The Craft of Scientific Presentations Michael Alley,2006-05-17 This timely and hugely practical work provides a score of examples from contemporary and historical scientific presentations to show clearly what makes an oral presentation effective. It considers presentations made to persuade an audience to adopt some course of action (such as funding a proposal) as well as presentations made to communicate information, and it considers these from four perspectives: speech, structure, visual aids, and delivery. It also discusses computer-based projections and slide shows as well as overhead projections. In particular, it looks at ways of organizing graphics and text in projected images and of using layout and design to present the information efficiently and effectively.

Practical Ship Design D.G.M. Watson,2002-02-22 The ever-growing demand for commercial activities at sea has meant that ships are rapidly developing and that the rules governing their construction and operation are changing. Practical Ship Design records these changes, their outcomes and the reasoning behind them. It deals with every aspect of ship design and handles a wide range of both merchant ships and naval ships with authority. It provides coverage of cargo ships and passenger ships, tugs, dredgers and other service craft. It also includes concept design, detail design, structural design, hydrodynamics design, the effect of regulations, the preparation of specifications and matters of costs and economics. Drawing on the author's extensive practical experience, Practical Ship Design is likely to interest everybody involved in the design, construction, repair and operation of ships. Students and the most experienced professionals will all benefit from the book's vast store of design data and its conclusions and recommendations.

The Emperor of All Maladies Siddhartha Mukherjee,2011-08-09 Winner of the Pulitzer Prize and a documentary from Ken Burns on PBS, this New York Times bestseller is “an extraordinary achievement” (The New Yorker)—a magnificent, profoundly humane “biography” of cancer—from its first documented appearances thousands of years ago through the epic battles in the twentieth century to cure, control, and conquer it to a radical new understanding of its essence. Physician, researcher, and award-winning science writer, Siddhartha Mukherjee examines cancer with a cellular biologist’s precision, a historian’s perspective, and a biographer’s passion. The result is an astonishingly lucid and eloquent chronicle of a disease humans have lived with—and perished from—for more than five thousand years. The story of cancer is a story of human ingenuity, resilience, and perseverance, but also of hubris, paternalism, and misperception. Mukherjee recounts centuries of discoveries, setbacks, victories, and deaths, told through the eyes of his predecessors and peers, training their wits against an infinitely resourceful adversary that, just three decades ago, was thought to be easily vanquished in an all-out “war against cancer.” The book reads like a literary thriller with cancer as the protagonist. Riveting, urgent, and surprising, The Emperor of All Maladies provides a fascinating glimpse into the future of cancer treatments. It is an illuminating book that provides hope and clarity to those seeking to demystify cancer.

La Finca Corky Parker,2021-01-26 At age forty, Parker surrendered to her Swept Away meets Swiss Family Robinson fantasy of running an inn far from her home in the Pacific Northwest. For the next twenty-plus years Parker ran La Finca Caribe, an eco-lodge in Vieques, Puerto Rico. What started as a rough-and-tumble dream grew into a paradise enjoyed by guests from around the world. Sketchbook in hand, Parker chronicled her daily adventures living with the land. La Finca is a lively graphic memoir about a woman creating a new life amid countless challenges, including hurricanes that led her to reconsider everything. It is a story about trusting oneself, self-discovery, accepting disappointment and loss, and falling in love with a place.

Shooting the Pacific War Thayer Soule,2014-10-17 Thayer Soule couldn't believe his orders. As a junior officer with no military training or indoctrination and less than ten weeks of active duty behind him, he had been assigned to be photographic officer for the First Marine Division. The Corps had never had a photographic division before, much less a field photographic unit. But Soule accepted the challenge, created the unit from scratch, established policies for photography, and led his men into combat. Soule and his unit produced films and photos of training, combat action pictures, and later, terrain studies and photographs for intelligence purposes. Though he had never heard of a photo-litho set, he was in charge of using it for map production, which would prove vital to the division. Shooting the Pacific War is based on Soule's detailed wartime journals. Soule was in the unique position to interact with men at all levels of the military, and he provides intriguing closeups of generals, admirals, sergeants, and privates -everyone he met and worked with along the way. Though he witnessed the horror of war firsthand, he also writes of the vitality and intense comradeship that he and his fellow Marines experienced. Soule recounts the heat of battle as well as the intense training before and rebuilding after each campaign. He saw New Zealand in the desperate days of 1942. His division was rebuilt in Australia following Guadalcanal. After a stint back in Quantico training more combat photographers, he went to Guam and then to the crucible of Iwo Jima. At war's end he was serving as Photographic Officer, Fleet Marine Force Pacific, at Pearl Harbor.

The Best That Money Can't Buy Jacque Fresco & Roxanne Meadows, FEW TECHNOLOGICAL ACHIEVEMENTS are as impressive as the ability to see our own planet from outer space. The beautiful sphere suspended against the black void of space makes plain the bond that the billions of us on Earth have in common. This global consciousness inspires space travellers who then provide emotional and spiritual observations. Their views from outer space awaken them to a grand realization that all who share our planet make up a single community. They think this viewpoint will help unite the nations of the world in order to build a peaceful future for the present generation and the ones that follow. Many poets, philosophers, and writers have criticized the artificial borders that separate people preoccupied with the notion of nationhood. Despite the visions and hopes of astronauts, poets, writers, and visionaries, the reality is that nations are continuously at war with one another, and poverty and hunger prevail in many places throughout the world, including the United States. So far, no astronaut arriving back on Earth with this new social consciousness has proposed to transcend the world's limitations with a world where no national boundaries exist. Each remains loyal to his/her particular nation-state, and doesn't venture beyond patriotism - my country, right or wrong - because doing so may risk their positions. Most problems we face in the world today are of our own making. We must accept that the future depends upon us. Interventions by mythical or divine characters in white robes descending from the clouds, or by visitors from other worlds, are illusions that cannot solve the problems of our modern world. The future of the world is our responsibility and depends upon decisions we make today. We are our own salvation or damnation. The shape and solutions of the future depend totally on the collective effort of all people working together.

Looking for a Ship John McPhee, 2011-04-01 This is an extraordinary tale of life on the high seas aboard one of the last American merchant ships, the S.S. Stella Lykes, on a forty-two-day journey from Charleston down the Pacific coast of South America. As the crew of the Stella Lykes makes their ocean voyage, they tell stories of other runs and other ships, tales of disaster, stupidity, greed, generosity, and courage.

Quiet Susan Cain, 2013-01-29 #1 NEW YORK TIMES BESTSELLER • Experience the book that started the Quiet Movement and revolutionized how the world sees introverts—and how introverts see themselves—by offering validation, inclusion, and inspiration “Superbly researched, deeply insightful, and a fascinating read, Quiet is an indispensable resource for anyone who wants to understand the gifts of the introverted half of the population.”—Gretchen Rubin, author of The Happiness Project NAMED ONE OF THE BEST BOOKS OF THE YEAR BY People • O: The Oprah Magazine • Christian Science Monitor • Inc. • Library Journal • Kirkus Reviews At least one-third of the people we know are introverts. They are the ones who prefer listening to speaking; who innovate and create but dislike self-promotion; who favor working on their own over working in teams. It is to introverts—Rosa Parks, Chopin, Dr. Seuss, Steve Wozniak—that we owe many of the great contributions to society. In Quiet, Susan Cain argues that we dramatically undervalue introverts and shows how much we lose in doing so. She charts the rise of the Extrovert Ideal throughout the twentieth century and explores how deeply it has come to permeate our culture. She also introduces us to successful introverts—from a witty, high-octane public speaker who recharges in solitude after his talks, to a record-breaking salesman who quietly taps into the power of questions. Passionately argued, impeccably researched, and filled with indelible stories of real people, Quiet has the power to permanently change how we see introverts and, equally important, how they see themselves. Blue Latitudes Tony Horwitz, 2003-08-01 In an exhilarating tale of historic adventure, the Pulitzer Prize-winning author of *Confederates in the Attic* retraces the voyages of Captain James Cook, the Yorkshire farm boy who drew the map of the modern world. Captain James Cook's three epic journeys in the 18th century were the last great voyages of discovery. His ships sailed 150,000 miles, from the Arctic to the Antarctic, from Tasmania to Oregon, from Easter Island to Siberia. When Cook set off for the Pacific in 1768, a third of the globe remained blank. By the time he died in Hawaii in 1779, the map of the world was substantially complete. Tony Horwitz vividly recounts Cook's voyages and the exotic scenes the captain encountered: tropical orgies, taboo rituals, cannibal feasts, human sacrifice. He also relives Cook's adventures by following in the captain's wake to places such as Tahiti, Savage Island, and the Great Barrier Reef to discover Cook's embattled legacy in the present day. Signing on as a working crewman aboard a replica of Cook's vessel, Horwitz experiences the thrill and terror of sailing a tall ship. He also explores Cook the man: an impoverished farmboy who broke through the barriers of his class and time to become the greatest navigator in British history. By turns harrowing and hilarious, insightful and entertaining, BLUE LATITUDES brings to life a man whose voyages helped create the 'global village' we know today.

Parachute Recovery Systems Theo W. Knacke, 1992 The purpose of this manual is to provide recovery system engineers in government and industry with tools to evaluate, analyze, select, and design parachute recovery systems. These systems range from simple, one-parachute assemblies to multiple-parachute systems, and may include equipment for impact attenuation, flotation, location, retrieval, and disposition. All system aspects are discussed, including the need for parachute recovery, the selection of the most suitable recovery system concept, concept analysis, parachute performance, force and stress analysis, material selection, parachute assembly and component design, and manufacturing. Experienced recovery system engineers will find this publication useful as a technical reference book; recent college graduates will find it useful as a textbook for learning about parachutes and parachute recovery systems; and technicians with extensive practical experience will find it useful as an engineering textbook that includes a chapter on parachute-related aerodynamics. In this manual, emphasis is placed on aiding government employees in evaluating and supervising the design and application of parachute systems. The parachute recovery system uses aerodynamic drag to decelerate people and equipment moving in air from a higher velocity to a lower velocity and to a safe landing. This lower velocity is known as rate of descent, landing velocity, or impact velocity, and is determined by the following requirements: (1) landing personnel uninjured and ready for action, (2) landing equipment and air vehicles undamaged and ready for use or refurbishment, and (3) impacting ordnance at a preselected angle and velocity.
