are like many, you may struggle with self-confidence. You may also compare your successes and failures with those of others. If everything is going well in your life, this tactic may temporarily bolster your sense of self-worth. But what happens when things aren't going so well? Based on the idea that true self-esteem is grounded in internal, rather than external factors, this book offers 50 easy-to-use mindfulness practices that will help you improve inner awareness and live a more fulfilled life without harsh self-judgment. Mindfulness can help you battle feelings of low self-worth by encouraging you to pay attention to your negative thoughts as they occur, accept them, and ultimately control of how you react to them. The exercises in this pocket-sized book are intended to be simple, brief, and powerful. These are practices to settle into each morning, perhaps before your cup of tea or coffee, and which can be sprinkled throughout the day when you are at work, play, or home. To help you keep track of your thoughts, the book also includes journaling exercises that will help you discover what actions may have led to feelings of positivity or negativity. By focusing on your own awareness and thought processes, you will begin to understand what factors cause you to feel bad about yourself, and honestly assess those factors without giving in to feelings of hopelessness. You will discover that true self-esteem has less to do with what the world is telling you, and has everything to do with what you tell yourself.

Bitcoin: Ayn Rand was wrong, Atlas never shrugged: A 50 year old dream SAADETTİN KONUKSEVEN,TUNA ÖZEN,2018-07-17 In Ayn Rand's Atlas Shrugged, all the people who work, contribute and produce start disappearing one by one as a result of the government attempting to take over all lines of work. These people are convinced to disappear by a man called John Galt. The whole country asks the same question, which also happens to be the motto for the book: "Who is John Galt?" Due to Bitcoin becoming so well-known and having regular appearances on headlines, everyone started looking for the creator of Bitcoin, who is still a mystery. Just like Atlas Shrugged, a similar question gnawed at the minds of people and made headlines: "Who is Satoshi Nakamoto?" Why did we start with such a prologue? Because you cannot understand Bitcoin without reading Ayn Rand and understanding Friedrich Hayek. Because every revolution has an ideal foundation. Even though Bitcoin is a software revolution, it is also an ideal one. A revolution with roots reaching to the first days of humanity. A revolution that will take humans back to their essence. A revolution that may bring Capitalism: The Unknown Ideal, as Ayn Rand calls it. Bitcoin is a revolution against all third parties whom we believe to be trustworthy. It is a

revolution against governments, banks, land registry offices, notaries and all intermediaries. It may very well be the foundation of a new world where only those who produce will rise, where borders will disappear; the utopia founded by John Galt for the hard-working people. The media did not say that a revolution has happened when the French Revolution occurred in 1789. People didn't start thinking, "the concept of nation state is born and a new era has begun." Only after 100-150 years it was understood that this movement was a revolution that marked the end of an era and the beginning of a new one. Ayn Rand was wrong. Atlas never shrugged!
