From Pac-Man to Pop Music Karen Collins,2017-10-03 Digital interactive audio is the future of audio in media - most notably video games, but also web pages, theme parks, museums, art installations and theatrical events. Despite its importance to contemporary multi-media, this is the first book that provides a framework for understanding the history, issues and theories surrounding interactive audio. Karen Collins presents the work of academics, composers and sound programmers to introduce the topic from a variety of angles in order to provide a supplementary text for music and multimedia courses. The contributors cover practical and theoretical approaches, including historical perspectives, emerging theories, socio-cultural approaches to fandom, reception theory and case study analyses. The book offers a fresh perspective on media music, one that will complement film studies, but which will show the necessity of a unique approach when considering games music.

MiniEco Kate Lilley,2013 MiniEco is the sensational craft blog of Kate Lilley. With over 250,000 followers it has taken on cult status in the international craft community, and that is purely down to Kates fresh, contemporary and beautifully explained and executed craft projects. With a book for children already under her belt, this publication focuses more on adults with 33 pieces including paper gems, an origami lampshade, macrame hangings, pop-up pixel cards, hama bead candle holders, and tie-dyed furoshiki cloths. The ideas range in complexity from the simple to the advanced, but each one is totally unique and has never before been published. The look of the book will reflect the immaculate, Japanese-inflected minimalism of the MiniEco website, with some high-end production finishes including a die-cut, dust-jacketed paperback binding and boldly pared-back photography. QR codes will link to animated gifs of the craft being made.

What she treasures above all else are books and she is consumed by them, reading and collecting whatever she can to satisfy her voracious appetite for stories, facts, and history. But Jodie lives in the year 2075, and more than fifty years have passed since the banning of books and paper; it's a time when no one can own a printed book, or even print photographs. In this E-world, experiences are largely simulated, from the reconstituted food to the zoo that only shows films of all the extinct species. With her student library card, which gives her the ability to time travel, Jodie discovers that she and her friends can experience historical events and meet legendary characters, and can also find and bring home her precious books to keep safe in her secret hiding place

The Light in the Sound V. G. Anderson,2015-10-19 The Light in the Sound is the character-driven and often comical story of a spirited young woman, Rachel Richardson, who works in an adult toy store in Seattle. Her estranged family lives a thousand miles away, and she has a bunch of wretched friends. She really just wants to be loved, but this isn't a love story. It's about combating isolation. Rachel is tired of walking through life half

asleep—literally and figuratively because she also suffers from night terrors. Counting on others becomes increasingly difficult, though. As she attempts to make new connections, familial wounds grow deeper and deceptions multiply. Her sense of disconnection from family, work, and friends grows, resulting in her attempting to cut all ties, turn inward, and numb herself emotionally. Ultimately, in the wake of losing everything—yet again—Rachel is forced to discover how many times one person can start over before self-destructing.
